1. CALL TO ORDER & OPENING COMMENTS
   Mr. Keith Parker, Rector

2. PRESIDENT’S REPORT
   Dr. Michael Rao, President

3. APPROVAL OF MINUTES
   September 17-18, 2020 BOV meeting
   October 30, 2020 BOV Retreat
   Mr. Keith Parker, Rector

4. PUBLIC COMMENT PERIOD
   Ms. Chelsea Gray, Assistant Secretary & Board Liaison

5. STRATEGIC TASK FORCE UPDATE
   Mr. H. Benson Dendy, III, Vice Rector

6. GOVERNANCE AND COMPENSATION
   Mr. Keith Parker, Rector
   a. ACTION ITEMS,
      RECOMMENDATION FOR:
      i. Governance and Compensation Committee Dashboard
         Ms. Chelsea Gray, Board Liaison and Assistant Secretary
         Mr. H. Benson Dendy, III, Vice Rector
   b. CLOSED SESSION – Freedom of Information
      Act Sections 2.2-3711 (A) (1), (23)
      i. President’s Report
      ii. Faculty Tenure Appointments, Changes in Status and Other Personnel Actions
         Mr. H. Benson Dendy, III, Vice Rector
         Dr. Michael Rao, President
   c. RETURN TO OPEN SESSION
      AND CERTIFICATION
      Resolution and Certification
      Mr. H. Benson Dendy, III, Vice Rector
Action Item:
Approval of items discussed in closed session if necessary

7. ACADEMIC & HEALTH AFFAIRS

a. ACTION ITEMS,
   RECOMMENDATION FOR:

   i. New Certificate Program Proposals:
      1. Proposal to create a Graduate Certificate in Media and Culture
      2. Proposal to create a Post-Professional Certificate in Adult-Gerontology Acute Care Nurse Practitioner
      3. Proposal to create a Post-Professional Certificate in Family Nurse Practitioner
      4. Proposal to create a Post-Professional Certificate in Psychiatric Mental Health Nurse Practitioner

   ii. Modifications to Existing Certificate Programs:
       1. Proposal to request a credit hour reduction to the Master of Science in Human Genetics in the School of Medicine
       2. Proposal to reduce the credit hours for the Master of Science in Anatomy and Neurobiology
       3. Proposal to reduce the credit hours for the Master of Science in Biostatistics

   iii. Discontinuance of Degree Programs or Certificates:
        1. Proposal to discontinue the Master of Science in Nurse Anesthesia in the College of Health Professions

   iv. Organizational Changes:
       1. Proposal to create the Center for Biological Date Science

   v. Policy Proposals:
       1. Revised Honor and Standards of Academic Conduct Policy
       2. Revised Additional Sources of Academic Credit Policy

b. REPORT FROM PROVOST
   Dr. Gail Hackett, Provost and Senior Vice President for Academic Affairs

   a. REPORT FROM THE SENIOR VICE PRESIDENT FOR HEALTH SCIENCES/CEO VCU HEALTH
      Dr. Arthur Kellermann, Senior Vice President for Health Sciences/CEO VCU Health

   d. REPORT FROM THE VICE PRESIDENT FOR INSTITUTIONAL EQUITY, EFFECTIVENESS AND SUCCESS
      Dr. Aashir Nasim, Vice President for Institutional Equity, Effectiveness and Success

   e. PRIORITIES AND INITIATIVES
      i. VCU Career Readiness: A Holistic
      Dr. Gail Hackett, Provost and Senior Vice President for Academic Affairs
Model for Success

ii. Report on Student Athletes

f. CONSTITUENT REPORTS
   i. Student Representatives

   ii. Faculty Representatives

   iii. Staff Representatives

g. MISCELLANEOUS REPORTS

   Approval of items discussed in closed session if necessary

15. OTHER BUSINESS Mr. Keith Parker, Rector

16. ADJOURNMENT Mr. Keith Parker, Rector

** The start time for the Board of Visitors meeting is approximate only. The meeting may begin either before or after the listed approximate start time as Board members are ready to proceed.

NOTE: In accordance with the Board’s operating procedures and in compliance with the Virginia Freedom of Information Act, there will be no opportunity for public comment at this meeting.
Proposal to create a Graduate Certificate in Media and Culture

Overview
Virginia Commonwealth University (VCU) requests approval to create a 12-credit hour Graduate Certificate in Media and Culture. The purpose of the certificate program in Media and Culture is to advance the knowledge, skills and abilities of communication professionals, and those seeking to lead communication organizations in new roles. Students will be trained to understand the legal and ethical issues affecting media industries and develop innovative solutions to communication issues. Students will also take elective courses to develop new skills and best practices in the field. Upon completion of this certificate, graduates will be able to demonstrate higher level skills in communication practice such as contemporary leadership skills, mastery in legal and ethical communication issues, and media diversity adeptness, and depending on their focus area, media economics, news analytics, data journalism, strategic communication writing and/or public relations skills, giving them the ability to be competitive for leading roles in various communication positions.

Method of Delivery
Traditional face-to-face classroom format and fully online.

Target Implementation Date
Fall 2021

Target Population
The intended target audience for the proposed certificate program include professionals with a background in mass media, journalism and strategic communication. This certificate is primarily targeted toward prospective students with academic and practical background in communication or a closely related field.

Impact on Faculty
Full-time faculty and adjunct faculty in the Richard T. Robertson School of Media and Culture will be the primary instructors in the proposed program and one of the faculty will serve as Program Director. No new positions will be created to initiate and sustain this certificate program.

Funding
Resources required to support the certificate program are met by existing resources to support current programs. These include student support services (enrollment, help desk, and library), faculty support services, and general administration (budgeting, forecasting, and enrollment management). The School of Nursing has adequate resources to initiate and sustain this certificate program.

Next Steps
November 19 - University Committee on Academic Affairs and University Policies (UCAAUP) Meeting
December 3 - University Council Meeting
December 7 - President's Cabinet Meeting
December 11 - Board of Visitor's Meeting

Proposed Program Brief

Proposal to create the Post-Professional Certificate in
Adult-Gerontology Acute Care Nurse Practitioner

Overview
Virginia Commonwealth University (VCU) requests approval of to create a 21-credit hour Post-Professional Certificate in Adult-Gerontology Acute Care Nurse Practitioner (AGACNP).

Adult-Gerontology Acute Care Nurse Practitioner certificate is designed to provide registered nurses (RN’s) with new skills and knowledge to care for individuals from adolescents to geriatrics with acute and chronic illnesses. Students will develop knowledge in the diagnosis and management of an illness. Students will learn to provide advanced nursing care to patients from adolescents to geriatrics. Graduates will be prepared to obtain a health history, conduct physical examinations, order and interpret diagnostic studies (e.g. lab tests, scans, x-rays), make a differential diagnosis, prepare a case management plan, prescribe medications and treatments, collaborate with physicians and other health professionals, and counsel patients on health behaviors and treatment options. Upon completion of the certificate program, graduates will be able to sit for the adult-gerontology acute care nurse practitioner certification, which is a prerequisite for Virginia state licensure application. Certification is offered by the American Nurses Certification Center (ANCC) and the American Association of Critical Care Nurses (AACN).

Method of Delivery
Traditional face-to-face classroom and web-based formats.

Target Implementation Date
Fall 2021

Target Population
The target audience consists of master’s or Doctor of Nursing Practice (D.N.P.) prepared licensed registered nurses who wish to gain new skills and knowledge for board certification to provide advanced practice care in their chosen certificate area.

Impact on Faculty
Full-time faculty in the School of Nursing will be the primary instructors in the proposed program and one of the faculty will serve as Program Director. No new positions will be created to initiate and sustain this certificate program.

Funding
Resources required to support the certificate program are met by existing resources to support current programs. These include student support services (enrollment, help desk, and library), faculty support services, and general administration (budgeting, forecasting, and enrollment management). The School of Nursing has adequate resources to initiate and sustain this certificate program.

Proposal to create the Post-Professional Certificate in Family Nurse Practitioner

**Overview**
Virginia Commonwealth University (VCU) requests approval to create a 21-credit hour Post-Professional Certificate in Family Nurse Practitioner (FNP).

The Family Nurse Practitioner certificate is designed to provide registered nurses (RN’s) with new skills and knowledge to care for individuals across the lifespan with common acute and chronic illnesses. The program will educate students in the concepts of health maintenance across the lifespan. Students will develop knowledge in the diagnosis of illnesses, and in the management of illness. Students will learn to provide advanced nursing care to patients from infancy to geriatrics. Graduates will be prepared to obtain a health history, conduct physical examinations, order and interpret diagnostic studies (e.g., lab tests, cans, x-rays), make a differential diagnosis, prepare a case management plan, prescribe medications and treatments, collaborate with physicians and other health professionals, and counsel patients on health behaviors and treatment options.

Upon completion of the certificate program, graduates will be able to sit for the family nurse practitioner certification, which is a prerequisite for Virginia state licensure application. Certification is offered by the American Nurses Certification Center (ANCC) and the American Academy of Nurse Practitioners (AANP).

**Method of Delivery**
Traditional face-to-face classroom and web-based formats.

Virginia Commonwealth University
Proposed Program Brief

Proposal to create the Post-Professional Certificate in Psychiatric Mental Health Nurse Practitioner

Overview
Virginia Commonwealth University (VCU) requests approval to create a 21-credit hour Post-Professional Certificate in Psychiatric Mental Health Nurse Practitioner.

The Psychiatric Mental Health Nurse Practitioner (PMHNP) certificate is designed to provide registered nurses (RN’s) with new skills and knowledge to care for individuals across the lifespan with common acute and chronic mental health illnesses. The program will educate students in the concepts of the maintenance of mental health across the lifespan. Students will develop knowledge in the diagnosis and management of mental health illnesses. Students will learn to provide advanced nursing care to patients from infancy to geriatrics. Graduates will be prepared to obtain a health history, conduct physical examinations, order and interpret diagnostic studies (e.g., lab tests), make differential diagnoses, prepare a case management plan, prescribe medications and treatments, provide psychotherapy, collaborate with physicians and other health professionals, and counsel patients on health behaviors and treatment options. Upon completion of the certificate program, graduates will be able to sit for the psychiatric mental health nurse practitioner certification, which is a prerequisite for Virginia state licensure application. Certification is offered by the American Nurses Certification Center (ANCC).

Virginia Commonwealth University
Proposed Program Brief

Proposal to modify the Master of Science in Human Genetics

Overview
The School of Medicine requests approval to modify the Master of Science (M.S.) degree program in Human Genetics. The modification includes a reduction in the total credit hours required for the degree from 59 credit hours to 36 credit hours. The reduction in credit hours will apply to the research requirement for the degree program. The proposed modified program will bring the total number of credit hours for the M.S. in Human Genetics into alignment with State Council of Higher Education for Virginia (SCHEV) peer institutions. The credit hour reduction will also yield a tuition savings to both part-time and full-time students of at least $3,502.

Method of Delivery
Traditional face-to-face classroom format.

Target Implementation Date
Fall 2021

External Competition
There are no public universities in Virginia that offer a similar degree program to the proposed modified M.S. in Human Genetics.

Impact on Existing Programs
The proposed program will not impact other programs offered by Virginia Commonwealth University.

Impact on Faculty
Faculty appointments in the M.S. degree program in Human Genetics are established by recommendation of the chair of the Department of Human and Molecular Genetics in consultation with the Graduate Program Director for the degree program. All courses will continue to be taught by faculty in the department.

Funding
No additional resources are needed for the proposed change. No new positions will be created as a result of the proposed change. The university has adequate resources to offer and sustain this certificate program.

Next Steps
October 29 - University Committee on Academic Affairs and University Policies (UCAAUP) Meeting
November 5 - University Council Meeting, University Student Commons
November 30 - President's Cabinet Meeting
December 11 - Board of Visitor's Meeting

Full Proposal

Proposal to Modify the Master of Science in Anatomy and Neurobiology

Overview
The School of Medicine requests approval to modify the Master of Science (M.S.) degree program in Anatomy and Neurobiology. The modification includes a reduction in the total credit hours required for the degree from 66 credit hours to 37 credit hours. The reduction in credit hours will apply to the research requirement for the degree program. The proposed modified program will bring the total number of credit hours for the M.S. in Anatomy and Neurobiology into alignment with similar thesis-based MS programs in the School of Medicine at VCU, in Virginia, and with State Council of Higher Education for Virginia (SCHEV) peer institutions. The credit hour reduction will also will yield a tuition savings to part-time students of up to $42,000.

Method of Delivery
Traditional face-to-face classroom format.

Target Implementation Date
Fall 2021

Impact on Existing Programs
The proposed program will not impact other programs offered by Virginia Commonwealth University.

Impact on Faculty
Faculty appointments in the M.S. degree program in Anatomy and Neurobiology are established by recommendation of the chair of the Department of Anatomy and Neurobiology in consultation with the Graduate Program Director for the degree program. All courses will continue to be taught by faculty in the department.

Funding
No additional resources are needed for the proposed change. No new positions will be created as a result of the proposed change. The university has adequate resources to offer and sustain this certificate program.

Next Steps
November 19 - University Committee on Academic Affairs and University Policies (UCAAUP) Meeting
December 3 - University Council Meeting

Proposal to modify the Master of Science in Biostatistics

Overview
The School of Medicine requests approval to modify the Master of Science (M.S.) degree program in Biostatistics. The modification includes a reduction in the total credit hours required for the degree from 42 credit hours to 33 credit hours and the addition on an online modality. The proposed modified program will bring the total number of credit hours for the M.S. in Biostatistics into alignment with similar thesis-based MS programs in the School of Medicine at VCU and with State Council of Higher Education for Virginia (SCHEV) peer institutions. The credit hour reduction will also will yield an annual tuition savings of $7,272 (in-state) and $14,211(out-of-state).

Method of Delivery
Traditional face-to-face classroom format.

Target Implementation Date
Fall 2021

Impact on Existing Programs
The proposed program will not impact other programs offered by Virginia Commonwealth University.

Impact on Faculty
Faculty appointments in the M.S. degree program in Biostatics are established by recommendation of the chair of the Department of Biostatistics in consultation with the Graduate Program Director for the degree program. All courses will continue to be taught by faculty in the department.

Funding
No additional resources are needed for the proposed change. No new positions will be created as a result of the proposed change. The university has adequate resources to offer and sustain this certificate program.

Next Steps
November 19 - University Committee on Academic Affairs and University Policies (UCAAUP) Meeting

</tbody>
</table>
Proposed Intent to Discontinue
Virginia Commonwealth University (VCU) requests approval to discontinue the Master of Science in Nurse Anesthesia (51.3804) degree program. The program is located in the College of Health Professions, Department of Nurse Anesthesia.

Background
The VCU College of Health Professions, Department of Nurse Anesthesia has offered the Master of Science in Nurse Anesthesia program since fall of 1979. In January 2015, the Council on Accreditation of Nurse Anesthesia Educational Programs, Standards for Accreditation of Nurse Anesthesia Programs\(^1\) mandated that all students accepted into accredited entry-level programs on or after January 1, 2022 must graduate with a doctoral degree. Admission to the program was suspended in summer 2019. In the fall 2019 faculty and administration agreed unanimously to discontinue the Master of Nurse Anesthesia degree program.

Rationale for Intent to Discontinue
The VCU College of Health Professions, Department of Nurse Anesthesia is seeking closure of the Master of Science in Nurse Anesthesia program to comply with accreditation standards of the Council on Accreditation of Nurse Anesthesia Educational Programs. The Master of Science in Nurse Anesthesia Program is no longer needed to meet the minimum requirements for licensure as a Certified Registered Nurse Anesthetist (CRNA) effective January 1, 2022.

Teach-Out Plan
No students are enrolled in the Master of Science in Nurse Anesthesia program. No teach-out plan is needed.

“Stopped Out” Students
Institutional records do not indicate that any students have “stopped out” of the certificate program. No plan is needed to notify students.

Proposal
Virginia Commonwealth University (VCU) requests approval to establish the Center for Biological Data Science within VCU Life Sciences.

Overview
The Center for the Study of Biological Complexity was initially established as research entity within VCU Life Sciences in 2001. The center has served as the unit responsible for the organization and running of the bioinformatics degree programs at VCU for 17 years. The purpose of the proposal is to establish the Center for Biological Data Science as an academic unit responsible for overseeing academic curricula in bioinformatics with the State Council of Higher Education for Virginia (SCHEV). The proposed Center for Biological Data Science will continue to support bioinformatics programming at the institution. Biological Data Science is a new and more forward-looking term than related older terms such as Computational Biology, Biostatistics, Biological Informatics, or Bioinformatics, and can be viewed as encompassing each of these in some form without carrying the historical baggage associated with these other names. Biological Data Science encompasses all of biology and the life sciences, not just the molecular or genetic subdisciplines, with which “informatics” is largely associated.

Impact on Existing Programs/Policies
There is no impact on existing programs and policies. The center has previously operated under the VCU Life Sciences academic policies and will continue to do so.

Impact on Faculty
There is no impact on faculty.

Funding
No additional expenses are required to implement the name change. Center administration, administrative support, faculty, and space will not be changed by the proposed name change.

Next Steps
November 19 - University Committee on Academic Affairs and University Policies (UCAAUP) Meeting
December 3 - University Council Meeting
December 7 - President's Cabinet Meeting
December 11 - Board of Visitors’ Meeting

Full Proposal

</tbody>
</table>
appropriate sanction for minor violations of the Honor System. On the whole, the committee believes FAR will enable greater faculty input while promoting outcomes that serve the pedagogical objectives of the course and the University.

- Changes in sanctions

This draft expands the menu of available sanctions to reflect the range of violations historically submitted to Student Conduct and Academic Integrity, alongside revisions made to the definitions of academic misconduct by this draft. The proposed menu of sanctions also aligns with the committee’s charge to enhance the educational role of the University’s Honor System.

- Changes in possible violations

Responding to input from Student Conduct and Academic Integrity and the university community, the committee revised the definitions of academic misconduct. These changes address concerns about clarity and scope so as to aid students and faculty in abiding by the Honor System as well as identifying misconduct when it occurs.

| 3. Which stakeholder offices or personnel have provided input into this policy draft? | Student Conduct and Academic Integrity |
| 4. Which other universities’ policies or resources (e.g., laws, regulations, etc.) did you consider when preparing this draft? | Student Code of Conduct |
| 5. What is your general assessment of this policy’s impact on the university community? | Academic integrity is one of the major underpinnings of the university’s mission. |
Honor System and Standards of Academic Conduct (Interim)

Policy Type: Administrative
Responsible Office: Student Conduct and Academic Integrity, Office of the Provost
Initial Policy Approved: 08/27/2016
Current Revision Approved: 07/29/2020

Policy Statement and Purpose

Academic honesty, truth and integrity are vitally important to advancing knowledge and promoting student success. All students and employees (including faculty) of the university must conduct themselves according to the highest standards of academic integrity. This is first achieved through education and awareness. Faculty, university and academic professionals, classified staff and students are expected to learn and understand the Honor System and Standards of Academic Conduct, promote awareness of its provisions, and proactively explain how the policy applies to their courses and activities. Students are expected to inquire about how to complete their work in order to conform with this policy.

This policy enumerates the types of academic misconduct that contradict the university’s values and detract from its shared objective of a high quality education. It defines the rights, obligations and processes that support a fair and effective Honor System. It also details what happens when allegations of misconduct arise, how allegations are investigated and resolved, and the range of possible sanctions for misconduct. The Honor System and Standards of Academic Conduct aims to ensure the fair resolution of allegations and the appropriate sanction of violations so as to hold students justly accountable, remedy the effects of misconduct, and encourage future behavior that meets the university’s standards of academic honesty, ethics and integrity.

This policy sets forth the university’s process for adjudicating allegations of academic misconduct, as established by the provost through the Division of Student Affairs. In addition to any sanction imposed under this policy, certain academic programs may determine that academic misconduct violates applicable technical or professional standards and take action accordingly. Students charged with academic misconduct under this policy are responsible for seeking guidance from their academic program about the potential application of any program standards to a particular violation in the event they are found responsible through this process.

Noncompliance with the Honor System and Standards of Academic Conduct may result in disciplinary action for students, university and academic professionals, classified staff or faculty. VCU supports an environment free from retaliation. Retaliation against anyone who brings forth a good faith concern, asks a
clarifying question, or participates in an investigation is prohibited by VCU policy in accordance with federal and state law.

This policy applies to all academic misconduct reported on or after the current approval date of this policy. Where the date of the academic misconduct precedes the current approval date of this policy, the definitions of academic misconduct in existence at the time of the alleged incident(s) will be used, and the procedures in this policy will govern the adjudication of any open matter involving academic misconduct. The university will provide specific written notice directly to each respondent of the procedures applicable to an open matter.

Who Should Know This Policy

All students and employees (including faculty) are responsible for knowing this policy and familiarizing themselves with its contents and provisions.

Definitions

This policy defines additional terms, including “academic misconduct,” in the applicable policy sections in order to aid in comprehension and avoid repetition.

Academic Integrity Administrator (“Administrator”)
The university official or designee who administers the Honor System for a particular case as authorized by the director of Student Conduct and Academic Integrity (SCAI).

Adviser
A person who has been asked by the respondent to attend any part of the adjudication process to provide support and assistance directly to the respondent but not to participate in the process on the respondent’s behalf.
Clear and Convincing Evidence
“Clear and convincing evidence is not as stringent a standard as proof beyond a reasonable doubt, as required in the criminal context, but is a degree of proof higher than a mere preponderance of the evidence. Clear and convincing evidence is that degree of proof that will produce a firm conviction or a firm belief as to the facts sought to be established.”¹ Under this policy, the facts sought to be established correspond to a charge of academic misconduct.

Director of Student Conduct and Academic Integrity ("Director")
The university official responsible for the administration of the Honor System and Standards of Academic Conduct, including the selection of members of the Honor Council, as authorized by the Senior Vice Provost for Student Affairs, or designee.

Expulsion
As used in this policy, termination of student status at the university.

Faculty
Designated VCU employee with principal and regularly assigned responsibilities that include a significant commitment to teaching that includes the development and delivery of the university curriculum for students enrolled at VCU and/or a significant commitment to original research and scholarship that includes the creation, dissemination and application of new knowledge and/or artistic expression.

Honor Council
The pool of students, faculty, university and academic professionals, and classified staff, who are selected, trained and authorized by the director or designee to serve on a Decision or Sanction Review Board and to determine whether a student has violated the Honor System and Standards of Academic Conduct and recommend sanctions, where appropriate.

Honor Council Decision Board ("Decision Board")
The panel of four Honor Council members selected by the director of SCAI or designee to determine whether a student has violated the Honor System and Standards of Academic Conduct and impose other sanctions, where appropriate. A Decision Board is comprised of: one undergraduate student; one graduate or professional student; one university and academic professional, classified staff or faculty member; and one non-voting chairperson (selected from any of these groups).

Honor Council Sanction Review Board ("Sanction Review Board")
The panel of three Honor Council members selected by the director of SCAI or designee to review the sanctions recommended by an administrator or a Decision Board for an individual respondent and modify, where appropriate. A Sanction Review Board is comprised of: one undergraduate student, one graduate or professional student, and one university and academic professional, classified staff or faculty member.

Honor Probation
A status in which a student is placed once there has been a finding that the student violated the Honor System and which increases the likelihood of a more severe sanction, including suspension or expulsion, for any subsequent violation.

Notification E-mail
The official university communication sent to the respondent via their VCU e-mail address informing them of the specific violation that has been charged and instructing them to contact the administrator to schedule a meeting.

Reporting Party
Any person who submits a report alleging that a student has violated the Honor System and Standards of Academic Conduct.

Respondent
Any student reported to have violated the Honor System and Standards of Academic Conduct.

Student
As used in this policy, any person enrolled in or applying to enroll in undergraduate, graduate, or professional courses at VCU, on a full-time or part-time basis, including any person who withdraws while adjudication of charges is pending or has been awarded a degree by VCU.

Suspension
As used in this policy, temporary loss of student status, including exclusion from classes and all university student privileges or activities, for a definite period of time. This may also involve a full ban from campus.

University and Academic Professionals
Employees who support the mission of the university in nonfaculty roles. This group includes salaried employees hired after July 1, 2016; those classified staff who have elected to participate in this employee group; and those who were formerly administrative and professional faculty.

University Official
Any person employed by the university, including faculty, university and academic professionals, and classified staff, who performs assigned administrative or professional responsibilities.

Contacts
SCAI officially interprets this policy and is responsible for obtaining approval through the appropriate governance structures for any revisions as required by the policy Creating and Maintaining Policies and Procedures. Please direct policy questions to the director of SCAI.

Policy Specifics and Procedures

I. Honor System Authority
The director of SCAI or designee will develop procedures for the administration of the Honor System and Standards of Academic Conduct, including procedural rules for conducting hearings. They will select the membership of the Honor Council and individual Decision Boards and Sanction Review Boards. They will appoint an administrator or board from among eligible Honor Council members to adjudicate matters as appropriate. If an appropriate board cannot be convened within a reasonable
period of time, the director will establish an ad hoc committee of appropriately trained students and employees (including faculty) of the university to adjudicate the matter. The director or designee is the final authority for questions involving interpretation or application of the Honor System and Standards of Academic Conduct.

II. Academic Misconduct

The academic misconduct prohibited by this policy includes the following conduct defined below: cheating, deception, exploitation, facilitation, plagiarism, sabotage, and stealing.

1. Cheating
Cheating is gaining or attempting to gain an unfair advantage in an academic exercise usually to avoid doing original work or to make up for lack of preparation. Examples of cheating include, but are not limited to:

   a. Copying or attempting to copy homework, evaluations, tests, exams or other academic materials without instructor approval and without acknowledging the help one has received

   b. Unauthorized collaboration on homework or other assignments

   c. Unauthorized possession of, or access to academic materials with the intent to gain an unfair advantage

   d. Submission of the same work for credit in two or more courses, or resubmission of work from previous semesters, without instructor approval

2. Deception
Deception is causing or attempting to cause someone to believe something that is not true. In an academic context, this includes, but is not limited to:

   a. **Falsification**: Inventing or altering without instructor permission any information, citations, data, quotations, statistics, attendance records, assignments or other academic endeavors. Other examples of falsification include, but are not limited to: signing attendance on behalf of oneself when one is not present; signing attendance on behalf of other students when they are not present; altering excuses for class attendance or assignments, including examinations; altering letters of permission; presenting invented or inappropriately changed data (for example, deleting outliers); inventing or altering clinical records; fabricating citations or quotations; or changing academic records or other documents without expressed permission.

   b. ** Forgery**: Imitating or counterfeiting of images, documents, signatures or similar documents and representing them as true. Forgery also includes the misrepresentation of credentials,
including but not limited to official academic documents, records, identifying documents, certifications or licenses.

c. **Grade Alteration**: Attempting to or successfully changing a grade to benefit an individual or individuals. Grade alteration also includes presenting without authorization an alternate or newly completed assignment in place of an already graded assignment in order to receive a different grade.

d. **Lying**: Making false statements, verbal or written, about academic matters, such as making false statements to justify missing class(es) or assignment(s), or knowingly providing false information in an academic integrity investigation.

e. **Omission**: Deliberately leaving relevant facts out of a full account of the truth in response to a direct question.

3. **Exploitation**
Exploitation is coercing another person to commit an act of academic misconduct, whether for their own benefit or the benefit of another person, through threats, intimidation, blackmail, extortion, bribery, offers of favors, or some other means.

4. **Facilitation**
Facilitation is providing assistance in committing or attempting to commit an act of academic misconduct, or providing resources that could be reasonably expected to lead to an act of academic misconduct. Facilitation can occur regardless of whether the facilitator gains an academic advantage. Examples of facilitation include, but are not limited to:

a. Unauthorized distribution or sharing of academic material in the form of hard copies, physical objects, digital files, or electronic materials. Other examples of facilitation include: contributing materials to online file-sharing services and question-and-answer websites; selling copies of exams or answer keys; selling papers or offering to write papers with the intent to sell them.

b. Allowing someone to copy ones work on an exam or other assignment.

c. Completing work for another VCU student(s), or student(s) in attendance at another educational institution. This includes, but is not limited to, taking an exam in someone else’s place.

5. **Plagiarism**
Plagiarism is falsely claiming ownership or misrepresenting the origins of work submitted for publication or an assignment. In other words, plagiarism occurs when an individual takes credit for work that is not their own without giving proper acknowledgement to the creator. Plagiarism can
include the uncited use of someone else’s words, ideas, facts, opinions, theories, illustrations, tables, figures, text, images, source code, and/or other intellectual work, even if the material is located in the public domain and can be freely shared.

6. **Sabotage**
   Sabotage is deliberately interfering or attempting to interfere with one or more students’ academic work through, but not limited to: tampering with, altering, damaging or destroying personal or institutional academic materials. Sabotage may also involve interfering with a learning experience including, but not limited to, obstructing or willfully disrupting class, laboratory, formal testing or examination times, proceedings or experiences, or other classroom or academic environments.

7. **Stealing**
   Stealing is deliberately taking or attempting to take, without permission, any form of academic property or material so as to permanently or temporarily deprive others of access or use.

### III. Rights and Responsibilities

1. **Shared Rights and Responsibilities of Students and Employees (including faculty) of the University**
   All students and employees (including faculty) of the university are required to:
   
   a. Adhere to the Honor System and Standards of Academic Conduct and its procedures.
   
   b. Report any suspicion or knowledge of possible violations of the Honor System and Standards of Academic Conduct.
   
   c. Answer truthfully during any part of the adjudication under the Honor System and Standards of Academic Conduct.
   
   d. Maintain appropriate confidentiality related to matters involving the Honor System and Standards of Academic Conduct.
   
   e. Refrain from harassing, pressuring, or intimidating any reporting party, respondent, or other party involved in a pending matter.

2. **Faculty, University and Academic Professionals, Classified Staff and Student Instructors**
   Faculty, university and academic professionals, classified staff and student instructors who oversee academic activities must discuss the Honor System and Standards of Academic Conduct and describe its requirements in course syllabi and/or other relevant materials. Faculty, university and academic professionals, classified staff and student instructors must report suspected violations to SCAI as provided in this policy. Pending resolution of the matter under this policy, the specific
assignment and remaining assignments must be administered, assessed or graded as if no violation of the Honor System and Standards of Academic Conduct has occurred and in accordance with relevant academic policies.

3. **Students**

   All students must know and understand the Honor System and Standards of Academic Conduct, particularly the types of misconduct prohibited by this policy. Students are expected to ask for clarification from their instructors if they are uncertain about how the Honor System and Standards of Academic Conduct impacts their work or the completion of an assignment. Students may also bring questions involving the interpretation and application of the Honor System and Standards of Academic Conduct to SCAI.

4. **Parties Involved in Resolution**

   a. Any respondent has a right to the following:

      i. Notice of any charges concerning the respondent, including the specific alleged violation and the source of any such allegation

      ii. Notice of possible sanctions for the alleged violation

      iii. The option to refrain from admitting responsibility for alleged violations of the Honor System and Standards of Academic Conduct

   b. Both reporting parties and respondents will have the opportunity to do the following:

      i. Present information germane to the allegation.

      ii. Provide witnesses.

      iii. Be accompanied by an adviser of their choice at their own time and expense during the adjudication process. Advisers are not permitted to speak or participate directly in the adjudication process unless authorized by the administrator or chairperson. It is the respondent’s responsibility to ensure that their advisor can attend any scheduled meetings or hearings. An adviser’s scheduling conflict is not a valid excuse to delay the resolution process.

   c. When alleged violations qualify for Faculty Administrative Resolution (FAR), the reporting party may also assume the responsibility of resolving allegations of misconduct, as detailed below. When this occurs, the rights of the reporting party and the respondent(s) are unaffected.
IV. Referral, Review, Investigation, and Resolution

1. Referral
   All students and employees (including faculty) are expected to actively monitor academic conduct and notify SCAI of potential misconduct. Apathy or acquiescence in the presence of academic misconduct is not permitted because it detracts from a community of trust and the quality of the educational experience. Furthermore, it is imperative to report observations of potential academic misconduct to ensure consistent response across courses and departments, fair resolution, appropriate consideration for repeated academic misconduct, and protection from unfounded allegations of misconduct.

   a. Self-Referral
      Students who believe they have committed an act or acts of academic misconduct may refer themselves in writing to SCAI. Though sanctions still apply to the act, or acts, of academic misconduct, a decision to self-refer will be taken into consideration when determining the severity of the sanction.

      Students may not self-refer if a third party has already brought an allegation of academic misconduct for the act or acts in question to the attention of the student or SCAI.

      A student reporting their own violation will be considered both the reporting party and the respondent.

   b. Standard Referral
      Anyone, including persons outside of the university community, may refer alleged violations of the Honor System and Standards of Academic Conduct to SCAI. The referral must clearly and precisely describe the alleged violation. SCAI encourages the reporting party to submit the referral within 30 calendar days of having substantial evidence of the alleged violation. Referrals submitted beyond 90 days from the date of discovery will generally be recorded by SCAI without further action unless the Senior Vice Provost for Student Affairs determines that the university must pursue the matter in order to protect the academic integrity of the university community.

      If a reporting party determines that their referral was improper at any time before the respondent is found responsible under this policy, they may inform SCAI of their belief and request withdrawal of the referral. SCAI will determine if the university will pursue the matter based on all available evidence and information provided by the reporting party, including their determination that the referral was improper.

2. Initial Review
   Upon receipt, the director of SCAI, or designee, will review the referral to determine whether there are grounds to proceed with an investigation and administrative resolution. If affirmative, SCAI will
send a notification e-mail to the respondent to make the respondent aware of the specific prohibited academic misconduct charged, describes the alleged acts constituting misconduct, specifies their rights and obligations and explains the next steps in the process. SCAI will thereafter provide all official correspondence to the respondent, even when involving FAR.

In the event the reporting party is a faculty member, SCAI will also confer with the reporting party to determine whether the allegation qualifies for FAR or a SAR, described below.

**The respondent must contact the appointed administrator or faculty member within five (5) business days of receiving the Notification Email to schedule a meeting with the administrator or faculty member.**

a. If the respondent fails to respond to the notice, does not schedule a meeting or does not attend the scheduled meeting, the resolution of the allegation will proceed without the benefit of their participation. Failure to respond to the notice may be deemed acceptance of any finding of responsibility as well as the corresponding sanction(s), with no right to invoke a Decision Board or a Sanction Review Board, as detailed by this policy.

b. The Honor System and Standards of Academic Conduct resolution process will proceed regardless of a respondent’s decision to discontinue attending a course or withdrawal from the course. A student should meet with an academic adviser to discuss the potential academic or enrollment consequences of a decision to discontinue attendance or withdrawing from a course in which the alleged violation has occurred.

3. **Investigation and Administrative Resolution**

   The university will presume that a respondent is not responsible for an alleged violation of the Honor System and Standards of Academic Conduct unless and until the university makes a determination through the adjudication process outlined in this policy, including a completed investigation, resolution, and any review by a Decision Board and/or Sanction Review Board. The university will find a respondent responsible for academic misconduct only if clear and convincing evidence shows that the student is responsible for the particular violation charged.

   VCU will not issue a degree to any student charged with violating the Honor System and Standards of Academic Conduct until an allegation has been completely investigated and resolved. SCAI will place a temporary administrative hold on the respondent’s record pending resolution and notify the graduation coordinator and the respondent’s school or college.

   The investigation and resolution of alleged academic misconduct violations will proceed according to one of the following processes:
a. **Faculty Administrative Resolution (FAR)**

   FAR enables greater faculty input and promotes outcomes that serve the pedagogical objectives of the course and the university. Through FAR, faculty may engage directly with respondents and determine an appropriate sanction for violations of the Honor System and Standards of Academic Conduct. FAR is designed for allegations that qualify for Class-A sanctions based upon the severity of the infraction and whether the respondent has a prior history of academic misconduct.

   FAR is limited to cases when the faculty member and the respondent agree to participate in FAR, the respondent does not have a prior history of academic misconduct, and SCAI determines during the initial review that a Class-A sanction would be appropriate for the alleged infraction. If these conditions are met, then the faculty member will complete the investigation and administrative resolution process as follows.

   The faculty member:

   i. Meets with the respondent to provide the respondent with the information that warranted the notice of allegations, and offer the opportunity for the respondent to address the allegations and provide additional information.

   ii. Determines whether the available information and statements provide clear and convincing evidence that the respondent violated the Honor System and Standards of Academic Conduct, or whether the matter can be closed without a finding of responsibility. In the event the faculty member finds the respondent responsible, the faculty member will also recommend an appropriate Class-A sanction(s), at which point they will notify SCAI.

   SCAI will support the faculty member during this process by sending any and all written and electronic communications regarding the referral, investigation and resolution to the respondent. This includes contacting the respondent to arrange the meeting described in IV.3.a.i, as well as notification of findings and sanctions, where appropriate. In the event the sanction requires a change of grade on an assignment or a new opportunity to complete the assignment (or comparable alternative), then the faculty member must also provide documentation of the change of grade or assignment completion to SCAI.

b. **Student Conduct and Academic Integrity Administrative Resolution (SAR)**

   If the reported violation qualifies for a Class-B sanction based upon its severity, if the respondent has a prior history of academic misconduct, or if the faculty member or respondent declines to participate in FAR, then SCAI completes the investigation and administrative resolution process as follows.
SCAI:

i. Investigates the allegations detailed in the notice and examines all available information provided by the reporting party and witnesses, where applicable. SCAI will also offer to meet with the respondent to provide them with the information that warranted the notice of charges, and an opportunity to address the allegations and provide additional information.

ii. Determines whether the available information and statements provide clear and convincing evidence that the respondent violated the Honor System and Standards of Academic Conduct, or whether the matter can be closed without a finding of responsibility. In the event the respondent is found responsible, SCAI will also recommend an appropriate sanction or sanctions.

Upon conclusion of either FAR or SAR, the director of SCAI, or designee, will review the finding and recommended sanction(s), where applicable, for compliance with VCU policies and notify the respondent in writing within five (5) business days of the decision.

The respondent may either agree with the administrative resolution (3.a.ii or 3.b.ii) or request a Decision Board or Sanction Review Board, where appropriate (described below). By agreeing with the administrative resolution, the respondent acknowledges responsibility for the violation and accepts the sanctions. This outcome cannot be appealed, and the adjudication process is complete. If the respondent challenges the finding of responsibility, a Decision Board will review the matter. If the respondent challenges the assigned sanction(s), a Sanction Review Board will review the sanction(s) only.

If no violation is found, the administrator will notify the respondent that the university will take no action concerning the allegations. SCAI will then remove the temporary administrative hold, where applicable, and notify the graduation coordinator and the respondent’s school or college, if necessary.

The respondent may challenge an administrative resolution before the Honor Council in one of two respects: the respondent may dispute the finding of responsible for violating the Honor System and Standards of Academic Conduct; or, the respondent may dispute the sanctions. **Any challenge of an administrative resolution must be submitted to SCAI in writing within five (5) business days of the date of notification of the outcome of the administrative resolution.**

a. A challenge to the finding of responsible will be heard by a **Decision Board**. Decision Boards review the information that warranted the allegation of academic misconduct and arrive at a decision regarding responsibility. Decision Boards may uphold the initial administrative findings, reject the initial findings or uphold some and reject some initial findings, where a
respondent was charged with multiple violations. Further, if a Decision Board determines that the reported allegations do not constitute the particular violation charged but may constitute another violation of the policy, the Decision Board may refer the matter to SCAI to initiate new charges.

If a Decision Board upholds the initial finding of responsible, the sanctions assigned by administrative resolution remain in effect.

**Decision Board Procedures**

i. Decision Boards proceed as follows:

1. Introductions and explanation of procedural rules by the chairperson

2. Introductory statements and presentation of any evidence, information, and witnesses by participants in the following order: the administrator, the reporting party, and the respondent

3. Questions from the Decision Board to the administrator, the reporting party, the respondent and witnesses, where applicable

4. Closing statements by participants in the following order: the administrator, the reporting party, and the respondent

ii. The following rules of decorum govern Decision Boards:

1. *All participants* will treat each other with respect and common courtesy. It is vital that Decision Boards preserve a collegial and educational tone that encourages sharing information, honest responses to questions and careful consideration of the case at hand. In the event of personal attacks and/or aggressive, adversarial questioning, the chairperson will intervene and may impose restrictions on further participation to preserve effective communication, including requiring parties to submit additional questions and/or responses in writing.

2. Direct questions from anyone other than a member of the Decision Board to the reporting party, the administrator, witnesses or a member of the Decision Board are at the discretion of the chairperson.

3. If a member of the Decision Board becomes aware of new information about the alleged offense(s), they must provide it to the director of SCAI or designee prior to the hearing. If the director or designee determines the new information is relevant to the
Decision Board’s deliberations, they will then ensure the respondent has the opportunity to review and respond to it.

4. The chairperson of the Decision Board is the final arbiter of all procedural questions.

5. There will be a single verbatim record of the Decision Board hearing, excluding deliberations. The record shall be the property of the university.

iii. After the hearing, the Decision Board will hold a closed-session, confidential deliberation to determine if clear and convincing evidence shows the respondent violated the Honor System and Standards of Academic Conduct. In the case of multiple alleged violations, the Decision Board shall determine if clear and convincing evidence shows the respondent is responsible for each individual violation. Establishing the respondent violated the Honor System and Standards of Academic Conduct requires the majority vote of at least two of the three voting members of the Decision Board. If the Decision Board finds the respondent responsible for the violation(s), the Decision Board will either confirm or amend sanctions in accordance with IV.4.a.

b. **Sanction Review Boards** review challenges to sanctions assigned through administrative resolution and, where appropriate, as a result of a Decision Board. Sanction Review Boards do not have the authority to review findings of responsibility; furthermore, requesting review by a Sanction Review Board constitutes an acknowledgement of responsibility by the respondent. Challenges to sanctions must be made in writing and articulate a compelling reason why the assigned sanctions are disproportionate to the offense.

Upon the receipt of a notification to challenge any sanction, SCAI will schedule a Sanction Review Board.

**Sanction Review Board Procedures**

i. The Sanction Review Board will review any written statements concerning the sanctions submitted by the respondent, administrator, and the reporting party.

ii. Based upon review of the written documentation, statements and case file, the Sanction Review Board will decide, by a majority vote, whether to uphold or amend the sanction(s) proposed by the administrator. The Sanction Review Board will determine the most appropriate sanction(s), which may be more or less severe than that assigned by administrative resolution.

iii. After its review, either board will notify the director of SCAI of the board’s recommendation. The director will review the board’s recommendation and notify the respondent and school
officials, as needed, of the university’s decision within five (5) business days of the board’s review.

V. Sanctions
In support of its educational mission, the university imposes sanctions for academic misconduct designed to educate a respondent about avoiding future academic misconduct, hold them individually accountable for their prior misconduct, remedy the effects of prior misconduct and deter other students from committing academic misconduct. Sanctions may include educational, restorative, rehabilitative, and punitive components.

In keeping with the university’s commitment to foster an environment of academic integrity, this policy authorizes the administrator, Decision Boards and Sanction Review Boards to tailor sanctions to the facts and circumstances of each case, including the nature of the misconduct and the context in which it occurred, consistent with training and guidance provided by SCAI. The recommendation of appropriate sanction(s) may depend on the following factors, which are not relevant to the underlying finding that the respondent is responsible for the alleged misconduct:

- The severity, persistence, or pervasiveness of the academic misconduct
- The impact of the academic misconduct on the community
- Prior academic misconduct and compliance with previous sanctions
- Any other reasonable mitigating or aggravating factors

The minimum sanction for a violation of the Honor System and Standards of Academic Conduct is Honor Probation lasting one year. An administrator, Decision Board or Sanction Review Board may lengthen the period of Honor Probation and/or assign additional sanctions, where appropriate, from the following menu.

Class-A Sanctions:
- Grade of ‘0’ on an assignment if academic misconduct influenced originally-assigned grade
- A grade reduction on the assignment if the academic misconduct influenced only a portion of the assignment grade
- A new opportunity to complete the assignment or a comparable alternative

Class-A Sanctions automatically include Honor Probation lasting for a minimum of one year and a maximum of three years (or until graduation, whichever comes first). Class-A Sanctions do not result in a notation on the respondent’s transcript.

Any grade of ‘0’ assigned for a test, paper, or other assignment shall be factored into the course grade, and not be dropped or replaced even if the applicable course syllabus generally permits dropping or replacing such a grade.
Class-B Sanctions:
- A grade of ‘F’ in the course
- Suspension
- Expulsion

Class-B Sanctions result in a notation on the respondent’s transcript. For suspension and expulsion, the transcript notation is permanent. For a grade of ‘F’ in the course, the transcript notation shall appear for a period of three (3) years. In addition, a grade of ‘F’ in the course that results from a sanction may not be voided in any way, including by withdrawal from a course or from VCU, use of the Historical Repeat Course Option, or through the Grade Appeal Procedure.

Respondents may apply to the Senior Vice Provost for Student Affairs, or designee, to have any transcript notation period reduced due to compelling mitigating circumstances. With the exception of expulsion, Class-B Sanctions automatically include Honor Probation, which will remain in effect until the respondent has completed their current degree program. If a respondent’s degree program is interrupted, including by suspension, then Honor Probation will continue upon re-enrollment until completion of their degree program.

Additional Education Requirements:
An administrator, Decision Board or Sanction Review Board may also assign additional education requirements supplemental to Class-A and Class-B sanctions. Additional education requirements are intended to prevent recurrence of misconduct by helping respondents with personal and ethical decision-making in accordance with the Honor System and Standards of Academic Conduct. Examples of additional education requirements include RAMS L.E.A.D and Writing with Integrity.

Sanctions for Violations while on Honor Probation:
Honor Probation is a mandatory sanction for any violation of the Honor System and Standards of Academic Conduct. SCAI maintains a record of students on Honor Probation. If a student on Honor Probation is found responsible for a subsequent violation, the sanction shall generally be Suspension in the first instance, or Expulsion in the second instance.

Other Possible Consequences and Outcomes:
Sanctions affecting a respondent’s academic record (such as a grade change for an assignment or course) may have additional consequences for the respondent’s academic status, such as lowering of a cumulative grade point average, loss of a graduate assistantship, and dismissal from an academic program.

Violations of the Honor Code and Standards of Academic Conduct may also lead to outcomes beyond the sanctions assigned by SCAI and in accordance with other university policies and procedures. These outcomes may include:
● **Termination** or **suspension** of university employment or assistantships
● **Academic consequences**, including suspension or dismissal, under applicable technical or professional standards of an academic program
● **Recommendation of revocation of a degree or certificate**, such as when a violation invalidates a degree requirement

**VI. Records**

Records of sanctions and other information related to academic integrity adjudication processes are part of the education record of the respondent and are generally protected from release to third parties under applicable state and federal law, including the federal Family Educational Rights and Privacy Act (FERPA), and VCU’s policy *Release of the Educational Record of a Dependent Student*. SCAI will provide notice as needed to university officials with a legitimate educational interest in knowing that particular information. This notice will include those officials responsible for implementing sanctions that change a respondent’s grade or academic record.

SCAI routinely receives requests for student disciplinary history from other institutions of higher education where a student seeks to enroll or from potential employers. However, SCAI generally provides student records in response to such requests only if authorized by the individual respondent whose records are requested or as required by law, such as in response to a lawfully issued subpoena or court order. SCAI will provide confirmation of a transcript notation that involves a respondent’s disciplinary history and disclose other information, as needed, consistent with FERPA’s requirements for protecting student privacy, to other institutions of higher education where a student seeks to enroll.

All records shall be maintained with sufficient safeguards to ensure confidentiality. An annual summary report of all cases, with identifying information removed, shall be made available upon request. De-identified cases and composite data will serve the purpose of honor education for the university community.

All records related to honor proceedings will be kept or destroyed in accordance with the Library of Virginia Records and Retention Disposition Schedule.

**VII. Regular Review of the Honor System and Standards of Academic Conduct**

All Honor Council members participate in annual training on topics related to confidentiality and adjudication procedures.

The director of SCAI will oversee a regular review of the Honor System and Standards of Academic Conduct. The director will also administer and review regular surveys of reporting parties and

FAQ

1. Is this policy the only policy that governs academic conduct at VCU?

   Certain academic programs have technical or professional standards that govern the conduct of students in those programs. These academic programs may take additional action if a student is found responsible for violating the university’s Honor System and Standards of Academic Conduct and if that finding is evidence of a violation of applicable technical or professional standards. Academic programs that impose technical or professional standards on student conduct may include, but are not limited to, dentistry, medicine, nursing, pharmacy, social work, and others. Students are responsible for knowing the standards that govern their conduct and seeking guidance from their academic programs on the potential application of those standards if a student is found responsible for academic misconduct under this policy.
2. Are students able to report violations to Student Conduct and Academic Integrity? Is it anonymous? What happens after a student reports a violation?
   If a student is aware of a violation, then they should report the violation to SCAI using the Academic Integrity Reporting Form. They should try to remember as much as they can about the nature of the violation so the information they provide is clear and precise. Students cannot submit a report anonymously because SCAI will need to contact them about the violation they witnessed. If a student has a question about whether they should report a violation or how to report a violation, they can find additional information on the website for SCAI, including ways to contact the office directly.

After a student reports a violation, their involvement in the resolution of the allegation(s) is limited to serving as a witness. They will not receive additional information about the resolution of the allegation due to university policies regarding information privacy.

3. Are students able to ask members of the faculty to submit violations on their behalf?
   A student who is aware of a violation or believes a violation may have taken place may ask a member of the faculty to submit a violation on their behalf. They should provide the faculty member with as much information as possible about the nature of the violation because the faculty member will have to complete a detailed report of the incident. Though the student will not be identified as the reporting party, they will be a witness and, as a result, may be contacted by SCAI when the allegation is investigated.

4. Is there a pledge I should include on submitted work?
   The following pledge applies to EVERY examination, paper, or academic exercise:

   “On my honor, I pledge that I am in compliance with the VCU Honor System and Standards of Academic Conduct.”

   Neither the presence nor the absence of a signed pledge statement shall exempt a student from the requirements of the Honor System.

5. Do I need to actually sign the pledge by hand on my work?
   No. Pledges may be acknowledged digitally in addition to being signed by hand. For example, it is acceptable to type the pledge followed by your name or initials.

6. What kinds of Honor Code violations qualify for FAR?
   A primary consideration is whether a respondent would remain part of the class in question if the respondent is found responsible. FAR is therefore limited to allegations that qualify for Class-A sanctions based upon the severity of the infraction and if the respondent does not have a prior history of academic misconduct.
7. **Who decides if an alleged violation is appropriate for FAR?**
SCAI decides if an alleged violation is appropriate for FAR based upon their close familiarity and experience with the Honor System and Standards of Academic Conduct. SCAI will take account of the nature of the alleged violation as compared to other violations where other, more severe sanctions applied. SCAI will also take account of faculty assessment of the severity of the alleged violation in addition to whether the respondent has a history of prior academic misconduct. If a respondent has a history of prior academic misconduct, then SCAI will conduct the investigation and resolution of the alleged violation.

8. **Can a student opt out of FAR and choose Administrative Resolution conducted by SCAI?**
Yes, both faculty and students must agree to FAR, if it is offered. Should either the student or the faculty member opt out, then SCAI will conduct the investigation and resolution of the alleged violation.

9. **Does SCAI influence the outcome of FAR?**
The director of SCAI, or a designee, will review the outcomes of FAR for compliance with VCU policies, but the responsibility to conclude FAR falls upon the faculty member.

10. **For Class-A Sanctions, who determines the length of Honor Probation?**
The length of Honor Probation for Class-A Sanctions is determined by the administrator based upon the severity of the violation and in consideration of other similar violations that have been previously resolved. Decision Boards and Sanction Review Boards may also determine the length of Honor Probation when alleged violations are submitted for additional review.

11. **What happens if someone is found responsible for academic misconduct while on Probation?**
According to Section V - Sanctions under Policy Specifics and Procedures, respondents who are found responsible for academic misconduct while on Honor Probation may be suspended or expelled from the university.

12. **Can members of a Decision Board also serve on a Sanction Review Board for the same alleged violation?**
No. Sanction Review Boards are always chosen from members of the Honor Council who have not previously participated in the investigation, resolution, and/or Decision Boards for the alleged violation under consideration. No individual serves as a decision-maker at more than one stage of the adjudication process for a particular charge.
13. Are respondents able to attend Sanction Review Boards?  
No. Sanction Review Boards do not meet with a respondent in person. Instead, the board considers only written evidence, including the reasons why a respondent has asked for sanctions to be reviewed.

14. Can a respondent request a Decision Board and a Sanction Review Board?  
Not at the same time. Respondents may request a Decision Board when they do not agree with the finding of responsibility. Sanction Review Boards, however, consider sanctions only when responsibility is no longer disputed. A respondent cannot, therefore, request both at the same time. A respondent can, however, request a Sanction Review Board after a Decision Board has delivered its findings because responsibility is no longer open to dispute.

15. Can a respondent ask a Decision Board to review sanctions and a finding of responsibility?  
No. Respondents are able to request a Decision Board when they disagree with the finding of responsibility. Therefore, they must present a case to the Decision Board that explains why they are not actually responsible for an alleged violation. Respondents can only challenge a sanction when they accept responsibility for the violation.

16. What are my rights under a Decision Board hearing? Can I bring someone along?  
Respondents may present relevant information to the alleged violation and explain why they disagree with the finding of responsible. Respondents may bring an adviser of their choice, such as for moral support, but the adviser is not allowed to participate in the hearing on the respondent’s behalf.

In the event English is not the respondent’s first language, the respondent may ask to bring a translator who may assist the respondent in communicating. However, SCAI will require the respondent to participate directly in all stages of the process. SCAI may also arrange for a translator if the respondent is unable to provide one or if a translator is deemed beneficial.

17. Are witnesses able to provide information about alleged offenses?  
Yes, witnesses may provide information on behalf of the reporting party or the respondent about an alleged offense during administrative resolution and Decision Boards.

18. Who is eligible to serve on the Honor Council?  
Undergraduate, graduate and professional students, university and academic professionals, classified staff and members of the faculty may serve on the Honor Council after completing the required training.
19. Is it a violation of the Honor System to take extra time on an exam or an assignment without permission from the instructor?
It depends. Taking extra time on an exam or an assignment without permission is a form of cheating because it leads to an unfair advantage. However, students with disabilities may register with SAEO in order to receive accommodations that include extra time.

20. Is it a violation of the Honor System to use a file-sharing or a question-and-answer website?
Yes, depending on the circumstances. Sometimes instructors may encourage the use of online resources like file-sharing or question-and-answer websites, but when an instructor has not given express permission to use these sites, students should be cautious about their use and check with faculty first. In general, websites that enable students to break the rules should be avoided, even if this is not what you intend.

21. The policy explains unauthorized possession of or access to academic materials is a form of cheating. What are examples of academic materials?
Examples of academic materials include, but are not limited to: answer keys, grading rubrics, old exams, old assignments, question banks and laboratory reports.

22. What are examples of “mitigating circumstances” that might justify having a transcript notation period reduced?
A respondent can apply to the Senior Vice Provost for Student Affairs, or designee, to have any transcript notation period reduced for “mitigating circumstances”. Examples include academic achievement, no additional misconduct, demonstration of remorse and/or lessons learned, and letters of support from a program or faculty.

Acknowledgements
This Honor System has drawn material from Edward N. Stoner’s and John Wesley Lowery’s A Twenty-First Century Model Student Code of Conduct and a review of other universities’ policies, including Boston University; Carnegie Mellon University; Duke University; George Mason University; Georgia Institute of Technology (Georgia Tech); College of William & Mary; University of Colorado, Boulder; University of Maryland; University of Massachusetts, Boston; University of New Hampshire; University of Virginia; and Virginia Polytechnic Institute and State University (Virginia Tech).
EXECUTIVE SUMMARY OF PROPOSED POLICY: Additional sources of academic credit

New Policy ☐ or Substantive Revision ☒
Policy Type: Board of Visitors
Responsible Office: Office of the Provost
Draft Date: 06/06/2019
Initial Policy Approved: MM/DD/YYYY
Revision History: 11/10/2016

Governance Process Tracking:
If new BOV policy, enter date and name of President (or designee) approving development of policy: MM/DD/YYYY – Name
If new Administrative policy, enter date and name of President’s Cabinet member approving development of policy: MM/DD/YYYY

Integrity & Compliance Office Review: 07/03/2019
University Counsel Review: 01/09/2020
Public Comment Posting: 02/14/2020
University Council Academic Affairs and University Policy Committee Review: 02/27/2020
University Council Review: 03/05/2020
President’s Cabinet Approval: 03/09/2020
Board of Visitors Approval (if applicable): MM/DD/YYYY

1. Why is this policy being created ☐ or revised ☒?
The former policy needed to clarify the roles/responsibilities and steps for VCU stakeholders involved in reviewing and approving additional sources of academic credit.

2. New policy ☐: What are the general points or requirements covered in this policy?
Revised policy ☒: What are the substantive differences between this draft and the current policy?
The revision significantly clarified all language, added explicit steps in the specifics and procedures section and included FAQ.

<th>Question</th>
<th>Response</th>
</tr>
</thead>
<tbody>
<tr>
<td>3. Which stakeholder offices or personnel have provided input into this policy draft?</td>
<td>Office of the Provost</td>
</tr>
<tr>
<td>4. Which other universities’ policies or resources (e.g., laws, regulations, etc.) did you consider when preparing this draft?</td>
<td>Virginia Tech; UVa; William &amp; Mary</td>
</tr>
<tr>
<td>5. What is your general assessment of this policy’s impact on the university community?</td>
<td>This policy’s impact on the university community is significant as it codifies the process of how credit coming from “additional sources” should be determined and awarded to incoming students.</td>
</tr>
</tbody>
</table>
Policy Statement and Purpose

In support of increased student access and lower student costs, Virginia Commonwealth University awards course credit and advanced standing for additional sources of academic credit with qualifying scores or grades. Additional sources of academic credit include Advanced Placement (AP), Cambridge Advanced (A/AS), College Level Examination Program (CLEP), International Baccalaureate (IB), military service credit recommended by the American Council on Education (ACE) and the DANTES Subject Standardized Test Program (DSST). The purpose of this policy is to establish procedures for approving, reviewing and awarding additional sources of academic credit, while ensuring university compliance with the Code of Virginia §23.1-906 and the State Council of Higher Education for Virginia (SCHEV) Virginia Public Higher Education Policy on Course Credit for AP, Cambridge, CLEP, and IB (March, 2016).

The VCU Board of Visitors reviews and approves any new additional source of academic credit before course credit can be awarded from that source. The Board of Visitors does not review and approve specific examinations or course equivalences within additional sources, as this is the responsibility of the VCU faculty.

VCU faculty determines the standards for awarding course credit from Board of Visitors-approved additional sources. Faculty is responsible for ensuring the credit awarded from additional sources is comparable to a specific VCU course(s), aligned with the VCU course learning outcomes and consistent with the university’s mission.

For quality assurance, the university conducts two types of review of the VCU Transfer Tables: new examinations and periodic comprehensive review.

The VCU Transfer Center coordinates with faculty in academic departments, the University Undergraduate Curriculum Committee (UUCC), the Bulletin Editor, the Office of the Provost and the Board of Visitors, as needed, in order to publish VCU Transfer Tables in the Undergraduate Bulletin containing the faculty-determined course equivalencies.
Noncompliance with this policy may result in disciplinary action up to and including termination. VCU supports an environment free from retaliation. Retaliation against any employee who brings forth a good faith concern, asks a clarifying question, or participates in an investigation is prohibited.

Who Should Know This Policy

All university members responsible for reviewing additional sources of academic credit and/or awarding credit to students are responsible for knowing this policy and familiarizing themselves with its contents and provisions.

Definitions

Advanced Placement
Advanced Placement (AP) is a program created by the College Board which offers college level curricula and examinations to high school students.

Cambridge Advanced
The Cambridge Advanced is either a one-year (AS-level) or two-year (A-level) educational program for high school students that culminate with final examinations.

College Level Examination Program
The College Level Examination Program (CLEP) is a group of standardized tests created and administered by College Board. The tests assess college-level knowledge in many subject areas.

DANTES Subject Standardized Test Program
The Defense Activity for Non-Traditional Education Support (DANTES) agency is a Department of Defense agency that provides opportunities for service members and veterans to earn credit by means of DANTES Subject Standardized Test Program (DSST) examinations. The DSST program is an extensive series of examinations in college subject areas that are comparable to the final or end-of-course examinations in undergraduate courses.
**International Baccalaureate**
The International Baccalaureate (IB) diploma program is a two-year educational program for high school students that culminates with final examinations. The examinations consist of two levels: the standard level (SL) and higher level (HL).

**Military Service Credit**
College credit awarded for military experiences and training as recorded on the Joint Service Transcript based on faculty review of recommendations from the American Council on Education (ACE).

**VCU Transfer Tables**
The VCU Transfer Tables indicate the name of the examination, required minimum score or grade on the examination, VCU course equivalent and number of credits awarded.

**Contacts**
The Office of the Provost officially interprets this policy. The Office of the Provost is responsible for obtaining approval for any revisions as required by the policy *Creating and Maintaining Policies and Procedures* through the appropriate governance structures. Please direct policy questions to the Office of the Provost, senior vice provost for academic affairs.

**Policy Specifics and Procedures**
VCU requires two types of review to ensure the quality and relevance of academic credit awarded from additional sources.

1. **Review of New Examinations**

Before accepting scores for any examination(s) not currently listed on the VCU Transfer Tables, the university reviews subject curricula and learning outcome(s).

**Step One:** The VCU Transfer Center initiates a departmental faculty review of the subject curricula and learning outcome(s). The departmental faculty reviewers determine the standards for awarding academic credit for additional sources of academic credit in accordance the guidelines in SCHEV’s *Virginia Public Higher Education Policy on Course Credit for AP, Cambridge, CLEP, and IB*. The departmental faculty reviewers review the subject curricula and learning outcomes, subject examinations, grade distributions and marking schemes provided by the examination agencies. After reviewing such materials and drawing comparisons with a specific VCU course(s), departmental faculty reviewers decide what credit, if any, is to be awarded based upon comparability. Departmental faculty reviewers verify such decisions through feedback provided from student performance in more advanced related courses at VCU.

**Step Two:** The VCU Transfer Center submits the results of the departmental faculty review, with proposed changes to the transfer tables in the Undergraduate Bulletin, to the UUCC for approval. The UUCC acts as a check and balance to ensure alignment with the university mission, learning outcomes and curricular comparability.
Step Three: Following UUCC approval, the VCU Transfer Center coordinates with the Bulletin Editor to update the credit transfer tables in the VCU Undergraduate Bulletin. The VCU Transfer Center also reports any changes to the transfer tables to the State Council of High Education for Virginia.

2. Periodic Comprehensive Review

The university conducts a comprehensive review of the VCU transfer tables every three years. The VCU Transfer Center works with the Office of the Provost to initiate the review process with each academic discipline represented on the transfer tables. The VCU Transfer Center collects and submits the results of the comprehensive departmental review, complete with updated transfer tables, to the UUCC for review and approval. Once approved by the UUCC, the VCU Transfer Center updates the State Council of Higher Education for Virginia of any changes to the transfer tables.

Role of VCU Board of Visitors

The UUCC and VCU Transfer Center reports UUCC approval of new sources of academic credit to the VCU Board of Visitors for final review and approval.

Forms

There are no forms associated with this policy and procedures.

Related Documents

1. The Undergraduate Bulletin section on “Additional sources of academic credit,” including transfer tables, is available at: http://bulletin.vcu.edu/undergraduate/undergraduate-study/admission-university/additional-sources-of-credit/.

Revision History

This policy supersedes the following archived policies:
1. **What is an example of an additional source of academic credit?**
   Currently, additional sources of academic credit include Advanced Placement, Cambridge Advanced, College Level Examination Program, International Baccalaureate, military service credit recommended by the American Council on Education and the DANTES Subject Standardized Test Program.

2. **What is an example of a “new examination” that might be reviewed and approved by faculty for inclusion on the VCU transfer tables?**
   An example would be a specific IB subject examination (e.g., IB Language A: Literature and Performance). The Board of Visitors has already approved IB examinations as an additional source of academic credit, but the faculty may not have reviewed and approved scores for all available IB subjects. Award of credit for new subject scores requires approval by the UUCC, but does not require BOV approval.

3. **What is the process for posting credits on the VCU transcript?**
   Upon receipt of an official record or transcript, the VCU Transfer Center will evaluate the exam scores or grades according to the transfer tables to determine whether the student is eligible to receive credit. The Transfer Center will then post the equivalent course and the number of credits onto the student’s VCU transcript.

4. **Are there any limits on the number of credits earned through this policy that students can apply to their degree at VCU?**
   Students may not apply more than 54 CLEP credits to their degree at VCU (https://clc.vcu.edu/campus-testing-center/clep/). VCU does not place limits on credits earned from other sources outlined in this policy.
Provost Report

VCU Board of Visitors
Academic and Health Affairs Committee
Dec 11, 2020
Gail Hackett, Ph.D.
Provost and Senior Vice President for Academic Affairs
Fall 2020 Course Sections by Modality and Enrollment

Total Sections = 8,392
- 36.0% (n=3,022) In Person
- 46.7% (n=3,917) Online
- 12.1% (n=1,013) Hybrid
- 5.2% (n=440) Blended

Total Course Enrollment = 131,353
- 66.9% (n=87,912) In Person
- 17.0% (n=22,265) Online
- 11.5% (n=15,129) Hybrid
- 4.6% (n=6,047) Blended
Not surprisingly, some VCU students reported less favorable experiences

- Freshmen and sophomore students
- First-generation
  - First-generation students living on-campus reported much more favorable experiences with online/remote instruction
- Pell-eligible
  - Pell-eligible students living on-campus reported slightly more favorable sentiment than those living off-campus

Student perceptions about online/remote instruction appeared relatively consistent and favorable across racial/ethnic groups and gender.

CA 2020-06, September 28, 2020
VCU faculty have displayed flexibility and compassion for students during this difficult semester.

Early alerts and midterm grades provided meaningful advising interactions to better support and guide students.

**Early Alerts**
- 5,732 early alerts provided to students

**Midterm Grades**
- 78,469 midterm grades submitted in fall 2020
- 82.2% of undergraduate courses provided midterm grades – the highest submission rate in VCU history!
Faculty demonstrated flexibility in quickly learning a new Learning Management System as VCU transitions from the use of Blackboard to Canvas.

For Fall 2020 courses were delivered via:

- Blackboard – 30% of all sections
- Canvas – 70% of all sections
Faculty continued to work hard on curriculum reform. In Fall 2020, a total of 168 degree programs were revised in preparation of the new General Education requirements.

Faculty continued to prepare for academic program review (22 programs under review).

640 faculty have participated in one of the writing retreats or writing workshops in Fall 2020 sponsored by the Center for Teaching and Learning Excellence.

Website resources were created and faculty development sessions were held to help faculty prepare for the Fall 2020 political elections.

Website resources were created and faculty development sessions were held to help faculty develop antiracism curriculum and develop culturally relevant pedagogy.

Faculty development and celebrations moved online: new faculty orientation, training program for new department chairs, training program for new deans, monthly Faculty Club, Promotion and Tenure Celebration (recognizing 182 promoted/tenured faculty members), monthly professional development sessions for department chairs,

64 VCU faculty and staff enrolled in the Recruitment Inclusive Champions training program designed to provide guidance to search committees for hiring a talented and diverse faculty.
A different student experience but just as valuable
A different student experience but just as valuable

**Weeks of Welcome**
(first four weeks of the semester)

- 116 events
- Events intended to 89% overall satisfaction rating
- Survey respondents reported higher levels of a sense of belonging and community as a result of attending events

**Recreation Sports**

- 69,040 visits
  - 5,277 unique visitors
- Outdoor Adventure Trips: 105 participants
- Virtual Escape Room program: 108 participants
- Group Exercise Program - 789 participants
- eSports - 95 participants
- Intramurals (in person) - 298 participants

**Leadership Development**

- Leaders UnLeashed Conference, a one-day leadership conference hosted by VCU LEAD.
  - 159 participants

  “The conference as a whole was really valuable. Since COVID has started, I have not felt connected with a large group of people until this conference.” - Caleb Rivera

**“The Well”**
Health Promotion and Well-Being Center

- Podcasts
- Delivery of 397 Very Caring University COVID Care Kits to students in isolation/quarantine
- Development of Very Caring University COVID-19 Learning Module for COVID violations
  - 214 students
- Guided meditations and mindfulness stress reduction programs offered
Would like to applaud VCU 😊. My daughter was tested for Covid yesterday, had to spend the day and night in isolation. Her results came back negative this morning, thankfully. Thank you to VCU health services that tested her, the staff that helped her gather the things she would need for a possible quarantine, and the food service group. FaceTimed with her last night. GRC III looked really clean, and the food looked pretty good. It’s also great how they were attentive to her roommates.

- From Parent Facebook Page post
Student mental health continues to be of great concern

- Anxiety and stress presented as top concerns
- University Counseling sees students within week of request for assistance
  - 3,857 attended overall appointments
  - Individual appointments up 15%
  - Crisis appointments down 87%
  - Offer COVID support groups
- Faculty supported flexible new policies and guidelines for Fall 2020
Other Actions Taken to Support Students’ Mental Health and Success

Faculty supported flexible new policies and guidelines for Fall 2020
• Revised academic calendar with truncated semester and short final exam week
• Extension of course withdrawal period
• Revised pass/fail grading policy
• New student absence guidelines
• Alternative course evaluation questions
• Final Exams 3 in 24 accommodation – new final exams guidelines
• Temporary suspension of academic standing for struggling students

Regular communication to faculty and students
Spring 2021 Expectations and Plans

• Academic Calendar Adjustments
  • Delayed first day of class: Jan 25
  • Spring break eliminated
    • Several reading days added

• Continue to improve quality of online courses
  • Faculty development/workshops

• Instructional Flexibility
  • anticipating impact of COVID surge

VCU Career Readiness: A Holistic Model for Success

VCU Board of Visitors, December 2020
Gail Hackett, Ph.D.
Provost and Senior Vice President for Academic Affairs

“Colleges that embrace the [career readiness] challenge can help blunt the worst effects of disruptions and secure the economic future of millions of people and the nation as a whole.”

Goldy Blumenstock, Career-Ready Education: What's Ahead
“Think of both the real experiential value and the marketability of a graduate who leaves college with a degree plus demonstrable long-term projects, real work experience and an industry-recognized credential. It’s a serious triple-threat that will dramatically improve the real and perceived value proposition of higher education for students, parents, employers and taxpayers. It will go a long way toward eliminating the greatest critique of higher education today which is the belief that graduates are not well prepared for the workplace.”

- Brandon Busteed, College Should Produce Triple-Threat Graduates, April 28, 2020, Forbes
National Challenge to Career Readiness

- Existing barriers:
  - Information inequity
  - Financial insecurity
  - Disconnection between academic studies and knowledge of career options

- Barriers have a disproportionate impact on first-generation and Pell-eligible students.

- VCU has developed a holistic and innovative approach to addressing these barriers.

Degree-seeking undergraduates, Fall 2020

54% Minority
32% Pell-eligible
34% First Generation (incoming cohort only)
62% Female
38% Male

Source: Census 2 data. Excludes Qatar.
What do VCU students need to be career ready?

VCU students need a student-centered, holistic, customizable experience:

- **Brightly lit educational pathways** connecting classroom experiences to career exploration.
- **Community** invested in their success and a comprehensive experience that reinforces real-world skills valued by employers.
- **Campus infrastructure** to support collaboration, innovations in programming, and analytics to develop new models for work-based learning.
- **Strategic action** to address socio-economic disparities by providing **financial support** and building **social capital**.
CAREER ADVISING: Career exploration, major selection or change, job search or graduate program application support, training campus career champions (faculty/staff advisors)

CO-CURRICULAR ENGAGEMENT: Undergraduate research, study abroad, service learning, clubs and organizations, campus leadership and involvement, federal work-study

CURRICULAR ENGAGEMENT: Career development courses, internship courses, co-op, University College career minor

UNIVERSITY SUPPORT & INFRASTRUCTURE: REAL academic regulation, funding for experiential learning, data and resources on internships/experiential learning and graduate outcomes, administrative support structures, and career audit.
Curricular Engagement

• **Current curricular career readiness efforts and opportunities include:** General education redesign; career development and planning courses; embedded internship and practicum courses; digital credentialing; College of Engineering Co-Op program.

• **Efforts and opportunities that will be implemented in Fall 2021:** “College to Career” SCHEV grant; REAL undergraduate graduation requirement; University College’s new Interdisciplinary Career Readiness Skills (ICRS) Minor.

VCU General Education learning outcomes align with the competencies employers desire in college graduates.
VCU offers introductory topic-based Student Success courses (UNIV courses) that lead to greater retention. Approximately 92% of these courses have topics that focus on career exploration, initial competency development, or REAL experience exposure.
Co-Curricular Engagement
(Listed in developmental order to mirror the pillars of major maps, which guide students through progressive experiences to prepare them for life after college.)

• **Campus life**: Living-learning communities; student leadership experiences; clubs and organizations

• **REAL high impact practices**: Undergraduate research (largest on and off-campus Federal Work-Study employer Fall 2020); service learning; study abroad (23% increase in participation from 2014-2019)

• **Work-based learning**: Federal Work-Study; internships with employers across industries; micro-internships; project-based work; shadowing opportunities
We’ve invested in technology to increase student access and opportunity, and we’re gaining a clearer picture of student behavior and demand.

The most searched for experiences on the Student Opportunity Center platform were internships, research, volunteering, and study abroad. Search terms indicate financial need and geographic region are important factors.

3,000 searches since August 2020

380 unique search terms used since August 2020. A number were combinations (Study Abroad + Internship + Research) indicating that students are looking for tailored experiences.

3,118 students enrolled in service-learning courses in the 2019-2020 academic year, a 3.5% increase over the year prior. (Source: Institutional Research Service Learning Analysis)

From the 2018-2019 to 2019-2020 fiscal year, the following increases were noted in VCU’s Handshake platform

64% increase in the number of internships posted

21% increase in the number of student applications submitted
We now have baseline data to utilize when evaluating progress.

According to the 2019 VCU First Destination Survey, graduating seniors reported:

- **56%** participated in internships while at VCU. These students were 16% more likely to be employed full-time within six months.
- **81%** engaged in experiential learning while at VCU.

As a result of strategic collaborations, streamlined processes, and investment:

- **768** students placed in Federal Work-Study positions in FY20. VCU maximized federal funds (nearly $2M) for students in need of assistance, a **23% increase** in FWS student placements from FY19.

(Source: VCU Student Financial Services)

- **200K** pageviews of the major maps, in FY20, a **167% increase** from FY19, which is when transfer maps were added to major maps.

(Source: Google Analytics)
Career Advising

• **Career Advice & Mentorship:** Career service offices provide advising, programming, career fairs and networking, career development courses, internship support; the Career Leadership Council provides thought leadership and campus-wide collaboration for engaging faculty and developing campus career champions.

• **Access & Opportunity:** The VCU First Destination Survey informs diversity, equity & inclusion efforts, including specialized programs (Lumina grant-funded Men of Color Initiative), gap analysis, and staff training.

• **Professional Connections & Mentorship:** VCUAlumni created VCULink to inspire networking and flash mentoring between students and alumni. The platform now houses all mentoring programs.
Since 2014, we’ve closed the gap in quality of academic advising experienced between freshmen and seniors, and we’ve dramatically improved our advising strength with students on career-related and high impact practice topics.

National Survey of Student Engagement (NSSE) administered in Spring 2020. Survey responses on a five-point scale.

Students can design their own experience that reflects their individuality.

While our career readiness model is designed to serve everyone, we know gaps exist.

As our efforts evolve, we must remain vigilant and proactively address disparities in access, opportunity, and participation.
VCU Career Readiness Priorities

REAL Experience
(internships, practicum, undergraduate research, study abroad, etc.)

REAL undergraduate graduation requirement was approved November 2020 and will be implemented in Fall 2021.

Outcomes survey

Increase participation rates from 54% to 65% and analyze employment at education level by May 2021. Improve placement outcomes (employed full-time and continuing education) to comparable to all R1 institutions by 2025.

Advising & Support

Launch first-of-its-kind career audit by 2023.

Major Maps

Automate for building plans by 2024.

Graduation

Reduce debt by 2025.
Achieve Career Readiness Priorities while Addressing Social and Economic Mobility

We must invest in the future so VCU students can invent their futures. To ensure all students have access and opportunity to cultivate the skills they need, **VCU needs targeted investments in:**

**Bolstering initiatives** with demonstrated impact, including student success courses, high impact practices, and lower career advisor to student ratios.

**Providing funding** to students who want and need to engage in internships and experiential learning but are unlikely to have access without direct support.

**Developing new curricular learning models** based on workforce demands, in partnership with faculty, community, and industry partners.

**Measuring, monitoring, and promoting** experiential learning and career readiness through set metrics, streamlined processes, and innovative systems.

**Securing internal and external resources** through leaning into our strengths as educational leaders in actively promoting diversity, equity, and inclusion.
Questions?
Report to Board of Visitors

December 11, 2020

Dr. Darcy Mays, Faculty Athletics Representative
Chair, Department of Statistical Sciences and Operations Research
College of Humanities and Sciences
All NCAA Division I institutions are eligible for an Academic Unit, money distributed to conferences and allocated to institutions in accordance with conference policies.

The funds are distributed from Division I basketball revenue based on academic performance as opposed to only participation and advancement in the NCAA Men’s Basketball Tournament.
There are three ways for an institution to earn an Academic Unit, they must satisfy at least one of the following:

1. The Graduation Success Rate for the most recently available year is equal to or greater than 90% based on the single-year rate of all student-athletes at the individual level. The current cohort year is 2014-15.

2. The difference between the student-athlete and student body percentages in the most recently published Federal Graduation Rate is equal to or greater than 13 percentage points. The current cohort year is 2014-15.

3. Division I Academic Progress Rate (APR) for the previous year is equal to or greater than 985. Calculated as the average of single-year APR for all teams. The current cohort year is 2019-20.

So how does VCU stack up?
1. The Graduation Success Rate for the most recently available year is equal to or greater than 90% based on the single-year rate of all student-athletes at the individual level. The current cohort year is 2014-15.

For 2014-15, the Graduation Success Rate was 92%, so this requirement is met.
2. **The difference between the student-athlete and student body percentages in the most recently published Federal Graduation Rate is equal to or greater than 13 percentage points. The current cohort year is 2014-15.**

For 2014-15 cohort, the difference between the student-athlete Federal Graduation Rate and the student body Federal Graduation Rate is -11%. So this requirement is not met.
3. Division I Academic Progress Rate (APR) for the previous year is equal to or greater than 985. Calculated as the average of single-year APR for all teams. The current cohort year is 2019-20.

For 2019-20, VCU has 15 teams. Averaging the APR’s of the 15 teams, average APR = 989. This requirement is met.

Processed Grade Changes

Each month, I receive the number of grade changes for all VCU students, and a detailed report of the grade changes for student athletes.

From the student athlete report, I can track the number of grade changes per team, and by course/discipline.

From all the data, I can track the percentage of all grade changes that are for student athletes.

Processed Grade Changes

There are no patterns by team or by course that are of concern.

By team, the largest numbers are women’s track (32), men’s track (26), men’s soccer (18), men’s cross-country (16), lacrosse (14) and women’s soccer (14). These are mostly the teams with the largest squad sizes.

By team, the lowest numbers are men’s tennis (3), women’s tennis (3), golf (4) and men’s basketball (5). These are mostly the teams with the smallest squad sizes.
Faculty Senate
2020 Fall Semester Report

Faculty at VCU have performed exceptionally well for our students during these COVID-19 times. They have moved courses to remote or online instruction, they have adjusted procedures in labs and studios, and they have even taken on extra courses in order to accommodate the fewer-than-normal limits on student enrollment per course section due to social distancing requirements. All of this has occurred while still maintaining the high-quality of instruction and mentorship that VCU is accustomed to. Of course, many of our faculty have also been dealing with the extra burden of caring for family and friends and working with children who have been at home instead of in school each day.

All of this work by our faculty has been performed out of a sense of duty and responsibility and not for any extra compensation or reward. However, there have been costs to faculty activity related to COVID-19 consequences. Faculty research has been stunted or stalled in some cases due to priority for resources to go towards COVID-19 related projects (some of which have been under the direction of our outstanding faculty). Time that would have otherwise been spent on academic pursuits in labs, studios, etc. has been spent with students ensuring their success or spent caring for others in need (or caring for themselves). Because of this, Faculty Senate is taking a pro-active stance towards ensuring that Annual Faculty Performance Reviews are adjusted/modified accordingly. Faculty Senate is collaborating with the Faculty Affairs committee of University Council to seek support from schools, colleges, and departments in adopting evaluation practices that recognize the impact of COVID-19 on faculty and their workloads. In addition, we have been in discussions with the Provost’s Office regarding adjustments to the 6-year tenure clock to protect our faculty during this time and provide them with reasonable extensions, when requested, to enable our tenure track faculty to grow and thrive as is expected of them. We have been encouraged by the support received from units across the University and look forward to when such efforts will no longer be needed.

At the September 2020 Board of Visitors meeting, we reported that one of our 2020-2021 Faculty Senate goals is to “learn about, develop, and engage in concrete anti-racist work at both individual and collective levels to support our students, faculty, and staff, and to promote real and lasting change.” Earlier this semester, an interdisciplinary group of students from across the University presented a proposal for a course on racism and racial injustice to be added to the VCU General Education curriculum as a required course for all students. At our last Faculty Senate meeting, we passed the following statement of support:

"We endorse the CORE/SAG proposal for the required course on racism as a well-conceived, thoughtful, faculty and student led effort to confront systemic racism at the university level. We
see efforts like this as both a core component of faculty governance, and the academic freedom of the collective faculty to shape and adapt the general curriculum of our university. While we understand that there may be institutional hurdles and important administrative details to work through, we welcome the Faculty Senate’s involvement in this important initiative.”

Finally, we would be remiss if we did not make mention of Provost Gail Hackett’s announcement of her retirement after this academic year. Faculty Senate has enjoyed a strong working relationship with Dr. Hackett, and although at times we did not agree, we always were able to have a collegial discussion on matters and no one ever departed without a clear understanding and acceptance of each other’s position. This mutual respect has been greatly appreciated, and it is something that we hope can continue with the next provost. We would also like to thank President Michael Rao for including Faculty Senate President Nancy Jallo and myself on the search committee for the next provost. Dr. Rao’s charge to the search committee was inspirational and motivational, and we look forward to the important work ahead of us during this search.

On behalf of Nancy Jallo and myself, we thank the Board for their time receiving our report.

Presented to the Academic and Health Affairs Committee of the VCU Board of Visitors on Friday, December 11, 2020.

W. Scott Street IV, PhD  
Faculty Representative to the Board of Visitors

Nancy Jallo, Ph.D., RNC, FNP-BC, WHNP-BC, CNS, FAAN  
Faculty Senate President and Alternate Faculty Representative to the Board of Visitors
By: Saher Randhawa – President – VCU Staff Senate
staffsenate.vcu.edu

The Fall 2020 semester has kept Staff Senate busy with various committee’s and planning for events during the Spring 2021 semester. Currently members are serving on committee’s all across VCU; from Safety & Well-Being, to University Council, to serving as members of various hiring committee’s such as the Provost search, and many, many more. Staff Senate also held a virtual event with the Virginia Retirement System (VRS) on information and options for staff on their retirement. Staff Senate has held monthly full-senate meetings with various guest speakers across the university from departments such as: human resources, VCU Police, community engagement, career development, and more. The following are the committee’s that Staff Senator’s serve on within Staff Senate and the goals and projects they’ve been working on:

**Accessibility & Inclusion Working Group (AaIWG):**

AaIWG focused its efforts on supporting policy initiatives in the calendar year 2020. We partnered with Crystal Coombes and the Accessibility Policy Review Workgroup to recommend community-identified policy changes, support policy benchmarking with peer universities, and offer material support to the committee.

AaIWG serves on the following committees to provide staff-centric concerns and perspectives, as well as support accessibility on campus:

- Accessibility Policy Review Workgroup
- Physical Accessibility Workgroup
- Web Accessibility Team

Additionally, AaIWG developed multiple resources for staff:

- Staff Accompaniment - in collaboration with the ADA office, AaIWG is working to develop and offer trained accompaniment for employees who request a knowledgeable staff companion to initial ADA meetings. We created this resource in response to high levels of anxiety experienced by staff as they approach the ADA process and to advocate for VCU processes (which we have great deal of faith and confidence in)
- Employee FAQs to benefit understanding of ADA processes (to be included in final policy version)
- Updated our website to provide additional resources and a confidential contact point for staff

Lastly, AaIWG formally recognized Crystal Coombes, VCU’s ADA/504 Coordinator, for her principled leadership and effective administration of ADA during the immensely difficult COVID-19 crisis.

Moving forward, we hope to celebrate October as National Disability Employment Awareness month, which we could not this year due to COVID, partner with HR to support university disability employment initiatives, continue partnering with the ADA office, and collaborate with university administrators and leaders to support employee access to established university processes through accompaniment and similar initiatives.
Awards & Recognition Committee:

- Currently working on planning various employee appreciation events for Employee Appreciation Month (previous employee appreciation week) in March 2021. Events will possibly include partnerships with local venues such as Lewis Ginter, the VMFA and more to hold socially distanced ticketed events for employees to enjoy throughout the month of March after work or on the weekends. Discounts will also be offered with vendors on campus and local vendors around campus, such as local food establishments. More information may be found here: https://staffsenate.vcu.edu/employee-appreciation-week/.

- We are also gearing up to start the nomination process for the annual Staff Senate Award for Excellence that are given by staff to staff in the categories of: new employee, integrity, staff advocacy, champion of diversity and inclusion and career achievement. This year we will also be adding the Customer Service Award that will go to those that show extraordinary customer service in their roles. There is an award winner for each campus in each category. More information may be found here: https://staffsenate.vcu.edu/awards/.

Career Development Committee:

- This committee is partnering with VCU Human Resources to put on the annual Career Development Conference which takes place during employee appreciation month. This year the fully virtual conference will be spread out throughout the month to offer flexibility for staff to attend sessions that are most convenient. The theme for this year’s conference will be ‘Together We Transform’, focusing on career/professional development, diversity and inclusion and job skills growth and training. Each week will focus on an area of the conference such as diversity and inclusion, and we will have an internal keynote speaker kick off the week with the theme. Sessions during that week will emulate the theme of the conference and the focus of the week.

Shared Governance Committee:

In the 2019-20 academic year, the shared governance committee retooled the Senate constitution to accommodate the HR redesign and lay the groundwork for our first elections. This year the committee is focused on implementing the mechanics of that election, according to the following timeline:

- Currently: drafting elections info page for Staff Senate website (this will be important to link to in later communications)
- Have HR pull meta-unit report to determine number of senators in each: Spring 2021.
- Formally open the field for nominations: 6/1/2021
- Nomination deadline: 6/25/2021
- Redcap poll open for voting: 7/19 - 7/30

VCU Health Committee:

- This is a new committee and currently it is focusing on establishing a relationship with the new VCU Health CEO, Dr. Art Kellerman, and finding ways to collaborate with VCU Health leadership to bring both campuses and staff together to serve the university as one.
- The mission of the VCUH Staff Senate committee seeks to strengthen the relationship between the staff, University, and VCU Health System; increasing transparency by collaborating with key stakeholders on decision making that impact VCU Health System team members.

| Total enrollment       | Source: IPEDS  
Total men and women enrolled for credit in the fall of the academic year.  

2009-10 (FY10) = Fall 2009 enrollment  
2016-17 (FY17) = Fall 2016 enrollment  
2017-18 (FY18) = Fall 2017 enrollment  
2018-19 (FY19) = Fall 2018 enrollment  
2019-20 (FY20) = Fall 2019 enrollment  
2020-21 (FY21) = Fall 2020 enrollment (Preliminary from internal data based on IPEDS methodology. Will be converted to official release in Feb 2021)  

Credit - Recognition of attendance or performance in an instructional activity (course or program) that can be applied by a recipient toward the requirements for a degree, diploma, certificate, or other formal award.  

Note: Enrollment reported is of the institution's official fall reporting date or October 15.                                                                                           |
| UG enrollment          | Source: IPEDS  
Total undergraduate men and women enrolled for credit in the fall of the academic year.  

See Total Enrollment definition, for enrollment years mapped to FY.  

Credit - same as above  

Undergraduate - A student enrolled in a 4- or 5-year bachelor's degree program, an associate's degree program, or a vocational or technical program below the baccalaureate.                                                                                                                                                                                                                   |
| Freshmen OS Enrollment | Source IPEDS (Collections started in Fall 2012)  
Number of first-time degree/certificate seeking undergraduate students who reside from a different state than that of the institution.  

See Total Enrollment definition, for enrollment years mapped to FY.  

Out-of-state enrollment = US state not in the institution's state and not a foreign country  

First-time student (undergraduate degree/certificate seeking) A student who has no prior postsecondary experience (except as noted below) attending any institution for the first time at the undergraduate level. This includes students enrolled in academic or occupational programs. It also includes students enrolled in the fall term who attended college for the first time in the prior summer term, and students who entered with advanced standing (college credits earned before graduation from high school). Student is enrolled in courses for credit and recognized by the institution as seeking a degree, certificate, or other formal award. High school students also enrolled in postsecondary courses for credit are not considered degree/certificate-seeking.  

State of residence - the state identified by the student as his/her permanent address at the time of application to the institution. This may be the legal residence of a parent or guardian, or the state in which a student has a driver's license or is registered to vote. It is not necessarily the state in which the student's high school is located.                                                                                       |

| Continuing Education after          | Students who responded as Employed Full-Time, Employed Part Time, Continuing Education, or Seeking Further Education are included in this percentage.  |
| Graduation                           | The survey is administered to all students identified as graduating at the end of the semester in which the survey is administered. Survey is open for six months after graduation and above seven email reminders throughout the six months.  |
### All UG Debt at Graduation

Source: Common Data Set (Section H5)

The number of students in the undergraduate class who started at your institution as first-time students and received a bachelor's degree in the fiscal year (July to June). Exclude students who transferred into your institution. The “Average per-undergraduate-borrower cumulative principal borrowed,” is designed to provide better information about student borrowing from federal and nonfederal (institutional, state, commercial) sources. Any loan program: Federal Perkins, Federal Stafford Subsidized and Unsubsidized, institutional, state, private loans that your institution is aware of, etc. Include both Federal Direct Student Loans and Federal Family Education Loans.

- 2009-10 (FY10) = Not available
- 2016-17 (FY17) = UG who started as first-time students and received a degree between July 1, 2016 and June 30, 2017
- 2017-18 (FY18) = UG who started as first-time students and received a degree between July 1, 2017 and June 30, 2018
- 2018-19 (FY19) = UG who started as first-time students and received a degree between July 1, 2018 and June 30, 2019
- 2019-20 (FY20) = UG who started as first-time students and received a degree between July 1, 2019 and June 30, 2020

Common Data Set 2019-20 submission which has 2018-19 degree data - USF, USC, UAB, GMU, UVA and VATEch

### UG Student to Faculty Ratio

Source: US News uses IPEDS

Total FTE students not in graduate or professional programs divided by total FTE instructional staff not teaching in graduate or professional programs.

Graduate or first-professional programs such as medicine, law, veterinary, dentistry, social work, or public health, in which students are enrolled or faculty teach are excluded from both full-time and part-time counts.

- **Total FTE students**: the number of full-time students plus 1/3 the number of part-time students (Fall enrollment component).
- **Total FTE instructional staff**: the number of full-time instructional staff to 1/3 the number of part-time instructional staff (Human Resource Component, EAP section).

Instructional staff - include employees whose primary function/occupational activity is primarily instruction or instruction/research/public service and are not medical school employees.

### Faculty Compensation Rank

Source: US News

The average faculty pay and benefits are adjusted for regional differences in cost of living. This includes full-time assistant, associate and full-time professors. A two-year average salary is computed (for example for the 2019-20 rank the years 2017-18 and 2018-19 academic years were used). The regional differences in cost of living are taken from the latest update to the Regional Price Parities by State and Metro Area indexes from the U.S. Department of Commerce’s Bureau of Economic Analysis (BEA).

Higher average faculty salaries after adjusting for regional cost of living, score better than lower average faculty salaries in the rankings.

### FT Instructional with Faculty Status

Source: IPEDS

Number of instructional staff with faculty status (Tenured, on tenure track, not on tenure tack/no tenure system) as of November 1. Includes Medical school staff.

- 2009-10 (FY10) = Fall 2009
- 2016-17 (FY17) = Fall 2016
- 2017-18 (FY18) = Fall 2017
- 2018-19 (FY19) = Fall 2018
- 2019-20 (FY20) = Fall 2019
- 2020-21 (FY21) = Fall 2020 (Preliminary from internal data based on IPEDS methodology. Will be converted to official release in Feb 2021)

**Instructional Staff** - An occupational category that is comprised of staff who are either: 1) Primarily Instruction or 2) Instruction combined with research and/or public service. The intent of the Instructional Staff category is to include all individuals whose primary occupation includes instruction at the institution.

Instructional Faculty is defined as those members of the instructional-research staff whose major regular assignment is instruction, including those with released time for research.

**Full-time staff (employees)** - As defined by the institution. The type of appointment at the snapshot date determines whether an employee is full-time or part-time. The employee's term of contract is not considered in making the determination of full- or part-time.

**Faculty status** - designated by the institution according to the institution's policies. The IPEDS HR survey includes the ranks of Professor, Associate Professor, Assistant Professor, Instructor, and Lecturer.
<table>
<thead>
<tr>
<th>Metric</th>
<th>Description</th>
</tr>
</thead>
</table>
| Minority FT Faculty                        | Source: IPEDS  
Same as above  
Minority - American Indian or Alaska Native, Asian, Black or African American, Hispanic or Latino, Native Hawaiian or Other Pacific Islander, Two or more races. |
| Faculty Turnover Rate                      | Source: IRDS  
The number of faculty terminations divided by the average T&R faculty headcount. The average faculty headcount is the average of the Fall Census II faculty headcount and the previous Fall Census II faculty headcount. The year represents the ending Fall year.  
For example, a rate in the 2014 column defines Fall 2013 to Fall 2014 turnover of faculty. |
| Educational expenditure per student        | Source: US News  
Financial resources are measured by the average spending per full-time-equivalent student on instruction, research, public service, academic support, student services and institutional support during the latest two fiscal years (for example, for the 2019-20 rank, 2017 and 2018 fiscal years were used).  
Higher average expenditures per student, score better than lower expenditures in the ranking model.  
Full-time equivalent - The number of full-time students plus one-third the number of part-time students. |
| Top 100 US News ranked programs            | Source: US News  
These numbers include programs and specialties Graduate Programs  
VCU academic programs that rank in the top 100. |
| Academic Programs                          | Source: IPEDS  
The number of programs (measured in contact or clock hours) are offered at your institution.  
Program - A combination of courses and related activities organized for the attainment of broad educational objectives as described by the institution.  
Contact Hour - A unit of measure that represents an hour of scheduled instruction given to students. Also referred to as clock hour |
| Federal Research Awards                    | Source: VCU Internal  
Funds (in millions) that have been obligated by an agency or organization for a particular sponsored project or NIH related.  
Usually released in October. |
| Federal Research Expenditures              | Source: HERD Survey  
The total amount of R&D expenditures reported to the NSF in their annual Higher Education and Research Development (HERD) survey. |
| Invention Disclosers                       | Source: OVPRI (Innovation Gateway office.)  
Invention disclosure forms are a summarized data sheet of the inventions created by VCU faculty and staff. These forms contain multiple questions that include a summary of the invention, funding sources, inventors who have contributed towards the creation of the invention, upcoming publications, etc. All of this information is docketed and used to generate patent applications with the inventor's input, as well as, keep a detailed record of university generated inventions.  
Usually released soon after June 30th. |
DATA INTEGRITY

Program progressing successfully

Bars / challenges encountered that may have an impact on issue resolution or implementation. Executive Council to resolve challenge.

Significant challenge encountered; will require decision from Executive Leadership Team to resolve

Note: Due to our past successful projects, namely the Data Portal (data.vcu.edu), Data Steward Toolkit, and the new Data Governance website, DIMC will now lead the effort to build a data warehouse for VCU. DIMC has acquired executive approval and is currently working on a project plan toward a successful launch in mid 2021.

DATA SECURITY (number of security incidents / breaches)

No data breaches have occurred or seem likely to occur; security risks are well understood and being mitigated; resources viewed as aligned with threat and risk environment

No breach has occurred, but minor security incidents or near-misses have occurred; significant audit findings have occurred but are being mitigated; some overload or barriers / challenges encountered that may require adjustment or reallocation of resources

Significant breach requiring notification has occurred or conditions exist where significant barriers/challenges are likely to produce unacceptably high levels of risk

VCU continues to detect and respond to security incidents primarily involving targeted phishing scams, human errors that could potentially expose data, and occasional malware infections. There are currently no signs of compromise or malicious activities specifically targeting VCU.

In order to further reduce potential vulnerabilities and mitigate the risk of cyber-attacks, progress continues to be made in removing legacy technology such as Windows 7 in the University environment. Increased patching capabilities and continuous monitoring of the threat environment have allowed VCU to quickly respond to several critical security vulnerabilities over this year. However, an elevated risk related to continued teleworking is still present, as network-level defenses typically cannot be extended to homes of employees.

ERM PROGRAM

Status of ERM mitigation plans
The ERM Steering Committee met in February and December of 2020. Due to COVID-19 response a significant portion of the staff of Safety and Risk Management have been re-assigned to providing support for that effort. The other two required meetings were not held as a result. One December 8, 2020 the ERM Steering Committee met to discuss and review our Emergency Response protocols. Specifically, the committee's intention was to review our infectious disease protocols. The University’s Comprehensive Emergency Management Plan has been updated to include lessons learned from our current COVID response.

**PLANNED AUDIT STATUS**

**PLANNED AUDITS** (status of audits - planned and unplanned to available resources)

- Progressing as planned and within overall budget
- Some overload or barriers / challenges encountered that may require adjustment or reallocation of resources to resolve
- Significant overload or barriers / challenges encountered resulting in major delays or changes to scheduled work plan

**SPECIAL PROJECTS** (status of special projects - planned and unplanned to available resources)

**INSTITUTIONAL COMPLIANCE PROGRAM**

**Compliance requirements compared to known material violations**

**Compliance Program Oversight & Effectiveness**

- No known material noncompliance; or ownership and accountability for compliance risks are established and operating at explicitly or implicitly approved levels of risk tolerance or appetite
- Challenges encountered that have an impact on visibility, verification, strategy implementation or resolution
- Significant challenges to institutional compliance strategy or resolution encountered

**Notes:** There are no known material compliance violations as related to regulatory, legal or university policies.

Within Audit and Compliance Services, Audit and Management Services (AMS) is responsible for providing internal audit services to both the Virginia Commonwealth University (VCU) and VCU Health System. The department has identified the International Professional Practices Framework (IPPF) as its conceptual framework. The IPPF represents authoritative guidance by the Institute of Internal Auditors (IIA) and mandates conformance with the following elements.

- Core Principles for the Professional Practice of Internal Auditing
- Definition of Internal Auditing
- Code of Ethics
- *International Standards for the Professional Practice of Internal Auditing (Standards)*

AMS maintains a quality assurance and improvement program to provide continual evaluation of conformance with the IPPF, to assess the efficiency and effectiveness of the internal audit activity and to identify opportunities for improvement. This evaluation is done through internal and external assessments.

Internal assessments of the AMS internal audits are conducted through ongoing monitoring by the audit management team as part of their supervisory review and through periodic self-assessments by the Special Projects and Quality Assessment Coordinator. A summary of the most recent periodic self-assessment review is provided on the following page.

An external quality assessment report (dated October 2019) was issued by Dixon Hughes Goodman LLP and presented to the board in December 2019. The highest rating of generally conforms was received. As stipulated by the *Standards*, the next external assessment is due in four years or 2024. External quality assessors are to be independent and objective. The board is encouraged to provide oversight during the external quality assessment process to reduce perceived or potential conflicts of interest.
The most recent periodic internal audit assessment was performed by Donna Crawford (Special Projects and Quality Assessment Coordinator) and was communicated to the Executive Director. Overall, the internal assessment was rated as “generally conforms,” the highest assessment scale rating listed in the IIA Quality Assessment Manual. This assessment included a follow up of recommendations presented by Dixon Hughes Goodman LLP during 2019’s External Quality Assessment. The 2020 internal assessment results indicate that AMS has taken corrective actions and the following statements can be made:

- Audit findings are properly reflected in the conclusion section of the audit report and the conclusion agrees with the test work completed.
- AMS management shares summary post-audit survey results with AMS staff.

During the review period, Donna Crawford has participated in departmental meetings and trainings, observed the continuous improvement of audit reporting and reviewed board and other audit supporting documentation. Based on such exposure during fiscal year 2020 to date, the following statements can be made:

- AMS is effectively achieving the IIA Core Principles.
- AMS is considered to be in conformance with the definition of Internal Auditing.
- The internal auditors of AMS are in conformance with the IIA Code of Ethics.
- AMS is independent and objective.

This assessment did not identify any significant areas of nonconformance with the IPPF.

Department of Athletics
Auxiliary Forecasting and Reserves and Fiscal Processes

Final Report
November 17, 2020
Overview

The Department of Athletics (Athletics) is VCU’s largest auxiliary operation based on fiscal year (FY) 2020 operations. Athletics offers a variety of sports programs, including men and women’s basketball, cross country, tennis, track and field, soccer; men’s baseball and golf; and women’s lacrosse, volleyball and field hockey. VCU is a National Collegiate Athletic Association (NCAA) Division I school that participates in the Atlantic 10 (A-10) conference.

Financial Operations

As shown in Table 1, the majority of Athletics’ revenue was received from a university fee (UFee). Students pay this fee to support the university in the following areas: recreational sports facilities; University Student Commons; campus development; career and counseling centers; student disability and student services center; intercollegiate athletics; and other programs. From FYs 2016 through 2020, the Office of Budget and Resource Analysis (Budget Office) indicated that approximately 42% of the UFee revenue received is attributed to Athletics. Some of this UFee revenue is allocated annually to Athletics whereas some is retained centrally by the university and is available only upon a formal request that must be approved by the Budget Office.

Athletics’ next largest revenue source is sales and services, which includes tickets sales, game guarantees, advertising, royalties and special events. The sales and services decline in FY 2020 was primarily due to the cancellation of the 2020 A-10 Men’s Basketball Tournament because of COVID-19. Athletics increased their fund raising efforts and was able to recognize a 52% increase from FY 2016 to 2020 in the gifts and foundation revenue line item.

Men’s basketball generated total revenue of $9 million in FY 2019, $2.5 million from ticket sales and the remainder from gifts, royalties, licensing, advertisements and sponsorships. By comparison, the remaining sports contributed less than $300,000 in total.

Source: Banner – auxiliary fund

Athletics’ total expenditures each year have increased as demonstrated in Table 2. This overall increase is primarily attributed to the rise in personnel costs and scholarships.

In FY 2016, Athletics reduced its debt service by paying $1.1 million for the Siegel Center. Debt service was increased for FY 2019 and FY 2020 with the issuance of $774,000 in new debt to finance the Basketball Practice Facility and with an internal loan payment of $699,000 for a new
chiller, respectively. Athletics annually receives a transfer from Business Services to service debt that represents revenue received from the exclusive pour contract with PepsiCo, Inc. to serve only Pepsi branded refreshments at athletic venues. This transfer was increased from $686,000 to $886,000 in FY 2019.

Forecasts

Athletics works with the Budget Office to obtain their long-term business plan. This plan serves as a multiyear financial forecasting tool to project operating sources and uses, including debt service; capitalization needs; and fund (or reserve) balances.

Reserves

In order to be self-supporting as an auxiliary, Athletics is required to accumulate, or reserve, cash for contingencies and to pay for future repairs and renovations. The State Council of Higher Education for Virginia (SCHEV) provides guidance about recommended reserve levels in the following three categories: 1) operating; 2) renewal and replacement; and 3) major renovation or acquisition reserves.

Operating

Operating reserves are expected to provide for reasonable cash flows to support a working capital component to meet seasonal operating expenditures and a contingency component to withstand dramatic financial events that were not anticipated. SCHEV recommends working capital equal of 6 to 18 percent of annual expenses, plus a 4 percent contingency.

Renewal and Replacement

Renewal and replacement reserves are to be established in order for an auxiliary to have a long-term strategy in place to maintain its service. Amounts to be set aside should cover repair, improvement, renovation and replacement needs of long-lived assets.
● SCHEV recommends a renewal and replacement reserve of 10 percent of equipment, such as heating and ventilation systems, replacement value.

● SCHEV does not recommend a specific percent for facility maintenance; however, the National Association of College and University Business Budget Officers (NACUBO) recommends 1.5 to 3.5 percent for such maintenance. One and one-half percent approximates the university’s depreciation rate for buildings and their improvements.

**Major Renovation or Acquisition**

Major renovation or acquisition reserves can be established to provide funding for new facilities or equipment and to reduce reliance on debt financing. SCHEV recognizes that this type of reserve balance would be based on the individual needs of each institution and does not designate a required amount. VCU does not accumulate reserves for major renovation or acquisition.

VCU requires that each auxiliary maintain their reserves in accordance with the above defined SCHEV guidance as prescribed for both the operating and renewal and replacement reserves. Athletics relies on reserves generated through their own operations and revenue generated by the university fee portion that is attributed to Athletics.

**Purpose**

The objectives of the audit were to determine whether:

- Forecasting was adequate
- Reserves balances were adequate
- Fiscal and administrative processes were adequate

**Scope and Audit Procedures**

Our scope of the Department of Athletics encompassed a review of FY 2019 and 2020 auxiliary forecasts and reserves and select fiscal and administrative processes that were in place at the time of the audit. This audit was performed based on evidence available prior to COVID-19 and did not review assumptions made by Athletics after knowledge of the pandemic. Additionally, the scope of our journal vouchers (JV) testing was limited since support for the selected transactions was stored in a paper format that was not electronically available and could not be accessed due to the COVID-19 campus closure.

Our audit procedures included the following:

- Interviews with Athletics’ management and staff to gain an operational understanding of processes and practices
- Inquiry with Budget Office management
- A review of FY 2019 and FY 2020 projected budgets
- A review of Athletics’ business plan for FY 2019 and 2020
• Evaluation of Athletics’ reserves against SCHEV and University Controller Office’s expectations in the application of the SCHEV guidance
• Review of select fiscal and administrative processes which included banner index reconciliations, purchase card process, JVs, fixed asset listing, record retention forms and ARMICS documentation

Conclusion

In our opinion, based on the results of our audit, we determined forecasting; reserve balances; and fiscal and administrative processes were adequate. Recommendations to gain an understanding about reserve requirements and strengthen fiscal processes were included in a separate report furnished to management.

Prior to releasing this report in final form, the draft report was reviewed by, and management’s action plans were provided or approved by, the following officials:

Michael Sanders
Senior Associate Athletic Director/CFO
Timothy Lampe
Senior Associate Athletic Director
Makonnen Afework
Deputy Director of Athletics
Ed McLaughlin
Director of Athletics

Our audit was conducted in conformance with the International Standards for the Professional Practice of Internal Auditing and included an evaluation of internal controls and such procedures as we considered necessary in the circumstances.

Karen K. Heldenman
Executive Director
Audit and Compliance Services
To: John Venuti  
Associate Vice President for Public Safety, VCU and VCU Health and Chief of Police  
VCU Police Department  

From: Anne Sorensen  
Deputy Director, University Audit  

Date: November 4, 2020  

Subject: Unannounced Inspection of Property - Evidentiary and Non-evidentiary Inventory  

Summary  

The International Association of Law Enforcement Administrators (IACLEA) requires an annual unannounced inspection of the property and evidence inventory. The VCU Police Department (VCUPD) Property and Evidence Management policy provides further inspection instruction. Audit and Management Services (AMS) conducted an unannounced inspection in accordance with both IACLEA and VCUPD policy requirements on October 22, 2020 without exceptions.

Purpose  

The objectives of this review were to determine whether:  
- Police evidentiary and non-evidentiary inventory was securely stored and tracked.  
- Property management followed applicable IACLEA procedures including the unannounced inspection requirement.  
- The property areas were maintained in a clean and orderly fashion.  
- The integrity of the property was maintained.  
- Property was adequately protected from damage and deterioration.

Procedures  

We performed the following.  
- Determined the unannounced inspection procedures AMS was to perform to meet the IACLEA standard requirements  
- Interviewed VCUPD personnel supporting this function  
- Observed the operation of controls surrounding the security, integrity and condition of the storage areas
• Confirmed inventory item to and from the Tracker inventory system by performing the following
  o Evidentiary inventory:
    ▪ Floor to Tracker test: Haphazardly selected 10 items from the evidence room
    ▪ Tracker to floor test: Randomly selected 15 items from drugs, guns and bin categories and one each from the Table/Floor and Perk Kits
  o Non-evidentiary inventory:
    ▪ Tracker to floor test: Haphazardly selected three items and confirmed that correspondences were sent timely to identified owners

Conclusion

Based on the work performed, police evidentiary and non-evidentiary inventory was securely stored and tracked; property management followed the applicable procedures requiring the unannounced inspection; the property areas were maintained in a clean and orderly fashion; the integrity of the property was maintained; and property was adequately protected from damage and deterioration.

Campaign Giving by Alumni
Decade
33,601 alumni donated to VCU during the campaign. Alumni graduating in the 2010s made the most gifts (7,917), while alumni from the 1970s donated the most dollars ($72.4M).
Campaign Giving by Geography
The Make It Real Campaign for VCU had donors in every US state.

83,231 donors live in Virginia representing 74% of all campaign donors.
13 states and DC had $5.0 M + giving

70% of campaign giving came from donors living in Virginia with gifts totaling $592.0 M
$509.3M came from the central region of Virginia accounting for 61% of all campaign giving.

Due to rounding, some totals may not correspond with the sum of the separate figures.
Campaign Donors
Loyal Donors are donors who gave for 3+ consecutive years during the campaign.

14,258 loyal donors contributed $524.0M.

This represents 62% of all campaign giving.

Due to rounding, some totals may not correspond with the sum of the separate figures.

* Hits/impressions do not include Athletics coverage, except where Athletes become news in itself

**Conversions are the number of qualified hits from our advertising website landing page, to a call to action page in the recruitment process. This includes hits to the application page, registering for events or requesting information.

Definitions: Impressions are the number of times content is displayed. Engagement is the number of interactions people have with content (e.g. likes, comments, shares, retweets, etc.). Media hits are content passed by an editorial filter that is published/broadcast in traditional and digital media. Owned media are communications channels under VCU’s central control (VCU News Center).
August 2020 – Present
Internal and external COVID-19 Communication

University Relations leads a team of communicators across campuses to keep the VCU and VCU Health System community up-to-date on COVID-19 response and operational impacts. Of particular note this past quarter:

- Communications support to increase prevalence testing turnout
- Promotion of testing availability, exit and entry testing
- Promotion of daily health survey completion requirement
- Response to rumors of impending building or campus shutdown
- Virtual fall commencement announcement
- Spring semester calendar announcement
Website & Email account June 3-Oct. 31, 2020

RESOLUTION OF THE BOARD OF VISITORS OF
VIRGINIA COMMONWEALTH UNIVERSITY AUTHORIZING THE
RESTRUCTURING OF INDEBTEDNESS WITH THE VIRGINIA COLLEGE
BUILDING AUTHORITY

WHEREAS, VIRGINIA COMMONWEALTH UNIVERSITY, in furtherance
of its educational purposes, has borrowed funds from the Virginia College Building Authority
(the “Authority”) through the Authority’s Public Higher Education Financing Program,

WHEREAS, the Governor of the Commonwealth of Virginia (the
“Commonwealth”) has recognized that the COVID-19 pandemic has had, and continues to have,
a tremendous adverse impact on higher education, including the fiscal health of the
Commonwealth’s colleges and universities, and in response to financial conditions created by the
pandemic, the Governor has proposed a debt restructuring plan for debt-funded capital projects
of higher educational institutions which will defer debt service payments on certain indebtedness
obtained through or with the assistance of the Commonwealth, including debt obtained through
the Authority (the “Debt Restructuring Program”);

WHEREAS, the Board of Visitors (the “Board”) of the VIRGINIA
COMMONWEALTH UNIVERSITY (the “Institution”) desires to participate in the Debt
Restructuring Program to restructure all or a portion of its indebtedness to the Authority (the
“Authority Debt”) and desires to delegate to certain officers of the Institution the authority (i) to
select the Authority Debt to be restructured and to establish and agree to the terms of such
restructuring, (ii) to pledge as required by the Authority the general revenue
of the Institution as
security to the extent not prohibited by law or otherwise restricted, (iii) to approve the forms of
the Restructuring Documents required by the Authority in connection therewith, including any
modifications or amendments of loan or other documentation evidencing the Authority Debt (the
“Restructuring Documents”), and (iii) to take any and all other action required to effect and
implement such debt restructuring, including any post-issuance or post-closing monitoring or
compliance requirements.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD:

Section 1. The Institution is authorized to participate in the Debt
Restructuring Program and, accordingly, (1) the Senior Vice President of Finance and Budget
and Chief Financial Officer and (2) the Treasurer (the “Authorized Officers”) are each hereby
delegated and invested with full power and authority, subject to the provisions of Section 2
hereof, (i) to select the Authority Debt to be restructured and to establish and agree to the terms
of such restructuring, including extending the term of payment and the modification of other
terms thereof, (ii) to pledge as required by the Authority the general revenues of the Institution as
security to the extent not prohibited by law or otherwise restricted, (iii) to approve the forms of
the Restructuring Documents required by the Authority and any subsequent amendments thereto,
(iv) to execute and, deliver, on behalf of the Institution such Restructuring Documents, with
approval of the terms thereof being evidenced conclusively by the execution and delivery thereof,
and (v) to do and perform such other acts, and execute and deliver such other documents and
agreements as may be necessary or appropriate to carry out the intent of this Resolution.
Section 2. In connection with the authorization herein provided the Authorized Officers may, in connection with any debt restructuring obligation, provide for (i) the funding of reserves if required, and (ii) the funding of issuance costs and other financing expenses related to such restructuring; provided (a) the principal amount of any such obligation shall not exceed the amount required to cover the principal of and interest on the indebtedness to be restructured plus amounts permitted by clauses (i) and (ii) above, (b) the interest rate on any such obligation shall be as determined by the Authority, and (c) the restructuring terms, including the rate of interest on any such obligation or method of determining such rate, shall be approved by the Treasury Board of the Commonwealth.

Section 3. If it is determined by the Authority in connection with any Authority Debt restructuring that the Institution is subject to continuing disclosure obligations under Rule 15c2-12 of the federal Securities and Exchange Commission an Authorized Officer is hereby authorized and directed to enter into a continuing disclosure undertaking in form and substance reasonably satisfactory to the Authority, and the Institution will comply with the provisions and disclosure obligations contained therein.

Section 4. The Board designates the Treasurer to be responsible for implementing procedures to monitor post-issuance compliance with covenants in any Restructuring Document and any amendments thereto, if required in connection with federal tax law or federal securities law requirements.

Section 5. This resolution shall take effect immediately upon its adoption.

Adopted: __________ __, 20___

BOARD OF VISITORS OF
VIRGINIA COMMONWEALTH UNIVERSITY
Virginia Commonwealth University (VCU) faces a broad range of hazards from disruptive events, such as flooding, active shooters, event management, technology failures, etc. A coordinated and organized response effort could save lives, protect property and ensure an efficient short-term restoration of basic operations.

The VCU Crisis and Emergency Management Plan (CEMP) creates a flexible framework for the coordination of the University’s effort in assisting impacted people, physical assets and operations on campus. This plan is structured following guidelines from the National Incident Management System (NIMS) and National Response Framework (NRF) and provides flexibility to adapt to different disruptive events and for interacting with local and state entities to coordinate large-scale, multijurisdictional responses. The succession of events in a disruptive event are not predictable; therefore, this plan serves as a basic framework and may require changes to meet the challenges of each emergency.

Components of the Crisis and Emergency Management Plan

**Basic Plan:**
This portion of the plan comprises all the phases of an emergency and how the various departments may respond during the various phases. Utilizing information gathered from the 2020 VCU Hazard Vulnerability Assessment (HVA), the plan responds with an all-hazard approach to describe the operations of VCU during a disruptive event.

**Incident Command Structure and Response Framework:**
The Incident Command System (ICS) is a management system designed to enable effective and efficient domestic incident management by integrating a combination of facilities, equipment, personnel, procedures, and communications operating within a common organizational structure. ICS is normally structured to facilitate activities in six major functional areas: command, operations, planning, logistics, intelligence and investigations, finance and administration. It is a fundamental form of management, with the purpose of enabling incident managers to identify the key concerns associated with the incident, often under urgent conditions, without sacrificing attention to any component of the command system.

**Department Work Groups:**
Department work groups coordinate the response to a disruptive event within each department to address related support activities and continuity of operations.

**Annexes:**
These annexes detail specific response measures taken for various disruptive events (ex: HAZMAT, infectious disease, etc.). These scenarios are high probability and potentially maximum devastation events given their severity and complexity. As such, they warrant additional frameworks to coordinate the response effort in those instances.
 Modifications and/or revisions to the Virginia Commonwealth University (VCU) Crisis and Emergency Management Plan (CEMP) are recorded in the table below.

INTRODUCTION

Purpose

The Crisis and Emergency Management Plan (CEMP) provides for emergency operations in response to any type of disaster or large-scale emergency affecting VCU. A disruptive event may occur with little or no warning; the CEMP is designed through an all-hazards perspective to allow for flexibility and scalability of the response. It assigns duties and responsibilities to departments for disaster mitigation, preparedness, response, and recovery. It also provides the framework within which more detailed emergency plans and procedures can be developed and maintained. Activation of this plan reduces the vulnerability of people and property to a disaster and establishes a means to respond effectively to planned or unplanned incidents that have varying degrees of early warning.

This plan is intended to establish organizational structure for responses to emergencies that are of sufficient magnitude to cause a significant disruption of the functioning of all, or portions, of VCU. This plan describes the roles and responsibilities of individual units, departments, and personnel during emergency situations.

Scope & Applicability

The plan covers a range of complex and constantly changing requirements in anticipation of, or in response to, threats or acts of terrorism, major disasters, and other emergencies within or affecting VCU. Therefore, this plan is applicable to all departments and individuals within the VCU community, each of which may be requested to provide assistance or emergency action when broad coordination is required to save lives, minimize damage, or otherwise assist in response. Moreover, this plan also provides the foundation for the organization and coordination of recovery and mitigation functions. It focuses on emergency planning functions at the academic and MCV campuses, but functions separately from VCU Health System. Other campuses, not located in downtown Richmond, develop site-specific annexes, consistent with lines of authority, notification procedures, and other policies outlined within this plan.

Goals & Objectives

Goals and objectives

VCU will respond to a disruptive situation like an emergency or disaster in a safe, effective, and timely manner. University personnel, resources, and equipment will be utilized to accomplish the following priorities:

1. The protection of human life from natural and human-caused hazards.
2. The maintenance of quality-of-life conditions and environment during disruptive events.
3. The continued operations of critical VCU resources and facilities during disruptive events.
4. The quick and efficient assessment of damage and institutional impact after a disruptive event.
5. The quick and efficient short-term restoration of general campus operations.

Planning Situation

The following situations impact VCU’s operational planning efforts for Fall 2019-2020:

1. VCU’s two primary campuses are located in the urban environment of downtown Richmond, Virginia.
2. The 98.7 acre Monroe Park Campus is located in Richmond’s Fan District and the 70.5 acre MCV Campus is adjacent to the Virginia State Capitol. The institution also owns 582 acres located in Hanover County, and Charles City County.
3. VCU occupies 271 buildings housing undergraduate, graduate, and professional studies. Of those buildings 48 were built prior to 1900, and 48 are designated historic, or lie in a historic district.
4. The estimated capital replacement cost is $4.2 billion.
5. The population breakdown at VCU is as follows:
   - 23,172 undergraduate students
   - 5,292 graduate students
   - 1,639 first professional students
   - 3,834 full-time faculty members
   - 24,234 employees (including VCU Health System)
6. The VCU Resident Hall capacity is 6,234 students for academic year 2019-2020.
7. Both campuses are located in proximity to Interstates 64 and 95 as well as to railroad tracks, which all carry hazardous materials.
8. Special events occur frequently at VCU and include sporting, entertainment, conference, academic, commemorative, and high-profile political, celebrity, and civil unrest gatherings.
9. VCU maintains $310 million in FY 2019 for sponsored research and direct connectivity to VCU Health operations in and around Richmond.

Planning Assumptions
This Plan is based on the following planning assumptions and considerations presented below:

1. A disruptive event may occur at any time of the day or night, weekend or holiday, with little or no warning.
2. The succession of events in a disruptive event is not predictable; therefore, published plans, such as this one, serve as a framework and may require improvisation to meet the requirements of the emergency.
3. VCU may be impacted by an event which occurs in the community adjacent to the campus or at off-site facilities, necessitating resources and personnel being mobilized to respond.
4. Disasters affecting the University may affect the surrounding community. Therefore, it is necessary for the University to prepare for and carry out disaster response and short-term recovery operations in conjunction with local resources.
5. Based on the event, outside resources may not be readily available to assist VCU.
6. Departments should maintain standard operations plans or guides relevant to their areas and operations and ensure that all personnel are trained and familiar with the Plan and are capable of implementing emergency procedures in a timely and effective manner.
7. Incidents including major emergencies or catastrophic events will require full coordination of operations and resources and may:
   - Involve single or multiple geographic areas;
   - Require significant resource coordination or assistance;
   - Result in numerous casualties, fatalities, displaced people, property loss, significant damage to the environment, and disruption of economy and normal life support system such as public services and basic infrastructure;
   - Overburden VCU resources and capabilities;
   - Require extremely short notice asset coordination and response timelines; and
   - Require prolonged, sustained incident management operations and support activities requisite to long-term community recovery and mitigation.
8. Incident management activities will be initiated and conducted using the principles contained in the National Incident Management System (NIMS) and with Incident Command Structure (ICS).
9. VCU Police are responsible for compliance with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (Clery Act), specifically issuing emergency alerts for situations involving imminent threat or danger to the VCU community, and timely warning notifications for reported Clery crimes when ongoing risk and danger exist for the community.
10. This plan requires that the Department of Criminal Justice Services (DCJS) and the Virginia Criminal Injuries Compensation Fund (CICF) will be contacted immediately to deploy when there are victims as defined in § 19.2-11.01 Crime Victim and Witness Rights, including, but not limited to victim and witness protection, and cases where there are victims of crime in need of financial or advocacy assistance. The current contact information for the CICF program is: CICF P.O. Box 26927, Richmond, Virginia 23261, phone: Toll Free: (800) 552-4007, email: info@virginiavictimsfund.org. The current contact information for DCJS is: Virginia Department of Criminal Justice Services, 1100 Bank Street, 12th Floor Richmond, Virginia 23219, phone: 804.786.4000.

HAZARD & VULNERABILITY ASSESSMENT (HVA)

Hazard Vulnerability Assessment (HVA)

The day-to-day functions of Virginia Commonwealth University (VCU) are complex during normal operations; however, there are a variety of hazards and additional risks which may create additional complexity to VCU’s preparedness and response. The following chart was created using the Kaiser Permanente Hazard Vulnerability Assessment (HVA) tool which systematically evaluates risks and vulnerability to specific hazards, and prioritizes the overall likelihood of occurrence and severity of impacts. The VCU HVA is revised annually in January through collaboration with the ICT workgroups.

Virginia Commonwealth University 2020 HVA
Virginia Commonwealth University (VCU) coordinates emergency preparedness planning efforts with the Virginia Department of Emergency Management (VDEM), City of Richmond, and other regional agencies and organizations to ensure that policies and procedures are consistent with current best practices and to ensure VCU can maintain effective communication and coordination during an emergency or disaster. The following table contains the organizational breakdown and assignment of responsibilities.

<table>
<thead>
<tr>
<th>Unit</th>
<th>Responsibility</th>
</tr>
</thead>
</table>
| **President**                     | • Support VCU’s emergency management program.  
• May declare a campus emergency and if necessary, authorize temporary suspension of university operations and activities.  
• Provide leadership and plays a key role in communicating to the public, and in helping faculty, staff and students cope with the consequences of any type of incident impacting the institution.  
• Oversee the coordination of VCU’s Senior Administration.  
• Communicate with the Board of Visitors, Mayor, and Governor should the disaster event dictate. |
| **Incident Coordination Team (ICT)** | • Evaluate the institutional effects of the emergency.  
• Determine business recovery and resumption priorities.  
• Overseen by the ICT Leader.  
• Execute the Crisis and Emergency Management Plan (CEMP).  
• Consist of senior management from Academic Affairs, Athletics, Business Services, Facilities Management, Finance & Administration, Health Sciences, Human Resources, Health System, Libraries, Police, Research, Risk Management, Student Affairs, Technology Services, and University Relations. |
| **Director of Emergency Preparedness** | • Serve as the lead for Emergency Management.  
• Develop and maintains plans and procedures the CEMP Business Continuity Plans, and state level Continuity of Operations Plan (COOP).  
• Coordinate resources to address the full spectrum of actions to prevent, prepare for, respond to, and recover from the incidents involving all hazards.  
• Activate and manage the Emergency Operations Center (EOC) to help coordinate response to disasters and ensure the most effective and efficient integration and utilization of activated assets to address the current situation.  
• Develop standard operating procedures to facilitate the communications and operational interface during all phases of disaster management.  
• Develop and maintain plans and procedures to address the full spectrum of hazards.  
• Request assistance when VCU capabilities have been exceeded or exhausted.  
• Coordinate with local, state, and federal officials after a disaster to implement recovery strategies and programs.  
• Conduct incident and needs assessments during and after a disaster.  
• Develop and implements a training, testing and exercise schedule to assure all parties involved in emergency response and recovery are fully prepared to fulfill their tasks. |
| **Academic Affairs**              | • Serves as the lead for the Planning & Logistics Section, Academic Affairs and Student Group.  
• To promote the protection and preservation of academic integrity before, during, and after a major emergency or disaster.  
• To ensure the availability and management of academic spaces before, during, and after a disruptive event.  
• To protect the physical and virtual academic records for previous and current VCU students. |
| **Athletics**                     | • Serves as a support agency for the Planning & Logistics Section, Academic Affairs and Student Group.  
• To promote the protection and preservation of the staff and resources involved in official athletic department activities.  
• To support the execution of an activated State Managed Shelter at the Siegel Center (as needed). |
| **Business Services**             | • Serves as a support agency for the Finance and Administration Section, Business Group.  
• Develop and maintain plans and procedures to support ICT response, and recovery operations.  
• To the extent feasible, continue to provide dining services during disruptive events. |
| **Facilities Management** | - Serves as a support agency for the Operations Section, Facilities group.  
- Develop and maintain plans and procedures to support ICT response, and recovery operations.  
- Support the implementation of traffic control measures in conjunction with the Transportation Group.  
- Support initial and, as necessary, more detailed damage assessments.  
- Provide emergency engineering services.  
- Coordinate and provide debris clearance and removal.  
- Coordinate the conservation of resources (as necessary).  
- Coordinate with private companies to maintain and restore electrical, water, sewer and natural gas utilities.  
- Provide available building plans of all facilities (as necessary) to all other support agencies and ICT groups.  
- Coordinate with Safety and Risk Management (Public Safety Group) for health and Safety efforts on campus including, but not limited to on campus laboratories, radiation, regulated waste and hazardous materials. |
| **Finance and Budget** | - Serves with Human Resources as the lead for the Finance and Administration Section.  
- Develop and maintains plans and procedures to support the Finance and Administration Section, and Business group.  
- Coordinate the framework for resource management activities.  
- Activate contracts with internal and external agencies to provide resources.  
- Assist in overseeing and expediting the purchase of disaster-related equipment & services.  
- To ensure that all accurate information is collected and transmitted for insurance and reimbursement purposes. |
| **Health Sciences** | - Serves as a support agency for the Planning & Logistics Section, Student Group.  
- To promote the protection and preservation of academic integrity within health sciences programming before, during, and after a major emergency or disaster.  
- To ensure the availability and management of academic spaces for health sciences programs before, during, and after a disruptive event.  
- To protect the physical and virtual academic records for previous and current VCU Health Sciences students. |
| **VCU Health** | - Serve as the lead for the Operations Section, Hospital Group.  
- Provide for the prevention of disease to include surveillance and investigation of diseases.  
- Assist Fatality Management operations and coordination.  
- Provide guidance and technical assistance regarding emergency evacuation of people with functional needs.  
- Coordinate medical support for State Management Shelter (SMS) operations.  
- Oversee the dispensing of life-saving pharmaceuticals and medical supplies (as necessary).  
- Work closely with relevant state and local health departments, health and mental health community agencies and other medical services (as necessary).  
- Coordinate release of information pertaining to student, faculty, and staff injuries, including next of kin notification, with the Student Group, Public Safety Group, Public Information Group, and University legal counsel (as needed). |
| **Human Resources** | - Serves with Finance as the lead for the Finance and Administration Section, as well as a lead for the Planning & Logistics Section, Employee Group.  
- To promote the protection and preservation of VCU’s human resources before, during, and after a major emergency or disaster.  
- To protect the physical and virtual human resources records for previous and current VCU employees (including staff and faculty). |
| **Libraries** | - Serves as a support agency for the Planning & Logistics Section, Student Group.  
- To promote the protection and preservation of library functions, space and material availability before, during, and after a major emergency or disaster. |
| **Police** | • Serve as the lead for the Intel & Investigation’s Section, Public Safety Group  
• Develop and maintain plans and procedures to support the Transportation Group, and Facilities Group.  
• Provide for the management and coordination of all public safety and fire safety guidelines and policies.  
• Assist with damage assessment.  
• Assist in evacuating areas at risk in coordination with other law enforcement authorities and emergency support functions.  
• Implement traffic control actions in and around site.  
• Establish the necessary security and accessibility policies around incident and evacuated areas.  
• Coordinate the collection and preservation of evidence to support a criminal investigation during the response and recovery phase of the incident.  
• Provide security services at emergency shelters (as necessary).  
• Coordinate release of information pertaining to student, faculty, and staff injuries, including next of kin notification, with the Student Group, Hospital Group, Public Safety Group, Public Information Group, and University legal counsel (as needed).  
• Work closely with the City of Richmond Office of Emergency Management, Fire and Police Departments, Public Works, the Facilities Management Group during hazard materials events or other public safety threats. |
| **Research** | • Planning & Logistics Section, Research Group (Animal Safety)  
• To promote the protection and preservation of VCU’s research resources, functions, and personnel before, during, and after a major emergency or disaster. |
| **Safety & Risk Management** | • Serve as the lead for the Public Safety Group with regards to Fire Safety/response and Hazardous Materials incidents.  
• To promote the protection and preservation of all VCU resources from fire, chemical or other containments.  
• Development, adoption, and maintenance of a current written Occupant Emergency Action Plan with respect to executive branch agencies, consisting of 4 of building evacuation, shelter-in-place, active threat, and other hazards or emergencies as deemed appropriate; The Office of Environmental Health & Safety within the Office of Safety & Risk Management oversees the fire safety program for every building on campus. This program includes plans that address the following issues:  
  • Procedures for reporting a fire or other emergency.  
  • Procedures for emergency evacuation, including type of evacuation and exit route assignments.  
  • Procedures to be followed by employees who remain to operate critical operations before they evacuate.  
  • Procedures to account for all employees and students after evacuation.  
  • Procedures to be followed by employees performing rescue or medical duties. |
| **Technology Services** | • Serve as the lead for the Operations Section, Information Technology Group for the response to and recovery from incidents impacting Technology & Communications.  
• Develop and maintain plans and procedures to ensure the continuation and restoration of information services and telecommunications infrastructure.  
• Provide support for VCU’s computing and networking infrastructure, data networks, and telecommunications infrastructure during emergency or disaster situations. |
| **University Counsel** | • Support the Incident Commander with legal advice during incidents and events requiring the activation of the Incident Coordination Team.  
• To provide legal awareness, advice, and interpretation related to VCU’s emergency capabilities before, during, and after a major emergency or disaster. |
| **University Relations** | • Serve as the lead for the Intel & Investigation’s Section, Public Information Group (Emergency Public Information).  
• Develop and maintain plans and procedures to support emergency communications and public outreach during emergencies.  
• Serve as the Public Information Officer in the Emergency Operations Center (EOC).  
• Serve as a liaison between the ICT and university Administration.  
• Coordinate the dissemination of information to students, staff, faculty, visitors, and the public during emergencies or disasters.  
• Ensure accurate and factual information concerning an emergency involving VCU and its personnel is provided to the news media.  
• Serve as the only authorized representative to release information to the media.  
• Set up a Joint Information Center (JIC) (as necessary).  
• Coordinate release of information pertaining to student, faculty, and staff injuries, including next of kin notification, with the Student Group, Hospital Group, Public Safety Group, and University legal counsel (as needed). |
### Students, faculty and staff

Students, faculty, and staff should be familiar with applicable emergency plans and protocols as well as evacuation routes for the buildings they work and reside in on a regular basis. Prepared students, faculty, and staff are a priority of VCU. When available, outreach programs will be used to promote awareness of personnel and community risks and also the principle of individual preparedness. Preparedness information is made available on various VCU safety websites while crisis emergency information is disseminated immediately when a threat or incident occurs via the VCU Alert system.

### Non-governmental and volunteer organizations (NGOs)

NGOs collaborate with first responders, governments at all levels, and other agencies and organizations providing relief services to sustain life, reduce physical and emotional distress, and promote recovery of disaster victims. NGOs, in cooperation with VCU departments, may provide specific disaster relief services during response and recovery efforts.

The Virginia Voluntary Organizations Active in Disaster (VA-VOAD) is a statewide consortium of faith-based and non-profit organizations that are active in disaster relief. The VA-VOAD communicates with many voluntary organizations that provide significant capabilities to incident management and response and recovery efforts at all levels. The VCU Office of Emergency Preparedness in partnership with the Student Group will coordinate VA-VOAD activities to address unmet needs during a declared campus emergency.

### Private Sector

The roles, responsibilities, and participation of the private sector during major incidents that impact VCU vary based on the nature of the organization and the type and impact of the incident. They support this plan by sharing information with the University, identifying risks, performing vulnerability assessments, developing emergency response and business continuity plans, enhancing their overall readiness, implementing appropriate prevention and protection programs, and donating or otherwise providing goods and services through contractual arrangement or purchases to assist in response to and recovery from an incident.
General
This section describes coordinating structures, processes, and protocols employed for incident management by VCU. These coordinating structures and processes are designed to enable execution of the responsibilities of the President through the appropriate departments and to integrate local, state, Federal, non-governmental agencies and organizations, and private-sector efforts into a comprehensive approach to emergency management.

This plan was founded upon the concept that emergency operations begin with VCU and that outside assistance from the City of Richmond will be requested when an emergency or disaster exceeds institutional capabilities. Therefore, this plan identifies the role of the University before, during and after a disaster or major emergency. It establishes the concepts and policies under which all elements of VCU will operate during emergencies.

Additionally, it provides a basis for the preparation of more detailed plans and procedures and for emergency management training programs. Units with primary emergency duties and responsibilities are also expected to develop and maintain separately published and more detailed standard operating procedures.

In the event an incident exceeds VCU’s emergency response capabilities, outside assistance may be available, either through mutual support agreements with nearby jurisdictions, other institutions of higher education, or volunteer organizations. VCU resources must be fully committed before assistance is required from the adjacent jurisdictions.

The following general principles apply to all parts of VCU’s operation Plan:

- On-scene coordination of emergency response will be accomplished within the Incident Command System (ICS) framework allowing for the incorporation of local, state, and federal agencies.
- The Emergency Operations Center (EOC) is the central location from which off-scene activities and resource management are coordinated.
- The EOC may be virtually, partially or fully activated.
- All appropriate available forces and resources will be fully committed before requesting assistance.

Overall Incident Management
During normal operations, the Director of Emergency Preparedness develops detailed procedures for EOC operations, manages an ongoing training program and maintains adequate facilities and equipment for EOC operations. Departments assigned responsibilities in the EOC designate staff to respond to the EOC and to participate in training.

In a time of emergency, the Director of Emergency Preparedness manages centralized emergency operations in order to coordinate resources, advice and counsel to the ICT Leader (or designee) to formulate policy, establish priorities, collect and analyze information and disseminate information and communications with the City of Richmond related to conditions or developing situations associated with the emergency.

While the ICT is led by the ICT Leader, the Director of Emergency Preparedness oversees the function of the EOC. The EOC is ultimately supported by members of the Incident Coordination Team. As the situation warrants, local, state and federal agencies may also have representatives in the EOC during emergencies.

Activation of the Emergency Operations Center (EOC)
The Emergency Operations Center may be activated by the Director of Emergency Preparedness at the direction of the ICT Leader or in proactive readiness for a projected or forecasted event. The EOC will be utilized to manage events that are an imminent threat to public safety or health or as needed to managed an extensive response and coordination to a large emergency or disaster. Additionally, the EOC may also be activated for a planned event.

The availability of staff and operational needs may allow or require positions to be expanded or combined to meet event priorities and needs. Upon notification, identified ICT representatives will report to the EOC at the appointed time and be prepared to carry out their roles and responsibilities. The full procedure for activation and support of the EOC is found in the Emergency Operations Center (EOC) Guide maintained separately by the Director of Emergency Preparedness.

VCU Incident Command Structure
The National Incident Management System (NIMS) will be applied to operational response to ensure efficient and effective operations. In addition to multi-agency coordination through the Emergency Operations Center (EOC), VCU’s response will utilize NIMS concepts including modular organization, unified command, span of control, common terminology, action-based planning processes, comprehensive resource management, integrated communications, and pre-designated facilities.
Phase of Emergency

There are three levels of or categories of emergency for VCU. These levels are scalable and, as a situation develops, may escalate or de-escalate as necessary. These levels are defined below:

<table>
<thead>
<tr>
<th>Level</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Steady State Operations (Green) – Normal operations are occurring without limitation.</td>
</tr>
<tr>
<td>2</td>
<td>Increased Readiness (Yellow) – This level references a situation when there is a potential or likelihood of an emergency developing or worsening. ICT staff are performing more frequent monitoring. Normal, routine daily activities are occurring but ongoing or forecast events include a potential or actual threat or requirement for coordinated assistance. Severe weather or other events may be occurring, causing damage or effects to power, transportation, communications and other infrastructure sectors requiring some limited form of assistance. Individual departments continue to perform assistance under their normal procedures.</td>
</tr>
<tr>
<td>3</td>
<td>Partial Activation (Orange) – A disruptive event that has a real or potential impact on the overall capability of VCU to fulfill its academic, operational, and research mission, but may not necessitate, justify, or allow for the full operational phase.</td>
</tr>
<tr>
<td>4</td>
<td>Full Activation (Red) – A large scale, long lasting event that has a negative impact on the overall capability of VCU to fulfill its academic, operational, and research mission. The disaster would be one of great magnitude, and deaths will probably have occurred or the potential is very high. All ICT staff and Response groups are activated and required to report to the VCU EOC.</td>
</tr>
</tbody>
</table>

Declaration of Emergency

An emergency declaration may be based upon reports of an actual event or on the forecast or prediction of disruptive conditions. The ICT Leader has the ultimate authority to declare an emergency and ultimately notify the President.

The Director of Emergency Preparedness is responsible for monitoring incidents and events and providing information and support to the Incident Commander and Vice President of Public Safety. When an emergency is declared, the Director of Emergency Preparedness will immediately notify the City of Richmond Office of Emergency Management.

The ICT Leader, or designee, may re-direct and deploy University resources and assets as necessary to prevent, prepare for, adequately respond to, and quickly recover from an incident. For significant events impacting the University or a neighboring jurisdiction, the EOC may be activated to monitor the situation and coordinate activities among departments to ensure that the University is positioned to rapidly respond in the event of an incident.

In case of any type of campus emergency, the authority to activate emergency notification systems and begin the emergency declaration process is deferred by the Chief of Police to the highest ranking personnel (up to and including the Shift Supervisor) to ensure minimal bureaucratic or logistical delay in addressing emergency or disaster needs that might be impacting campus.
Plan Development & Maintenance

The Virginia Commonwealth University (VCU) Crisis and Emergency Management Plan (CEMP) provides the structures and processes for coordinating incident management activities for natural and human caused emergencies and disasters. Following the guidance provided by the National Response Framework (NRF), National Incident Management System (NIMS), and other supporting documents, the Plan creates an umbrella configuration for existing department emergency and incident management plans.

This plan complies with the National Incident Management System (NIMS), which facilitates VCU’s ability to communicate and coordinate response actions with other jurisdictions and external emergency response agencies. Under NIMS, VCU responds to disruptive events using the Incident Command System (ICS) which is the model tool for command, control, and coordination of response and helps coordinate response toward a common goal of stabilizing an incident and protecting life, property, and the environment.

The Director of Emergency Preparedness maintains the VCU CEMP which is reviewed continually and updated periodically to incorporate policy changes, new directives, legislative changes, and procedures changes based on lessons learned from exercises and actual disruptive events. The Plan will be reviewed and updated annually, and revised and adopted in its entirety by the President and Board of Visitors every four years in compliance with state law.
Logistics & Resources

VCU maintains a comprehensive resource management program that helps manage and efficiently maintain all personnel, materials, equipment, and resources that may be leveraged during a disruptive event to address the mission and purpose of this plan.

Training, Testing & Exercises

Trained and knowledgeable personnel are essential for the prompt and proper execution of VCU’s Crisis and Emergency Management Plan (CEMP). The Director of Emergency Management is responsible for the development, administration, and maintenance of comprehensive training and exercise program. Departments with assigned responsibilities with participate in training and exercises to ensure the Plan may be implemented in accordance with recommended procedures and guidelines.

Training will be based on federal and state guidance as well as professional best practices. Training needs will be identified and records maintained for all personnel assigned emergency response duties in a disaster.

The Director of Emergency Preparedness will conduct no less than one exercise of the Plan each year to improve the overall emergency response organization and capability of the University. The exercise will test not only the Plan but also train the appropriate officials, emergency response personnel and VCU employees. When appropriate, local response organizations, private partners, and NGOs will be encouraged to participate. City of Richmond emergency services personnel from fire, police, and emergency services personnel will also be invited to ensure interoperability and efficient response during shared events.

VCU Incident Command Structure: General Staff and ICT Work Groups

VCU will adopt the 4 general staff positions, and 10 department work groups utilized in the National Response Framework. Regardless of format, Incident Command should be organized to facilitate effective incident response, coordination and support in accordance with applicable laws, policies, ordinances, and statutes that govern incident management and coordination with local, federal and state partners, as well as the community it serves. It is this non-standard approach that makes VCU’s incident response and recovery flexible and effective. The VCU ICT’s seasoned cadre stands ready to respond to the unique needs of the VCU community.

This section/work group works closely with the Finance and Administration Section, and focuses on the management and administration of resources and financial services needed during emergency response. Provides coordination for the receipt and management of external resources include mutual aid, private sector coordination, volunteer management, and donations management.

This work group provides emergency response services and resources needed to address research animal safety and well-being during an emergency or disaster.

This section/work group works closely with the Employee Group, and focuses on the management and administration of resources and financial services needed during emergency response. Provides coordination for the receipt and management of external resources include mutual aid, private sector coordination, volunteer management, and donations management.

| **University Counsel** | • Are there any legal considerations pertaining to this event?  
• Is there a legal nexus to criminal/terrorism laws or issues involving crime victim laws, status or arrest, or prosecution of attacker?  
• For protest activity, are civil rights or civil liberties being protected? Are there unusual circumstances relevant to legal concerns? |
| **University Relations** | • How is information being disseminated to students, staff, faculty, visitors, and the public during the event/emergency?  
• How are updates being handled?  
• How are you coordinating with the media (if applicable)  
• Will a Joint Information Center (JIC) be set up? Virtual or Physical? |
**Emergency Management**

### Introduction

The VCU Emergency Management Function is designed to provide support for VCU emergency and disaster operations by providing incident and information management needed or impacted during a disruptive event.

### Primary Agencies & Support Agencies & Organizations

<table>
<thead>
<tr>
<th>Primary Agencies</th>
<th>Support Agencies &amp; Organizations</th>
</tr>
</thead>
<tbody>
<tr>

<td>VCU Incident Response Team</td>
</tr>
<tr>
<td></td>
<td>City of Richmond Office of Emergency Management</td>
</tr>
<tr>
<td></td>
<td>Virginia Department of Emergency Management</td>
</tr>
</tbody>
</table>

### Purpose

The Emergency Management Function directs, controls, and manages emergency operations to include coordinating with neighboring or superior jurisdictions as needed and facilitating information collection, analysis, and dissemination.

### Scope

The Emergency Management Function coordinates the response of all departments within VCU and the use of University resources to provide emergency response. Coordination can include the following:

- Identifying actions to be taken in the pre-incident prevention phase
- Communication with additional internal and outside agencies and organizations when capabilities are exceeded.
- Identifying post-incident response phase activities.
- Facilitating information management and requests for assistance.
- Identify methods for the distribution of protection action directives through emergency alerting and notification.

### Concept of Operations

- VCU must be prepared to bear the initial impact of a disaster on its own. Help may not be immediately available from local, state, or federal governments after a disruptive event.
- Emergency Management Function will act as the liaison for VCU between local, state, and federal emergency management agencies.
- In the event of a disaster at VCU where incident management is no longer capable of managing the incident, Emergency Management Function will support the overall coordination of resources through the activation and support of the Emergency Operations Center (EOC).
- All reasonable attempts will be made to use any available warnings to prepare the community, and property from the effects of an impending disruptive event. As well as preposition supplies in anticipation of impacts.
- Day to day functions that do not contribute directly to the response to or recovery from the emergency may be suspended for the duration of the event.
- Requests for assistance will be made through the Emergency Operations Center (EOC).

### Organization & Assignment of Responsibilities

The primary agencies will provide the following services as appropriate. They will perform tasks as requested by the EOC and under their own initiative and authorities as applicable:

- Maintain a notification roster of EOC personnel and their alternates.
- Establish a system and procedures for notifying EOC personnel.
- Coordinate mutual aid agreements with neighboring jurisdictions, organizations, or state EOC.
- Test and exercise the Plan and associated procedures.
- Conduct outreach and mitigation programs for the University.

Emergency Management - Damage Assessment & Recovery

**Introduction**

Emergency Management-Damage Assessment & Recovery is designed to provide support for VCU damage assessment, debris removal and short-term recovery services and resources needed during an emergency or disaster.

<table>
<thead>
<tr>
<th>Primary Agencies</th>
<th>Support Agencies &amp; Organizations</th>
</tr>
</thead>
<tbody>
<tr>
<td>VCU Division of Emergency Management</td>
<td>City of Richmond Public Works</td>
</tr>
<tr>
<td>VCU Police Department</td>
<td>VCU Police</td>
</tr>
<tr>
<td>VCU Facilities Management</td>
<td>Virginia Department of Emergency Management</td>
</tr>
</tbody>
</table>

**Purpose**

Emergency Management-Damage Assessment & Recovery provides a framework to facilitate damage assessment and short-term recovery from a disaster. The recovery process begins with an impact analysis and damage assessment of the incident and support for available programs and resources.

**Scope**

Emergency Management-Damage Assessment & Recovery support will vary depending on the magnitude and type of incident and the potential for long-term and severe consequences. VCU may collect damage assessment for public buildings and utilities, but will primarily focus on damage and recovery to VCU controlled assets, resources, and facilities. A separate plan exists to address Long-term recovery efforts.

**Concept of Operations**

- The President, in collaboration with the Incident Response Team, will direct short and long-term recovery efforts for the University.
- Emergency Management-Damage Assessment & Recovery will begin the recovery process for any disaster with the implementation of short term disaster relief programs.
- The strategy for long-term recovery should encompass, but not be limited to, land use, public safety, housing, transportation services, education, natural and cultural resources, and financial continuity and accountability.
- Long-term recovery and mitigation efforts are forward-looking and market-based, focusing on permanent restoration of infrastructure, housing, and the local economy and are addressed in separate plans.
- Partnership with local, state, and federal agencies will be based on the type, extent, and duration of the event and recovery period.
- Federal agencies may be requested to continue to provide recovery assistance under independent authorities to the state and local governments; the private sector; and individuals, while coordinating activities and assessments of need for additional assistance.

**Organization & Assignment of Responsibilities**

The primary agencies will provide the following services as appropriate. They will perform tasks as requested by the EOC and under their own initiative and authorities as applicable:

- Assess the social and economic consequences and coordinate local, state, and Federal efforts to address damage assessment and recovery efforts.
- Partner with disaster assistance agencies to implement short-term recovery programs.
- Advise on recovery implications of response activities and coordinate the transition from response to recovery.
- Work with non-governmental organizations and private sector organizations to conduct comprehensive community impact assessments.
- Identify appropriate programs and agencies to support implementation of recovery, ensure coordination and identify gaps in resources.
- Determine and identify responsibilities for recovery activities.

Facilities Management Group

Introduction
The Facilities Management Group (Facilities & Infrastructure), under the Operations Section, is designed to provide support for VCU emergency and disaster operations by providing management of facilities and infrastructure needed or impacted during a disruptive event. Additionally, this group is designed to provide support for VCU emergency and disaster operations by providing energy and utility management services and resources needed during an emergency or disaster.

<table>
<thead>
<tr>
<th>Primary Agencies</th>
<th>Support Agencies &amp; Organizations</th>
</tr>
</thead>
<tbody>
<tr>
<td>VCU Facilities Management</td>
<td>City of Richmond Public Works, Verizon, Dominion Power, Student Group, Employee Group, Public Safety Group, Public Information Group, Finance and Administration Section</td>
</tr>
</tbody>
</table>

Purpose
The Facilities Management Group coordinates and organizes the capabilities and resources of VCU to facilitate the delivery of essential services, technical assistance, engineering expertise, construction management and operation of the Physical Plant to prevent, prepare for, respond to, and/or recovery from a disruptive event. This group coordinates the procurement of necessary resources, to include the contracting of specialized services and the hiring of additional personnel, to effectively respond to and recover from an emergency.

Scope
The Facilities Management Group is structured to provide support for the changing requirements of all-hazards incident management. Activities include, but are not limited to, conducting pre and post incident assessments of facilities and infrastructure; executing emergency contract support for life-saving and life-sustaining services; activating shelters for state operation if disruptive event requires temporary sheltering; providing technical assistance (ex: engineering expertise, construction, real estate, repair to damage, etc.); monitoring critical infrastructure and key resource restoration.

The Facilities Management Group collects, evaluates and shares information on energy and utility system outages on the VCU campuses. Additionally, this group provides information concerning the energy restoration process such as projected schedules, percent completion of restoration, geographic information on the restoration, and other information as appropriate.

Concept of Operations
- VCU Facilities Management maintains a list of critical facilities and continuously monitors those resources to identify vulnerabilities.
- Restoration of normal operations at critical facilities will be a priority.
- The supply of electric power may be cut off due to either generation capacity shortages and/or transmission/distribution limitations. Other energy shortages, such as interruptions in the supply of natural gas or other petroleum products may result from extreme weather, strikes, international embargoes, disruption of pipeline systems, or terrorism.
- The suddenness and devastation of a catastrophic disaster or other significant event can sever key energy lifelines, constraining supply in impacted areas, or in areas with supply links to impacted areas, and can also affect transportation, communication, and other critical functions. Any disruptive event may cause severe property damage. Buildings and other facilities may have to be reinforced or demolished to ensure safety.
- VCU resources may not be sufficient to meet emergency requirements. VCU may need assistance with damage assessments, structural evaluations, emergency repairs, and the stabilizing or demolishing of damaged structures.
- Professional engineering, architectural and preservation organizations may be available to assist. Statewide Mutual Aid (SMA), Emergency Management Assistance Compact (EMAC) and Virginia Water/Wastewater Agency Response Network (WARN) will be used to require additional assistance.
- Debris clearance will be given top priority to ensure access to impacted areas.

Organization & Assignment of Responsibilities
The primary agencies will provide the following services as appropriate. They will perform tasks as requested by the EOC and under their own initiative and authorities as applicable:

- Comply with local and state actions to conserve fuel and power, if needed.
- Coordinate with the Public Affairs Group to provide energy and utility emergency information, education and conservation guidance to the community as needed.
- Coordinate with local, state, and federal officials and energy suppliers about available utility and energy supply assistance.
- Provide utility companies with a restoration priority list for utilities prior to and/or following a major disaster.
- Work with utility companies to restore all affected utility capabilities and services.

Relay information regarding impacted customers and restoration timelines to the Director of Emergency Preparedness.

- Provide the necessary equipment and resources needed to address the incident.
- Identify and prioritize debris removal.
- Post appropriate signage to address road closures and closed buildings.
- Provide technical assistance in the identification, evaluation, stabilization, rehabilitation and/or demolition of buildings and facilities.
- Assist the management and coordination of emergency contracting services.
- Ensure that all construction and redevelopment complies with the appropriate building codes, zoning and land use regulations, as well as the University’s Master Plan.

# Finance & Administration Section - Business Group

## Introduction

The Finance and Administration Section-Business Group is designed to provide support for VCU emergency and disaster operations by providing resource management and financial services needed or impacted during an emergency or disaster.

<table>
<thead>
<tr>
<th>Purpose</th>
<th>Scope</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Finance and Administration Section-Business Group assists in the procurement of necessary resources, to include the contracting of specialized services and the hiring of additional personnel, to effectively respond to and recover from an emergency. This section will also manage External Resources by providing oversight, management, and processing of external resources used during an emergency or disaster.</td>
<td>Resource management consists of the administration and financial support of emergency relief supplies, facility space, office equipment, office supplies, telecommunications, contracting services, transportation services, security service, and personnel required to support immediate response activities. Under the direction of the Director of Emergency Management, the Business Group provides response to resource needs by looking to the resources of neighboring jurisdictions, institutions the State and then commercial providers. Additionally, the Finance and Administration Section tracks how finances are managed during and following emergencies or disasters.</td>
</tr>
</tbody>
</table>

## Concept of Operations

- The lead and support departments and act as a team to address the resource needs of disaster victims and responders following an emergency on campus.
- VCU will use its own resources and equipment during incidents and will maintain control over the management of the resources as needed as needed to respond to the situation. If additional assistance is required, the University will request assistance from neighboring jurisdictions through the City of Richmond Office of Emergency Management.
- Each department with an emergency function is responsible for identifying its resources, including human resources that could be used in an emergency and conducting activities based on VCU policies and guidelines.
- Individuals involved in distributing and/or obtaining resources will be aware of emergency procurement policies and have the authority to do so in an emergency situation.
- Priorities will be set regarding the allocation and use of available resources.
- The temporary utilization and re-assignment of any non-essential employees will be allowed during emergency activation.

### External Resource Management:

- The utilization of mutual aid will be accomplished through pre-event planning agreements, a disaster request for support, demobilization of the materials, and financial processing of all materials and related agreements.
- Private sector coordination may or may not be accomplished through pre-event relationships, but can be processed during and after disruptive events to provide operational, communication, or financial support in a manner that integrates into components of this plan and overall policies and laws that govern VCU’s operation.
- Volunteers may be solicited by VCU for support during an emergency or disaster in a variety of capacities that will support overall efforts to lessen the impacts of the event. These volunteers will be vetted prior to an event to ensure their skillset is appropriate and there are no personal or legal limitations to their involvement.
- Unsolicited volunteers may also arrive at VCU to provide support to disaster response and recovery. These individuals will be vetted prior to deployment by VCU and/or may be assigned tasks or responsibilities in low risk areas.
- In some circumstances, donations will be collected in response to a VCU emergency or disaster with or without the knowledge of local administration. Managing these donations will ensure they are handled efficiently and effectively and do not become a burden on response and recovery efforts.
The primary agencies will provide the following services as appropriate. They will perform tasks as requested by the EOC and under their own initiative and authorities as applicable:

- Coordinate the framework for University resource management activities that includes logistics planning, preparedness, implementation and evaluation in support of disaster operations.
- Develop standard operating procedures (SOPs) to manage the processing, use, inspection and return of resources coming to the University.
- Identify actual or potential facilities and ensure they are ready and available to receive, store, and distribute resources (government, private, donated, etc.).
- Develop internal training and exercises to test the plan and to ensure maximum use of available resources and understanding of policies to obtain resources from outside the University.
- Develop and maintain a detailed list of available community resources.
- Identify policies and personnel responsible for obtaining resources.

External Resource Management

- Mutual aid agreements will be established with other public or non-governmental organizations by the Director of Emergency Preparedness to address specifically identified preparedness gaps.
- Private sector coordination will occur as needed and may be identified by any senior VCU administrator and executed through legal and planning agreements.
- The Director of Emergency Preparedness will work with voluntary organizations to ensure expectations are set and clear before a disaster.
- The Director of Emergency Preparedness in conjunction with University Relations will monitor the establishment of emergency volunteerism and donations management groups during an event to respond accordingly.

Hospital Group

Introduction
The Hospital Work Group, under the Operations Section is designed to provide support for VCU emergency and disaster operations by providing health and medical services and resources needed or impacted during an emergency or disaster.

Primary Agencies | Support Agencies & Organizations
VCU Health System | Richmond Ambulance Authority Richmond City Health District
VCU Student Affairs – University Counseling | VCU Student Affairs -- Student Health Services

Purpose | Scope
The Hospital Work Group provides the mechanism for coordinated assistance in response to public health, mental health, more medical care needs. Coordination of fatality and mortuary management operations is included, when appropriate.
The Hospital Work Group provides guidance on comprehensive public health and medical response following an emergency/disaster ensures the continuance of medical care services, continued availability of medical supplies, support for emergency medical treatment for disaster casualties and detects mental health issues in the University population.

Concept of Operations
- Student Affairs provides direction and coordination for public and mental health activities performed under the Hospital Work Group.
- VCU Health provides direction and coordination for all medical activities performed under the Hospital Work Group.
- During a threatened or actual emergency, public health and medical care needs will be coordinated through the EOC with local assistance being requested when emergency or disaster needs exceed VCU’s capabilities.
- The VCU Health in conjunction with the Richmond City Health District and Richmond Ambulance Authority will address medical surge as a product of a disaster or emergency resulting in a large number of casualties.
- The VCU Health will coordinate fatality management operations as needed.

Organization & Assignment of Responsibilities
The primary agencies will provide the following services as appropriate. They will perform tasks as requested by the EOC and under their own initiative and authorities as applicable:

- **VCU Health**
  1. Prevention of disease, to include surveillance and investigation of diseases and other conditions, and implementation of intervention measures.
  2. Coordinate the provision of medical supplies, equipment and dispensing of life-saving pharmaceuticals
  4. Provide guidance and technical assistance regarding the evacuation of people with special needs.

- **VCU University Counseling**
  1. Provide personnel, equipment, supplies and other resources necessary to coordinate plans and programs for mental health activities during an incident.
  2. Coordinate behavioral health activities among emergency responders.
     - Provider crisis counseling as needed.

Information Technology Group: Communications & Technology

Introduction
The Information Technology Group (Communications & Technology), under the Operations Section, is designed to provide support for VCU emergency and disaster operations by providing management of communication and information technology systems needed or impacted during a disruptive event.

Primary Agencies | Support Agencies & Organizations
--- | ---
Information Technology, Telecommunications Services | City of Richmond, Department of Emergency Communications, Commercial Mobile Phone Providers Verizon

Purpose
The Information Technology Group organizes, establishes, and maintains the telecommunications, information systems, and resource capabilities necessary to meet the operational requirements of VCU to respond, recover from, and sustain essential functions during disruptive events.

Scope
The scope of the Information Technology Group provides information technology systems involved with the representation, transfer, interpretation and processing of data among persons, places and machines. Likewise, the scope of communication includes transmission, emission, or reception of signs, signals, writing, images, and sounds or intelligence of any nature.

Concept of Operations
- Communication is dependent upon the availability of resources and assets, including personnel. Communications at a high level within VCU are dependent upon Information Technology and Emergency Communication assets, users, commercial telephone lines, internet service providers, broadband providers, and technology networks.
- The VCU Police Emergency Communications Center (ECC), which operates 24/7 is VCU's warning point (point of contact for receipt of all warnings and notification of actual or impending disruptive events).
- To support interoperable communications with the City of Richmond, VCU uses a shared CAD system with City Emergency Communications (9-1-1 operations).
- In the event of a campus-wide emergency, VCU has a comprehensive emergency notification system in place (VCU Alert) to send emergency messages via text, email, digital signage, indoor alert beacon, and social media to the VCU community.
- VCU maintains an Outdoor Warning Siren System that consists of six sirens on the Monroe Park Campus and four sirens on the MCV Campus that are all capable of playing audible tones to alert the public. These sirens are tested at regular intervals.

Organization & Assignment of Responsibilities
The primary agencies will provide the following services as appropriate. They will perform tasks as requested by the EOC and under their own initiative and authorities as applicable:

- Maintain the technical capacity of the emergency notification and warning system.
- Support VCU with the restoration of Information Technology and telecommunication equipment.
- Integrate the communications capabilities of available federal, state, and private organization capabilities into a viable communication system to support disaster response & recovery.
- Work with commercial communication companies to restore communications capabilities and services.
- Identify critical communications equipment and personnel to ensure primary duties are met.
- Identify non-critical communications assets that could be re-purposed for response operations.

# Public Information Group

## Introduction

The Public Information Group, under the Intelligence and Investigations Group is designed to provide support for VCU emergency public information needed during an emergency or disaster.

<table>
<thead>
<tr>
<th>Primary Agencies</th>
<th>Support Agencies &amp; Organizations</th>
</tr>
</thead>
<tbody>
<tr>
<td>VCU University Relations</td>
<td>Virginia Department of Emergency Management City of Richmond Office of Emergency Preparedness VCU Provost Office</td>
</tr>
</tbody>
</table>

### Purpose

The Public Information Group provides accurate, coordinated, and timely information to affected stakeholders including media and all members of the VCU community.

### Scope

The Public Information Group coordinates actions to provide emergency public information support to incident management prior to, during, and following an emergency or disaster.

## Concept of Operations

- As the primary agency, University Relations is the lead for emergency public information.
- During normal operations, University Relations in conjunction with the Director of Emergency Preparedness will coordinate the release of information to promote emergency preparedness.
- In time of emergency, University Relations will coordinate the release of information on emergencies and disasters with oversight from the Incident Commander.
- When a disaster is impending or occurs, the augmented University Relations staff will be positioned in the University Relations operations center while a representative will be placed in the Emergency Operations Center.
- All agencies and organizations are responsible for providing University Relations with appropriate timely information about the incident and actions needed to save lives and protect property.
- A Joint Information Center (JIC) may be activated if the situation warrants. Agencies involved will staff telephones and coordinate media activities under the supervision of University Relations.

## Organization & Assignment of Responsibilities

The primary agencies will provide the following services as appropriate. They will perform tasks as requested by the EOC and under their own initiative and authorities as applicable:

- Develop and conduct public information programs for community awareness of potential disasters, as well as personal protection measures for each hazard.
- Develop rumor control processes.
- Prepare advance copies of emergency information packages for release through news agencies.
- Maintain current list of traditional media contacts.
- Maintain arrangements to provide a briefing room for the media in the vicinity of the EOC or disaster location.
- Disseminate news releases and social media information
- Monitor the media, to include social media, ensuring accuracy of information and correcting misinformation as quickly as possible.
- Establish a phone number(s) and personnel to handle student, staff, faculty, and parent requests for information.

Public Safety Group - Hazardous Materials

**Introduction**

The Public Safety Group- Hazardous Materials is designed to provide support for VCU emergency and disaster operations by providing hazardous materials response services and resources needed during an emergency or disaster.

<table>
<thead>
<tr>
<th>Primary Agencies</th>
<th>Support Agencies &amp; Organizations</th>
</tr>
</thead>
<tbody>
<tr>
<td>Risk Management &amp; Safety Environmental Safety</td>
<td>VCU Police</td>
</tr>
<tr>
<td></td>
<td>The Student Group</td>
</tr>
<tr>
<td></td>
<td>City of Richmond Fire Department</td>
</tr>
<tr>
<td></td>
<td>City of Richmond HAZMAT Team</td>
</tr>
<tr>
<td></td>
<td>City of Richmond Office of Emergency Management</td>
</tr>
</tbody>
</table>

**Purpose**

Public Safety Group- Hazardous Materials provides for coordinated and directed support in response to an actual or potential discharge and/or uncontrolled release of hazardous materials and/or during an incident.

Public Safety Group- Hazardous Materials includes the appropriate response and recovery actions to prepare for, prevent, minimize or mitigate a threat to public health, welfare, or the environment caused by actual or potential hazardous materials incidents.

Appropriate response and recovery actions can include efforts to detect, identify, contain, clean-up or dispose of related hazardous materials.

**Concept of Operations**

- Under Virginia Code Section 44:46.34, hazardous materials are defined as substances or materials which may pose unreasonable risks to health, safety, property, or the environment when used, transported, stored or disposed of, which may include materials which are solid, liquid, or gas. Hazardous materials may also include toxic substances, flammable and ignitable materials, explosives, corrosive materials and radioactive materials.
- The Office of Environment Health & Safety provides the guidance for managing a hazardous materials incident on campus.
- The Superfund Amendments and Reauthorization Act of 1986 (SARA Title III) requires the development of detailed procedures for identifying facilities with extremely hazardous materials and for assuring an adequate emergency response capability by these facilities and local emergency services.
- All hazardous materials released will be reported to local, state, and federal authorities in compliance with all applicable laws and regulations.
- Should an evacuation become necessary, warning and directions for evacuation and/or shelter-in-place is disseminated via all appropriate means.

**Organization & Assignment of Responsibilities**

The primary agencies will provide the following services as appropriate. They will perform tasks as requested by the EOC and under their own initiative and authorities as applicable:

- Compile hazardous chemicals list, obtaining appropriate Material Safety Data Sheets (MSDS), ensuring containers are labeled, and providing training to employees.
- Provide personnel, equipment, supplies and other resources necessary to coordinate hazardous materials plans and procedures.
- Develop procedures aimed at minimizing the impact of an unplanned release of a hazardous material to protect life and property.
- Conduct training for personnel in hazardous materials response and mitigation.
- Follow established procedures in responding to hazardous materials incidents.
- Provide technical information as needed.
- Coordinate control and mitigation efforts with local, state, and federal agencies.

Public Safety Work Group

Introduction

Public Safety Group, under the Intelligence and Investigation Section. This work group provides coordination for public safety and law enforcement activities during emergencies or disasters. This work group will provide search and rescue needed for emergency or disaster response. Additionally, this group will be the lead on providing operational response to hazardous materials spills and exposure during an emergency or disaster. Group components focus on the management of fire suppression, safety, response, and protection activities needed during emergency response.

Primary Agencies

- VCU Police Safety and Risk Management
- Environmental Safety Fire Safety/Risk Management & Safety

Support Agencies & Organizations

- VCU Police
- City of Richmond Fire Department
- City of Richmond Office of Emergency Management

Purpose

The Public Safety Group provides public safety capabilities as well as necessary resources to support the full range of incident management associated with potential or actual events. It identifies VCU’s interaction with and need for emergency support such as law enforcement, fire suppression, search & rescue and other technical services like water rescue from adjacent localities.

Scope

The Public Safety Group provides logistical support to law enforcement response, the firefighting and fire protection, suppression, and safety operations provided by the City of Richmond and the Office of Fire Safety at VCU. This group coordinates and provides law enforcement, public safety, and emergency services capabilities and resources during potential or actual disruptive events, supports incident management requirements including personnel and critical infrastructure protection, security planning and technical assistance in pre and post event situations.

Additionally, this group provides support for support agencies using capabilities or resources to support structural collapse search and rescue, waterborne search and rescue or land search and rescue. Specific services include distress monitoring, incident communications, locating distressed personnel, coordination, and execution of rescue operations including extrication and/or evacuation.

Concept of Operations

- State or federal law enforcement resources – when needed or required – are integrated into the incident command structure using the National Incident Management System (NIMS).
- There is sufficient latitude to allow the on-site supervisor to tailor the emergency operational plan to a specific operation. If needed, other law enforcement agencies will supplement personnel and resources.
- The City of Richmond Fire Department provides firefighting equipment, personnel, resources and technical expertise to prevent, control and suppress structure fires on VCU campuses.
- The Incident Commander in coordination with primary and support agencies will determine the need to evacuate and/or issue orders of evacuation as needed.
- The primary agency will maintain planning, procedures, equipment, resources, and personnel in a manner to mitigate the impact of risk on residential, academic, and support buildings on campus.
- Coordinate planning and operations between primary and support agencies.
- Coordinate resolution of conflicting operational demands for search and rescue response resources.
- Coordinate logistical support for search and rescue resources.
- Coordinate the provisioning of additional resources as needed.
- Provide incident reports, assessments, and situation reports as required.

Organization & Assignment of Responsibilities

The primary agencies will provide the following services as appropriate. They will perform tasks as requested by the EOC and under their own initiative and authorities as applicable:

For Law Enforcement:

- Maintain police intelligence capability to alert the community to potential threats.
- Develop strategies to effectively address special emergency situations that may require distinct law enforcement procedures, such as civil disorders, hostage taking, weapons of mass destruction, terrorist situations, and bomb threats/detonations.
- Test primary communications systems and arrange for alternate systems, if needed.
- Assist with the implementation of the evacuation procedures for the threatened areas, if needed
- Provide traffic and crowd control as required.
- Provide security to critical facilities and supplies as well as the Emergency Operations Center, evacuated areas and shelters.
- Implement existing mutual aid agreements with neighboring jurisdictions, if necessary.
- Document expenses during and after response.
- Evacuation ad access control of threatened areas.
- Assist with identification of the dead.

For Firefighting:

- Coordinate with City of Richmond Fire Department when they respond to a VCU campus.
- Assist with any needed evacuations.
- Follow established procedures in responding to fire incidents.

For Search and Rescue:

- Identify location or event needing search and rescue resources and request immediate deployment.
- Liaise with search and rescue command officer(s) to facilitate support and resource allocation.
- Facilitate area support for crowd and vehicular control to search and rescue operations.
- Report to Incident Response Team and other public safety entities regarding focus and progress of search and rescue operations.

# Academic Affairs & Student Group

## Introduction

The Academic Affairs and Student Group, under Planning & Logistics, is designed to provide support for VCU emergency and disaster operations by providing mass care, sheltering, and commodities distribution needed or impacted during an emergency or disaster.

### Primary Agencies

<table>
<thead>
<tr>
<th>Academic Affairs</th>
<th>Health Sciences</th>
</tr>
</thead>
<tbody>
<tr>
<td>Residential Life and Housing</td>
<td>Athletics</td>
</tr>
<tr>
<td>Library</td>
<td></td>
</tr>
</tbody>
</table>

### Support Agencies & Organizations

| ICT Incident Commander, Finance and Administration Section, Director of Emergency Preparedness, Facilities Management Group |

## Purpose

The Academic Affairs and Student Group addresses the non-medical mass care, housing, and human services needs of individuals impacted by natural and/or technological incidents.

The Academic Affairs and Student Group promotes the delivery of services and the implementation of programs to assist individuals impacted by potential or actual incidents. This service delivery includes immediate relief, short-term housing, relocation assistance, and other basic human commodities. The three primary components of The Student Group are mass care, housing, and human services.

## Concept of Operations

- Residence Life maintains an overview of activities related to mass care and sheltering.
- Dining Services maintains an overview of activities related to mass feeding.
- VCU may request assistance from non-governmental organizations or neighboring jurisdictions or entities when resources are exceeded.
- Recovery efforts are initiated concurrently with response activities. Close coordination is required among those agencies responsible for response operations and recovery activities, and other non-governmental organizations providing assistance.
- Initial response activities focus on meeting urgent mass care needs of victims.
- Recovery activities are initiated concurrently with response activities. Close coordination is required among those agencies responsible for response operations and recovery activities and other non-governmental organizations providing assistance.

## Organization & Assignment of Responsibilities

The primary agencies will provide the following services as appropriate. They will perform tasks as requested by the EOC and under their own initiative and authorities as applicable:

- **Residence Life** will develop, maintain, and update plans and procedures for use.
  1. Develop, maintain, and update plans and procedures for use in an emergency
  2. Maintaining education and training for personnel assigned to staff shelters.
- **Dining Services**
  1. Maintain education and training for personnel
  2. Support food and water distribution throughout campus.
- **VCU Police**
  1. Provide security to shelter sites to restrict and control access
  2. Maintain education and training for personnel
### ROUTINE OPERATIONS

# Transportation Group

## Introduction
The Transportation Group, under the Operations Section, is designed to provide support for VCU emergency and disaster operations by providing management of transportation systems and resources needed or impacted during a disruptive event.

## Primary Agencies
<table>
<thead>
<tr>
<th>Parking &amp; Transportation (in coordination with the VCU Chief of Police)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Support Agencies &amp; Organizations</td>
</tr>
<tr>
<td>Groome Transportation</td>
</tr>
<tr>
<td>Greater Richmond Transit Company (GRTC) (Plans)</td>
</tr>
</tbody>
</table>

## Purpose
The Transportation Group coordinates Virginia Commonwealth University’s transportation resources during the response and recovery phase of a disruptive event. This group will also assist with parking logistics for outside resources responding to an event at VCU and/or VCU Health System.

## Scope
The scope of the Transportation Group is to provide transportation support to assist in incident management with specific, but not limited, support for the following:
- Reporting damage to transportation infrastructure as a result of the incident.
- Coordinating alternate transportation services.
- Coordinating the restoration and recovery of transportation infrastructure.
- Assisting the Public Safety Group with evacuation and traffic control.

## Concept of Operations
- Any parts of the transportation network or any facilities not fully operational due to the emergency or disaster situation should be reported. Any existing or potential factors or conditions impairing efficient operations should be identified.
- Departments shall advise this group of all transportation movements independently arranged.
- Access routes should remain clear to permit a sustained flow of emergency relief and the steady flow of evacuation processes.
- All requests for transportation support will be submitted to the Emergency Operations Center (EOC) for coordination, validation, and/or action.
- For purposes of coordination, RMA, GRTC and/or other support organizations may need to be integrated into the Transportation Group response to fully coordinate activities and responsibilities.

## Organization & Assignment of Responsibilities
The primary agency will provide the following services as appropriate. They will perform tasks as requested by the EOC and under their own initiative and authorities as applicable:
- Development, maintenance, and updates to plans and procedures for use during an emergency.
- Maintaining education and training for personnel to ensure a safe and efficient response to an incident.
- Following emergency policies and procedures for evacuation, including the identification of pre-designated transportation sites.
- Identifying viable transportation routes to, from and within the emergency or disaster area.

**Hazard Specific Annex**

**Hazard Specific Annex 1: Infectious Disease**

### Purpose, Scope, and Assumptions

<table>
<thead>
<tr>
<th>Purpose</th>
<th>Scope</th>
</tr>
</thead>
<tbody>
<tr>
<td>This document is an annex to Virginia Commonwealth University’s Crisis and Emergency Management Plan (CEMP). The Infectious Disease Annex provides a framework for infectious disease-specific preparedness and response activities and serves as a foundation for further planning, drills, and emergency preparedness activities. The information in this document serves as a supplement to, and not replacement for, the information in the Crisis and Emergency Management Plan. This document addresses information specific to infectious disease-related emergencies that are not covered in the Crisis and Emergency Management Plan. Additionally, this annex does not replace the responsibility for specific departments involved in responding to an infectious disease emergency to develop appropriate policies and procedures for that response.</td>
<td>This annex is limited to mitigation, preparedness, response, and recovery for the Monroe Park Campus (MPC), Medical Education Campus, and satellite campuses and facilities as appropriate.</td>
</tr>
</tbody>
</table>

### Situation

An infectious disease is a clinically evident disease resulting from the presence of pathogenic microbial agents. Infectious disease can be transmitted through several methods, including physical contact with infected individuals, airborne inhalation, and contaminated objects.

### Threat and Vulnerability

The City of Richmond and Virginia Commonwealth University closely monitor several infectious diseases that occur or have occurred in the area, including:

- Coronavirus (COVID-19)
- Human Immunodeficiency Virus
- Foodborne diseases such as Salmonellosis and E Coli
- Vectorborne diseases (diseases that are transmitted by an animal or insect) such as West Nile, Influenza A (H1N1), and H5N1 Avian Flu

University Student Health Services also monitors cases of certain illnesses that present among students seeking treatment including influenza and mumps, among others.

Pandemic influenza, or a global outbreak of a new influenza virus, could also impact the University. The impact of a pandemic influenza outbreak could be significant, but the occurrence of such an outbreak cannot be predicted with certainty.

Students are the largest group in the University community and are at a particular risk for contracting infectious diseases. Infectious diseases may also spread rapidly among student populations due to living in close quarters such as in dormitories.

### Capability and Mitigation Overview

### Planning Assumptions
The University has certain capabilities and resources that are available for any emergency but are likely to be used in an infectious disease emergency, including:

- University Student Health Services staff and resources
- VCU School of Medicine
- VCU School of Nursing faculty, staff, and resources
- VCU Health System staff and resources
- VCU Office of Resource and Innovation
- University Counseling Services staff and resources
- Safety and Risk Management staff and resources

The University conducts a variety of infectious disease hazard mitigation activities including tracking and testing for certain infectious diseases and conducting educational campaigns regarding habits that discourage the spread of disease.

The planning assumptions below are based on the CDC’s 2017 Update to the Pandemic Influenza Plan and lessons learned from the COVID-19 response. Although these assumptions represent the conditions that may occur during a pandemic influenza event, many of the assumptions would also apply should a non-influenza pandemic occur.

- Delays in the availability of vaccines and shortages of antiviral drugs are likely, particularly in the early phases of the pandemic.
  - Non-Pharmaceutical Interventions (NPI’s) will be the principal means of disease control until adequate supplies of vaccines and/or antiviral medications are available. NPI’s that all people should practice at all times are particularly important during a pandemic and include: staying home when sick, covering coughs and sneezes, frequent and appropriate hand washing, and routine cleaning of frequently touched surfaces.
- The seasonality of a pandemic cannot be predicted with certainty. Although seasonal, non-pandemic influenza typically peaks in winter, cases of pandemic flu have been observed year round.
- Delays in the availability of vaccines and shortages of antiviral drugs are likely, particularly in the early phases of the pandemic.
- Non-Pharmaceutical Interventions (NPI’s) will be the principal means of disease control until adequate supplies of vaccines and/or antiviral medications are available. NPI’s that all people should practice at all times are particularly important during a pandemic and include: staying home when sick, covering coughs and sneezes, frequent and appropriate hand washing, and routine cleaning of frequently touched surfaces.
  - The seasonality of a pandemic cannot be predicted with certainty. Although seasonal, non-pandemic influenza typically peaks in winter, cases of pandemic flu have been observed year round.
- The virus will have the ability to spread rapidly worldwide.
- If the pandemic is characterized by severe disease, it will have the potential to disrupt national and University community infrastructures (including health care, transportation, commerce, utilities, and public safety) due to widespread illness, absenteeism, death among employees and their families, as well as concern about ongoing exposure to the virus.
  - Of those who become ill with seasonal influenza, up to 50% will seek outpatient medical care. This could significantly tax the available resources of University Student Health Services and other local providers.
- Risk groups for severe and fatal infections cannot be predicted with certainty. Although certain groups such as small children and the elderly are more likely to have complications due to seasonal influenza, pandemic influenza may disproportionately affect a different demographic. During the 1918 pandemic, deaths were notably evident among young, previously healthy adults and in 2009, elderly people experienced a lower infection rate. However, in 2020, elderly people experienced a much higher infection and mortality rate than younger persons.
  - Infected persons, whether they are symptomatic or not, may shed the virus and transmit it to others.
  - One or two secondary infections will occur as a result of transmission from someone who is ill.
  - Behavioral health and stress reactions are health risks in a pandemic that must be integrated into messages to mitigate individual psychological impact, increase compliance with public health directives, and promote the resilience of the community population.
The University utilizes the Incident Command System and the National Incident Management System to manage infectious disease incidents. The University's response to the event will be under the direction of the Incident Commander in collaboration with the Incident Coordination Team (ICT).

Non-tasked departments may be called upon to provide assistance where needed.

The University is responsible for protecting life and property from the effects of an infectious disease emergency on campus. The University has the primary responsibility for the management of an infectious disease emergency that occurs on campus or impacts the University community. The University is responsible for coordinating amongst external agencies that also respond to an infectious disease emergency on campus. The University is also responsible for coordinating with local public health and emergency officials as part of the response to an infectious disease emergency.

The University’s top priorities during an emergency are to:

- Protect the lives, health, and safety of students, faculty, staff, visitors, and emergency responders
- Ensure the security of the University
- Protect and restore critical infrastructure and key University resources
- Protect University property and mitigate damage to the University
- Facilitate the recovery of University individuals
- Restore University operations
- Share actionable information with partner agencies

### Key Areas of Emergency Planning and Incident Management

<table>
<thead>
<tr>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>The University’s Crisis and Emergency Management Plan notes the various activities the University conducts before, during, and after an emergency. Examples of the specific activities that the University conducts regarding an infectious disease emergency are:</td>
</tr>
</tbody>
</table>

#### Mitigation

The University conducts mitigation activities to lessen the impact of an infectious disease emergency. Some of those activities are listed below.

- University Student Health Services, and Employee Health Services conduct a Flu Shot Campaign and educational campaigns to promote vaccination and personal habits that help reduce the spread of disease.
- University Student Health Services conducts infectious disease monitoring and testing among students.
- Coordinating with local health officials to report instances of infectious diseases including influenza and influenza-like illnesses.

#### Preparedness

The University conducts preparedness activities to develop the response capabilities needed in the event of an infectious disease emergency. Some of those activities are listed below:

- Emergency planning, including maintaining this annex and associated procedures, and
- Conducting and participating in tests, training, and exercises related to infectious disease emergencies.

#### Response

The University will respond to an infectious disease emergency that affects its community. Response activities may include, but are not limited to:

- Activation of the Incident Coordination Team (ICT);
- Distributing drugs and vaccines, including those obtained from the Richmond Health District;
- Conducting disease surveillance activities including monitoring and testing possibly infected persons;
- Using containment strategies to discourage the spread of the disease, including quarantine, class cancellation, and social distancing;
- Providing ongoing communication to the University community regarding the impact of and response to the infectious disease emergency on campus;
- Providing psychological and social support services to the campus community, including to emergency responders and other staff; and
- Coordinating among University departments involved in the response and with outside agencies, including the VCU Health System.
- Activation of continuity of operations plans as needed.

#### Recovery

The University will conduct recovery activities in the aftermath of an infectious disease emergency or a pandemic event. Recovery activities will focus on returning the University to normal operations as well as developing any Corrective Action Plans to improve preparedness and response capabilities.

### Levels of Readiness and Activation

<table>
<thead>
<tr>
<th>Level I - Steady State Operations (Green)</th>
<th>Level II - Increased Readiness (Yellow)</th>
</tr>
</thead>
</table>

V CU CEMP
Infectious diseases or pandemic events pose a minimal immediate risk to students, faculty, and staff. The University continues to conduct normal business and monitors threats. University Student Health Services and VCU Health System track infectious diseases and influenza-like illnesses that are present among students seeking treatment.

This is the default level of readiness and activation for the University. The University emphasizes prevention and preparedness activities.

**Typical activities:**
- Monitoring local and global news for information regarding infectious disease emergency
- Planning, organizing, exercising, and training across University departments and units, including the Incident Coordination Team.

---

Infectious diseases or pandemic events pose an increased risk to students, faculty, and staff.

Actions may include developing coordination meetings or conference calls as well as increased health monitoring and education activities.

**Typical activities:**
- Conducting meetings with the Incident Coordination Team, VCU Health System infectious disease experts, and local partners.
- Increasing health monitoring and education activities.

---

### Level III - Partial Activation (Orange) Level IV - Full Activation (Red)

Infectious diseases or pandemic events pose a significant risk to students, faculty, and staff. The University has most if not all of the resources required to respond to the event although increased coordination among University departments and outside agencies may occur. University operations and activities may be impacted or canceled due to absenteeism or to prevent the spread of disease.

**Typical activities:**
- Implementation of social distancing guidelines.
- Modification of operations that may include shift work, teleworking, and changes to class delivery routes and times.

---

Infectious disease or pandemic events pose a major risk to students, faculty, and staff. The University may not have all of the resources required to respond to the event and significant coordination among University departments and outside agencies is required. University operations will be impacted or canceled due to absenteeism or to prevent the spread of disease. Classes, student activities, and some non-essential functions may be ceased for a period of time.

**Typical activities:**
- Cancellation of classes and other activities
- Distribution of food, medicine, and personal protective equipment as needed.

---

### Hazard Response Activation

The response activities detailed in this annex will be activated in accordance with needs, available resources, and the declared readiness level. The Associate Vice President for Public Safety and Vice President for Administration will determine if this annex needs to be activated. Activation will follow the guidelines set forth in the Crisis and Emergency Management Plan.

### Direction, Control, Organization, and Coordination

#### Command and Control

The same command and control structure detailed in the Crisis and Emergency Management Plan will be used during an infectious disease emergency. The depiction below summarizes that command structure.

---

### Communications

The University will employ the communications measures determined by University Relations and University leadership during an infectious disease emergency.

These communications measures include emergency notifications and interoperable radio communications for first responders. Per the incident command structure detailed above, University Relations will coordinate external communications.

### Work Group Responsibilities

---

---

---

---

---
<table>
<thead>
<tr>
<th>Public Safety</th>
</tr>
</thead>
</table>
| - Provide personal protective equipment to community members.  
- Serve as a resource for University units with cleaning/disinfecting questions and concerns.  
- Stand up contact tracing operations as necessary.  
- Consider the needs of community members returning from overseas and hotspot travel.  
- Ensure community members follow gubernatorial executive orders and University social distancing policies. |

<table>
<thead>
<tr>
<th>Public Information</th>
</tr>
</thead>
</table>
| - In conjunction with Information Technology, develop a VCU disease specific website which will serve as a hub for all disease related information including class status, faculty and staff work locations, and other University operations.  
- Monitor social media for potential outbreaks in the University community, and for any frequently asked questions or concerns from the public. |

<table>
<thead>
<tr>
<th>Hospital</th>
</tr>
</thead>
</table>
| - Provide subject matter expertise to the Incident Coordination Team.  
- Provide regular updates to the ICT.  
- Assist in the testing of community members.  
- Assist in contact tracing.  
- Prepare for patient surge as necessary. |

<table>
<thead>
<tr>
<th>Transportation</th>
</tr>
</thead>
</table>
| - Consider temporarily waiving parking rates based on the University’s work from home policy.  
- Determine if specific parking decks/areas should be temporarily closed. |

<table>
<thead>
<tr>
<th>Information Technology</th>
</tr>
</thead>
</table>
| - Ensure the VCU website is capable of handling higher demand.  
- Develop guidance for the use of distance learning and teleworking technologies. |

<table>
<thead>
<tr>
<th>Facilities</th>
</tr>
</thead>
<tbody>
<tr>
<td>- Assist University partners in converting residence halls and other facilities to hospital annexes.</td>

</thead>
</table>
| - Track all pandemic related expenditures in anticipation of a state and/or federal disaster declaration.  
- Coordinate donations management. |

<table>
<thead>
<tr>
<th>Infectious Disease Continuity of Operations Plan Activation and Transition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Infectious Disease COOP Organizational Structure</td>
</tr>
</tbody>
</table>
The same command and control structure detailed in the Crisis and Emergency Management Plan will be used during an infectious disease emergency. The work groups outlined in the response command structure will transition to the below continuity structure for the purpose of continuing VCU’s ability to deliver its essential functions to faculty, staff, students, patients, and visitors. Both organizational charts illustrate the connections and interdependencies between response and business continuity, so there is a need for both pre-disaster and post-disaster coordination, and some entities may have overlapping responsibilities during this transition. Given the unexpected duration and potential multiple waves of pandemic outbreaks, the VCU ICT Executive Committee must review the process involved in carrying out essential functions and services in order to develop policies that mitigate the effects of the pandemic while simultaneously allowing the continuation of operations which support essential functions.

**ICT Executive Committee**
- Overseen by the ICT Leader
- Consists of the following Cabinet members: Vice President of Administration, Provost and Senior Vice President of Academic Affairs, Vice President of Research and Innovation, Vice Provost of Student Affairs, Vice President of University Relations and Senior Vice President for Health Sciences and CEO of the VCU Health System
- Sets incident objectives, approves recommendations from the ICT or Public Health Response Team

**VCU Health System Advisors**
- Provide information about current health conditions and hospital resources and capacity and a local, regional and national level
- Advise and consult on of protocols and recommendations from the PHRT
- Collaborate with the ICT leader to implement recommendations from the PHRT

**Communications and Government Relations**
- Develop and maintain plans and procedures to support emergency communications and public outreach during emergencies.
- Coordinate the dissemination of information to students, staff, faculty, visitors, and the public during emergencies or disasters.
- Ensure accurate and factual information concerning an emergency involving VCU and its personnel is provided to the news media.
- Serve as the only authorized representative to release information to the media
- Liaises with city and state officials, VCH and SCHEV on behalf of the university

**Safety and Health**
- Develop safety protocols for the university, including call center operations and contact tracing team

**Public Health Response Team**
- Consists of a cross functional team from VCU, VCU Health and the Virginia Department of Health
- Monitor the prevalence of communicable disease in the VCU community and develop protocols for response to rise in incidence rate
- Develop protocols for call center operations and contact tracing team
- Manage response to local outbreaks of communicable disease
- Make recommendations to VCU administration regarding local and general closure

**Faculty and Staff HR**
- To promote the protection and preservation of VCU’s human resources before, during, and after a major emergency or disaster
- To promote continuity of operations and the management of essential staff
- Coordinates employee health care and consultation through Employee Health Services.

**Academic Affairs Team**
- This work group focuses on the academic calendar and academic policies and procedures to ensure continuity of academic operations
- Prepare and support students and faculty for changes in modality due to an emergency event.
Research and Animals
- To promote the protection and preservation of VCU’s research resources, functions, and personnel before, during, and after a major emergency or disaster.

Student Services
- This committee focuses on providing mass care, sheltering and the provision of food, water, and commodities distribution to students.
- Provides medical care and consultation through student health services.

Academic Continuity
- This work group focuses on the academic calendar and academic policies and procedures to ensure continuity of academic operations
- Prepare and support students and faculty for changes in modality due to an emergency event.

International
- Focuses on international students and crisis related legal and policy changes that may impact their study at VCU
- Reviews and recommends travel policies as related to international travel of faculty and students.
- Oversees study abroad programming and make adjustments as needed in response to emergency event.

Strategic Enrollment Management
- Support student success by ensuring continuity of student support services during an emergency event.

Community Engagement
- Liaises with community and experiential learning partners. Communicates updates and changes to those partners.

Hazard Subsets
A significant and recurring risk to the University is that of an infectious disease emergency. One common example, influenza, also known as the flu, is a disease that infects the respiratory tract (nose, throat, and lungs). Although the seasonal flu is not usually fatal, complications can arise. The seasonal flu kills an average of over 50,000 U.S. citizens every year, sends some 700,000 to the hospital, and causes countless lost days of school and work. Pandemic influenza occurs when a novel influenza virus appears that causes readily transmissible human illness.

<table>
<thead>
<tr>
<th>Phases of the Hazard</th>
<th>World Health Organization phases</th>
<th>CDC intervals</th>
<th>Federal indicators for CDC intervals</th>
<th>State/Local indicators for CDC intervals</th>
</tr>
</thead>
<tbody>
<tr>
<td>Phase IV: Human to human transmission of an animal or human-animal influenza virus able to sustain community-level outbreaks has been verified.</td>
<td>Initiation of a pandemic wave</td>
<td>Confirmation of human cases of a pandemic influenza virus anywhere in the world with demonstrated efficient and sustained human-to-human transmission.</td>
<td>Confirmation of human cases of a pandemic influenza virus in the United States with demonstrated efficient and sustained human-to-human transmission.</td>
<td></td>
</tr>
<tr>
<td>Phase V: The same identified virus has caused sustained community-level outbreaks in two or more countries in one WHO region.</td>
<td>Acceleration of a pandemic wave</td>
<td>Consistently increasing rate of pandemic influenza cases identified in the United States, indicating established transmission.</td>
<td>Consistently increasing rate of pandemic influenza cases identified in the state, indicating established transmission.</td>
<td></td>
</tr>
<tr>
<td>Phase VI: In addition to criteria in Phase V, the same virus has caused sustained community-level outbreaks in at least one other country in another WHO region.</td>
<td>Deceleration of a pandemic wave</td>
<td>Consistently decreasing rate of pandemic influenza cases in the United States.</td>
<td>Consistently decreasing rate of pandemic influenza cases in the state.</td>
<td></td>
</tr>
<tr>
<td>Post Peak Period: Levels of pandemic influenza in most countries with adequate surveillance have dropped below peak levels.</td>
<td>Preparation for future pandemic waves</td>
<td>Low pandemic influenza activity with possible continued outbreaks in certain jurisdictions.</td>
<td>Low pandemic influenza activity with possible continued outbreaks in the state.</td>
<td></td>
</tr>
</tbody>
</table>

Annex Maintenance
This annex will be developed and maintained in accordance with the procedures detailed in the Crisis and Emergency Management Plan.
### Hazard Specific Annex

**Hazard Specific Annex 2: Active Threat**

#### Purpose, Scope, and Assumptions

**Purpose**

This document is an annex to Virginia Commonwealth University’s Crisis and Emergency Management Plan (CEMP). The Active Threat Annex provides a framework for preparedness and response activities and serves as a foundation for further planning, drills, and emergency preparedness activities. The information in this document serves as a supplement to, and not replacement for, the information in the Crisis and Emergency Management Plan. This document addresses information specific to active threat-related emergencies that are not covered in the Crisis and Emergency Management Plan. Additionally, this annex does not replace the responsibility for specific departments involved in responding to an active threat emergency to develop appropriate policies and procedures for that response.

**Scope**

This annex is limited to mitigation, preparedness, response, and recovery for the Monroe Park Campus (MPC), Medical Education Campus, and satellite campuses and facilities as appropriate.

#### Situation

An active threat situation is one in which one or more persons are using weapons, including but not limited to knives, firearms, and chemical agents to kill other persons in a populated area. The key component to an active threat situation is the unimpeded and ongoing threat to human life.

According to the Federal Bureau of Investigation 28 incidents met active shooter criteria in 2019 resulting in 97 deaths and 150 injuries. The FBI also states the majority of active threat incidents have a duration of less than five minutes, with nearly a quarter lasting less than two minutes. Although the length of the active threat may be minimal, recovering from this type of incident may take months or years.

#### Threat and Vulnerability

The VCU Police Department, City of Richmond Police Department, Virginia State Police, and Virginia Department of Emergency Management monitor potential and ongoing threats across the nation and commonwealth. Most active threat incidents fit into the following categories:

- **Conventional attack** - violent acts carried out by one or more persons. These attacks typically occur at soft targets and involve widely available weapons, but are not complex.

- **Complex Coordinated Attack** - A complex coordinated attack (or complex coordinated terrorist attack) is a violent assault or series of assaults that employs one or more types of weapons, intends to injure or kill large numbers of people, and meets the following two criteria:
  
  - Criterion 1: The attack is multi-phased or takes place at multiple sites, or both. (Phases can include assault phases, such as shootings, bombings, and arson; and/or non-assault phases such as hostages, car chases, sieges, barricades, kidnappings, and manhunts, etc.)
  
  - Criterion 2: The attack must take place within geographic and temporal circumstances that result in unusual strain on command, information sharing/situational awareness, and/or resource allocation.

Note - the FBI and Virginia State Police will determine if an act is considered terrorism.

Both types of attacks listed above target soft targets, or those which have minimal to no security, entry screening, and unrestricted access. As such, most VCU buildings are vulnerable to an active threat incident. However, the most vulnerable facilities may be the student commons, university academic buildings, university administrative buildings, and university student housing.

#### Capability and Mitigation Overview

#### Planning Assumptions
The University has certain capabilities and resources that are available for any emergency but are likely to be used in an active shooter incident, including:

- VCU Police Department
- Space Management/Facilities Management
- University Student Health Services
- Environmental Health and Safety staff and resources
- VCU Health System staff and resources
- University Counseling Services staff and resources

The University conducts a variety of active threat mitigation activities including law enforcement response training, mental health counseling, outreach to building managers, and placing easily accessible signs/placards in buildings.

The planning assumptions below are based on guidance from the Federal Bureau of Investigation and After Actions Reports from various active threat incidents.

- Geopolitical events and tensions may impact the risk of an active threat incident.
- The true number of assailants may be unknown throughout the incident, even if one or more are neutralized.
- An off campus active threat incident may impact the University community if the assailants move onto campus.
- The location of casualties will be unknown until a detailed sweep of the area is conducted.
- The size and speed of the public safety response will depend on other active incidents.
- A conventional attack has a high probability of lasting less than five minutes from the first attack.
- Key university decision making personnel may be incapacitated.
- There may be conflicting reports from those on scene, whether first responders, community members, or media.
- Facilities may be inaccessible for days, weeks, or months while law enforcement conducts an investigation.
- VCUHS may be overwhelmed due to the number of patients. As such, patients, including university community members, may be transported to other trauma centers in the Commonwealth.

### Concept of Operations

#### University Responsibilities

The University utilizes the Incident Command System and the National Incident Management System to manage active threat incidents.

The University's response to the event will be under the direction of the Incident Commander in collaboration with the Incident Coordination Team (ICT).

Non-tasked departments may be called upon to provide assistance where needed.

The University is responsible for protecting life and property from the effects of an active threat incident on campus. The University has the primary responsibility for the management of an active threat incident that occurs on campus or impacts the University community. The University is responsible for coordinating amongst external agencies that also respond to active threat incidents on campus.

The University's top priorities during an active threat incident are to:

- Protect the lives, health, and safety of students, faculty, staff, visitors, and emergency responders.
- Ensure the security of the university.
- Account for known community members.
- Protect and restore critical infrastructure and key University resources.
- Facilitate the recovery of University individuals.
- Protect University property and mitigate damage to the University.
- Restore University operations.
- Share actionable information with partner agencies.

### Key Areas of Emergency Planning and Incident Management

#### Description

The University’s Crisis and Emergency Management Plan notes the various activities the University conducts before, during, and after an emergency. Examples of the specific activities that the University conducts regarding an active threat emergency are:

#### Mitigation

The University conducts mitigation activities to lessen the impact of an active threat incident. Some of the mitigation activities related to an active threat incident are listed below.

- University Student Health Services and the employee assistance program make counseling services available to students, faculty, and staff.
- Flyers and other informational material including "run, hide, fight" are strategically placed throughout campus.
- VCU Police conduct building walkthroughs and offer suggestions to enhance physical and technological security.
- Widespread availability of technologies such as the desktop red “emergency button” and the Emergency Reporting Telephone System (ERTS).

#### Preparedness

The University conducts preparedness activities to develop the response capabilities needed in the event of an active threat incident. Some of those activities are listed below:

- Emergency planning, including maintaining this annex and associated procedures, and
- VCU Police and local/regional public safety partners conduct and participate in tests, training, and exercises related to active threat incidents.
- VCU Emergency Preparedness maintains relationships with state, local, and non-governmental partners in the event a Family Assistance Center (FAC) is needed.
- University departments and units maintain all-hazards continuity of operations plans.
The University will respond to an active threat incident that affects its community. Response activities may include, but are not limited to:

- VCU Police and other law enforcement response to the scene(s) of the incident.
- Multiagency Fire/EMS response to the incident.
- Activation of campus emergency notification systems.
- VCUHS mass casualty incident procedures are activated.
- Activation of the Incident Coordination Team (ICT).
- Notification to the City of Richmond Office of Emergency Management and Virginia Department of Emergency Management (VDEM).
- VDEM may activate a Family Assistance Center if warranted.
- Activation of continuity of operations plans as needed.

**Recovery**

The University will conduct recovery activities in the aftermath of an active threat incident. Recovery activities will focus on returning the University to normal operations as well as developing any Corrective Action Plans to improve preparedness and response capabilities.

- A continuation of FAC services as needed.
- After action reporting.

**Levels of Readiness and Activation**

<table>
<thead>
<tr>
<th>Level I - Steady State Operations (Green)</th>
<th>Level II - Increased Readiness (Yellow)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Active threat incidents pose a moderate to minimal risk to students, faculty, and staff. The University continues to conduct normal business and the VCU Police Department, in coordination with outside law enforcement partners, tracks threats. This is the default level of readiness and activation for the University. The University emphasizes prevention and preparedness activities. Typical activities:</td>
<td></td>
</tr>
</tbody>
</table>
| - Tracking threats  
- Public awareness and information campaigns.  
- Planning, organizing, exercising, and training across University departments and units, including the Incident Coordination Team. |
| Active threat incidents pose an increased risk to students, faculty, and staff. Actions may include more frequent coordination between law enforcement and public safety partners, and increased police patrols. Typical activities: The Incident Coordination Team may meet to discuss the increased threat level. |

<table>
<thead>
<tr>
<th>Level III - Partial Activation (Orange)</th>
<th>Level IV - Full Activation (Red)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Active threat incidents pose a significant risk to students, faculty, and staff. Although an incident may not have occurred, University operations will be impacted or cancelled due to the potential for an incident. Classes, student activities, and some non-essential functions may be ceased for a period of time. Typical activities:</td>
<td></td>
</tr>
</tbody>
</table>
| - More frequent coordination between law enforcement and public safety partners.  
- Increased police patrols.  
- More frequent Incident Coordination Team meetings to discuss the evolving situation. |
| Active threat incidents pose a major and/or confirmed risk to students, faculty, and staff. An incident may have occurred on campus. The University does not have most, if not all, of the resources required to respond to the incident. University operations and activities may be impacted or cancelled. Typical activities: |
| - Active and ongoing, on scene, coordination between public safety partners.  
- More frequent Incident Coordination Team meetings to discuss the evolving situation.  
- Coordination with state agency partners to determine the need for a Family Assistance Center. |

**Hazard Response Activation**

The response activities detailed in this annex will be activated in accordance with needs, available resources, and the declared readiness level. The Associate Vice President for Public Safety and Vice President for Administration will determine if this annex needs to be activated. Activation will follow the guidelines set forth in the Crisis and Emergency Management Plan.

**Direction, Control, Organization, and Coordination**

**Command and Control**
The same command and control structure detailed in the Crisis and Emergency Management Plan will be used during an active threat incident. The depiction below summarizes that command structure.

Communications

The University will employ the communications measures determined by University Relations and University leadership during an active threat incident. These communications measures include emergency notifications and interoperable radio communications for first responders. Per the incident command structure detailed above, University Relations will coordinate external communications.

Work Group Responsibilities

Public Safety

- Respond to the threat.
- Provide real time updates to the ICT from the incident command post.
- Provide security and traffic control measures at the scene of the incident and the Family Assistance Center if necessary.
- Coordinate with external emergency management and public safety partners during the response and recovery phases.
- Determine if VCU community members have been transported to hospitals other than VCUHS. If this is the case, the Public Safety Workgroup will track these persons.
- Activate campus emergency notification systems throughout the incident as necessary.

Public Information

- In conjunction with Information Technology, develop a VCU incident website which will serve as a hub for all incident related information including class status, changes to work locations, and other University operations.
- Consider the need for emergency notifications.
- Monitor social media for information regarding assailants and frequently asked questions.
- In coordination with the Public Safety Workgroup, determine if Virginia 2-1-1 should be activated.

Hospital

- Provide real time updates to the ICT including triage counts.
- Contact hospital emergency management partners for assistance.

Transportation

- Make buses and other forms of transportation available should they be needed.
- In coordination with the Public Safety and Public Information Workgroups, select parking lots that are capable of holding media and friends/family of community members.

Information Technology

- Ensure the VCU website is capable of handling higher demand.
- Develop guidance for the use of distance learning and teleworking technologies if needed.

Facilities
• Provide facility blueprints/maps to assist responding agencies.
• Assist the Public Safety Workgroup/VDEM in selecting a suitable Family Assistance Center location. As the Commonwealth's FAC lead agency, VDEM may choose a location that is not VCU property.

### Academic Affairs and Student Group
- In coordination with the Public Safety Workgroup, begin accounting for known community members.
- In coordination with the Public Safety Workgroup, begin contacting casualty family members/emergency contacts.
- Consider implement a pass/fail option for students.
- Determine if the academic calendar should be modified.
- Provide mental health services to community members.

### Employee Group
- Notify the Employee Assistance Program representative.
- In coordination with the Public Safety Workgroup, begin contacting casualty family members/emergency contacts.
- In coordination with the Public Safety Workgroup, begin accounting for known community members.

### Research
- Activate internal emergency operations plans as needed.

### Business
- Track all incident related expenditures.
- Coordinate donations management.

### Hazard Subsets

<table>
<thead>
<tr>

<td>Occurs in more than one phase or more than one location</td>
</tr>
<tr>
<td></td>
<td>Takes place within a geographic or temporal circumstance that results in unusual strain on resources</td>
</tr>
</tbody>
</table>

### Phases of the Hazard

#### Pre-Incident
- University engages in threat monitoring and public education.
- Potential actors may be planning their attack, choosing soft targets and/or specific individuals, and obtaining weapons.

#### Initial and Subsequent Attacks
- An actor(s) carries out the initial attack causing casualties. This initiates a public safety response.
- An actor may conduct secondary attacks against responders, or other complex-coordinated attacks, causing an increased demand for public safety resources.
- Emergency notification systems are activated.
- Those in the vicinity of the shooter are urged to run, hide, or fight as deemed appropriate by the situation.
- Local and regional public safety partners are requested to respond.

#### Response
- Law enforcement responds to the incident and attempts to neutralize the active threat.
- Fire and EMS respond to the incident to triage and treat casualties.
- The Virginia Department of Emergency Management activates a Family Assistance Center, in conjunction with VCU, applicable state agencies, and non-governmental partners.

#### Recovery
- FAC operations include other services as needed, including mental health and donations management support.
- Depending on the time of year, classes and University operations may be shifted to alternate locations or delayed/cancelled.

</table>

Situation

<table>
<thead>
<tr>
<th>Threat and Vulnerability</th>
</tr>
</thead>
<tbody>
<tr>
<td>Severe winter weather typically occurs between December 1 and February 28 of each year, however, impacts are highly variable and difficult to predict. For example, the 2019-2020 season saw the highest minimum temperature (20°F) on record since 1908-1909 (18°F), higher than the 1981-2010 average of 8°F. That same season also saw only 1.5&quot; of snow, significantly less than the 1981-2010 average of 10.3&quot;. In contrast, the 2018 and 2017 winter weather seasons saw a total of 13.1&quot; and 12.4&quot; of snow respectively.</td>
</tr>
<tr>
<td>The VCU Police Department Office of Emergency Preparedness, City of Richmond Office of Emergency Management, and Virginia Department of Emergency Management monitor potential winter weather systems that may impact Virginia and the Richmond area.</td>
</tr>
<tr>
<td>Severe winter weather can include the following threats:</td>
</tr>
<tr>
<td>- Snowfall</td>
</tr>
<tr>
<td>- Freezing rain - occurs when the layer of freezing air is so thin that the raindrops do not have enough time to freeze before reaching the ground. Instead, the water freezes on contact with the surface, creating a coating of ice on whatever the raindrops contact.</td>
</tr>
<tr>
<td>- Sleet - frozen raindrops that accumulate on cold surfaces.</td>
</tr>
<tr>
<td>- Damaging winds - severe winter weather may include strong wind gusts and sustained winds. Winds impact visibility and can cause power outages.</td>
</tr>
<tr>
<td>- Accumulated ice - can cause power outages if left untreated on power lines.</td>
</tr>
<tr>
<td>- Cold weather injuries - occur when there is an imbalance of body temperature regulation, or where heat loss is greater than heat production in an area of the body (or the body core). There are 4 primary types of cold injuries: hypothermia, frostbite, non-freezing cold injuries, and injuries related to cold exposure.</td>
</tr>
<tr>
<td>- Power outages can be caused by a combination of the above associated hazards.</td>
</tr>
<tr>
<td>Blizzards are a specific form of severe winter weather that meet the following three criteria:</td>
</tr>
<tr>
<td>- The system has sustained or frequent wind gusts of 35 mph or greater.</td>
</tr>
<tr>
<td>- Falling/blowing snow reduces visibility to less than a quarter of a mile.</td>
</tr>
<tr>
<td>- These conditions exist for at least three consecutive hours.</td>
</tr>
<tr>
<td>Unlike tropical cyclones, winter weather rarely damages the exterior of buildings and facilities. Because VCU is located in an urban setting, impacts are primarily seen on walkways, stairs, and streets due to un navigable snow and ice accumulation. Areas of campus most vulnerable to these threats and subsequent issues are sloped areas and walkways and streets which have not been treated and plowed. Members of the VCU community most vulnerable to these hazards are those who may attempt to walk/bike without proper clothing and those whose vehicles have difficulty navigating through snow and over ice.</td>
</tr>
</tbody>
</table>
The University has certain capabilities and resources that are available for any emergency but are likely to be used for severe winter weather, including:

- VCU Police Department
- Facilities Management
- VCU Parking and Transportation

The University, and the City of Richmond, conduct a variety of threat mitigation activities including improving, pre-treating, and plowing roadways. Additionally, both the University and the City conduct public education campaigns.

The planning assumptions below are based on guidance from the Virginia Department of Emergency Management, Federal Emergency Management Agency, National Weather Service, and lessons learned from various severe winter weather incidents.

- Public warning and communications systems may be disrupted due to high winds and accumulated ice/snow.
- Pre-disaster warning time will be abundant.
- There may be conflicting forecasts from different weather agencies and organizations.
- There may be conflicting reports from those on scene of the incident.
- Due to the geographic scale of severe winter weather, assistance from surrounding jurisdictions may not be immediately available.
- Facilities may be inaccessible for days while walkways and roadways are cleared, while damage assessments, and repairs are made.
- The City of Richmond has the primary responsibility to pre-treat and plow roadways.

Concept of Operations

The University utilizes the Incident Command System and the National Incident Management System to manage the effects of severe winter weather.

The University's response to the event will be under the direction of the Incident Commander in collaboration with the Incident Coordination Team (ICT).

Non-tasked departments may be called upon to provide assistance where needed.

The University is responsible for protecting life and property from the effects of severe winter weather on campus. The University has the primary responsibility for the management of a winter weather system that impacts the University community. The University is responsible for coordinating amongst external agencies that also respond to the effects of severe winter weather on campus.

The University's top priorities during a severe winter weather response are to:

- Protect the lives, health, and safety of students, faculty, staff, visitors, and emergency responders.
- Ensure the security of the University.
- Account for known community members.
- Protect and restore critical infrastructure and key University resources.
- Facility the recovery of University Individuals.
- Protect University property and mitigate damage to the University.
- Restore University operations.
- Share actionable information with partner agencies.
- Conduct a damage assessment to begin the state and federal reimbursement processes.

Key Areas of Emergency Planning and Incident Management

Description

The University’s Crisis and Emergency Management Plan notes the various activities the University conducts before, during, and after an emergency. Examples of the specific activities that the University conducts regarding severe winter weather are:

Mitigation

The University conducts mitigation activities to lesson the impact of severe winter weather. Some of those activities are listed below:

- Building and maintaining walkways, stairs, and roadways that are disaster resilient.
- Conducting public awareness campaigns prior to the winter season.
- Ensuring the readiness of alerting technologies.

Preparedness

The University conducts preparedness activities to develop the response capabilities needed in the event of severe winter weather impact the University. Some of those activities are listed below:

- Emergency planning, including maintaining this annex and associated procedures.
- VCU Emergency Preparedness and local/regional public safety partners conduct and participate in tests, training, and exercises related to severe winter weather.
- University departments and units maintain all-hazards continuity of operations plans.

Response
The University will respond to a severe winter weather emergency that affects its community. Response activities may include, but are not limited to:

- Activation of campus emergency notification systems as needed.
- Activation of the Incident Command Team (ICT).
- Activation of continuity of operations plans as needed.
- Facilities Management response to damaged buildings.
- Facilities Management response to clear and treat walkways.
- VCU Police response to impassable roadways to divert traffic as needed.
- Delivering necessary supplies to those in on-campus housing should roadways and sidewalks be impassable.

Recovery

The University will conduct recovery activities in the aftermath of severe winter weather. These activities will focus on returning the University to normal operations as well as developing Corrective Action Plans to improve preparedness and response capabilities.

- Conducting a damage assessment which will be sent to the City of Richmond Office of Emergency Management and Virginia Department of Emergency Management. This initiates the state/federal reimbursement process for damages and emergency expenditures.
- After action reporting.

Levels of Readiness and Activation

<table>
<thead>
<tr>
<th>Level I - Steady State Operations (Green)</th>
<th>Level II - Increased Readiness (Yellow)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Winter weather poses a moderate risk to students, faculty, and staff. The University continues to conduct normal business and VCU Emergency Preparedness, in coordination with external emergency management and weather partners, tracks winter weather systems.</td>
<td>Winter weather poses a increased risk to the VCU community. National Weather Service (NWS) Wakefield has disseminated suggesting the University may be in the path of a winter weather system, or may be threatened by associated hazards such as high winds.</td>
</tr>
<tr>
<td>This is the default level of readiness and activation for the University. The University emphasizes prevention and preparedness activities.</td>
<td>Actions may include more frequent coordination between emergency management and weather partners.</td>
</tr>
<tr>
<td>Typical activities:</td>
<td>Typical activities:</td>
</tr>
<tr>

Hazard Response Activation

The response activities detailed in this annex will be activated in accordance with needs, available resources, and the declared readiness level. The Associate Vice President and Vice President for Administration will determine if this annex needs to be activated. Activation will follow the guidelines set forth in the Crisis and Emergency Management Plan.

Direction, Control, Organization, and Coordination

Command and Control
The same command and control structure detailed in the Crisis and Emergency Management Plan will be used in response to severe winter weather.

Communications
The University will employ the communications measures determined by University Relations and University leadership during severe winter weather. The communications measures include emergency notifications and interoperable radio communications for first responders. Per the incident command structure detailed above, University Relations will coordinate external communications.

Work Group Responsibilities

Public Safety
- Participate in National Weather Service and emergency management conference calls.
- Request resources from the City of Richmond and Virginia Department of Emergency Management.
- Provide real time updates to the ICT.
- Provide security and traffic control measures before, during, and after system impacts.
- Coordinate with external emergency management and public safety partners during the response and recovery phases.

Public Information
- Monitor social media for information regarding storm impacts and frequently asked questions.

Hospital
- Contact hospital emergency management partners for assistance.

Transportation
- Select parking lots that are capable of holding equipment, vehicles, and resources that may be needed throughout the incident. The request for staging areas may come from the University, state agencies, or City partners.

Information Technology
- Should academic facilities and offices be damaged, develop guidance for the use of distance working and teleworking technologies.
- Coordinate the restoration of communications and information technology systems.

Facilities
- Implement protective measures for University facilities including clearing and treating walkways.
- Conduct and Initial Damage Assessment (IDA).

Academic Affairs and Student Group
- Determine if the academic calendar should be modified.
- Assist University Relations in disseminating messages to students.
- Should the system have extreme or crippling impacts on the Richmond area, provide food, water, and other necessities to those in University housing.

**Employee Group**
- Assist University Relations in disseminating messages to faculty and staff.

**Research**
- Activate internal emergency operations plans as needed.

**Business**
- Track all incident related expenditures in anticipation of a state and/or federal disaster declaration.

**Hazard Subsets**
The Northeast Snowfall Impact Scale (NESIS) characterizes and ranks high-impact Northeast snowstorms. These storms have large areas of 10 inch snowfall accumulations and greater. NESIS has five categories: Extreme, Crippling, Major, Significant, and Notable. The index differs from other meteorological indices in that it uses population information in addition to meteorological measurements. Thus NESIS gives an indication of a storm's societal impacts. This scale was developed because of the impact Northeast snowstorms can have on the rest of the country in terms of transportation and the economy.

<table>

<tbody>
<tr>
<td>This document is an annex to Virginia Commonwealth University’s Crisis and Emergency Management Plan (CEMP). The Tropical Cyclone Annex provides a framework for preparedness and response activities and serves as a foundation for further planning, drills, and emergency preparedness activities. The information in this document serves as a supplement to, and not replacement for, the information in the Crisis and Emergency Management Plan. This document addresses information specific to tropical cyclone-related emergencies that are not covered in the Crisis and Emergency Management Plan. Additionally, this annex does not replace the responsibility for specific departments involved in responding to a tropical cyclone to develop appropriate policies and procedures for that response.</td>
<td>This annex is limited to mitigation, preparedness, response, and recovery for the Monroe Park Campus (MPC), Medical College of Virginia (MCV), and satellite campuses and facilities as appropriate.</td>
</tr>
</tbody>
</table>

#### Situation

**Threat and Vulnerability**

A tropical cyclone is a rotating, organized system, of clouds and thunderstorms that originates over tropical or subtropical waters and has a closed low-level circulation. Tropical cyclones rotate counterclockwise in the Northern Hemisphere and are classified as tropical depressions, tropical storms, hurricanes, or major hurricanes.

In 2019, the National Hurricane Center (NHC) reported a total of 20 tropical cyclones in the North Atlantic. Although no named hurricanes made landfall in 2019, it is estimated that the U.S. suffered approximately $22 billion in direct damages in economic impacts. Between 1981 and 2010 there have been an average of 12.1 named storms, 6.4 hurricanes, and 2.7 major hurricanes each year.

In 2019, the National Hurricane Center (NHC) reported a total of 20 tropical cyclones in the North Atlantic. Although no named hurricanes made landfall in 2019, it is estimated that the U.S. suffered approximately $22 billion in direct damages in economic impacts. Between 1981 and 2010 there have been an average of 12.1 named storms, 6.4 hurricanes, and 2.7 major hurricanes each year.

Three primary treats to VCU exist related to tropical systems:

- **Damaging winds and tornadoes**: Tropical cyclones often produce high sustained winds and wind gusts that can damage physical structures, damage property, and disrupt utility services. Tornadic activity associated with tropical cyclones is also a threat to the Richmond area as evidenced during Hurricane Florence's impacts in September, 2018. Tornadoes also disrupt utilities and damage property, but are much more difficult to predict and can spawn without little to no warning.
- **Rainfall and inland flooding**: Intense rainfall is not directly related to the wind speed of the hurricane. Some of the greatest rainfall amounts occur from weaker storms that drift slowly or stall over an area. Inland flooding can be a major threat to communities hundreds of miles from the coast as intense rain falls from these large tropical air masses. Inland flooding is responsible for more than half of the deaths associated with hurricanes.
- **Flash floods**: Flash flooding, defined as a rapid rise in water levels, can occur quickly due to rainfall. Longer term flooding on rivers and streams can begin and persist several days after the storm.
- **Storm Surge**: Storm surge is an abnormal and dangerous rise of water pushed onto the shore by strong winds from a hurricane or tropical storm. A storm surge can increase the normal high tide by 15 feet or more and is the main reason why evacuations are ordered. Although it is highly unlikely for VCU to be directly affected by storm surge, the community may see hundreds or thousands of evacuees in our footprint and facilities, including the Siegel Center, which has been designated a State Coordinated Regional Shelter.

VCU facilities and properties most vulnerable to flash flooding and inland flooding are those that have below ground components, those which lie at the bottom of hills, and those which have poor drainage surrounding them. Students, faculty, staff, and emergency responders may also have difficulty traversing campus due to flooded streets and walkways.

#### Capability and Mitigation Overview

#### Planning Assumptions

[64 | VCU CEMP]
The University has certain capabilities and resources that are available for any emergency but are likely to be used for a tropical cyclone incident, including:

- VCU Police Department
- Space Management/Facilities Management
- Environmental Health and Safety staff and resources
- VCU Parking and Transportation
- VCU Health System staff and resources

The University, and the City of Richmond, conduct a variety of threat mitigation activities including water management, improving streets and walkways, improving natural drainage, and building resilient facilities.

The planning assumptions below are based on guidance from the Virginia Department of Emergency Management, Federal Emergency Management Agency, National Weather Service, and lessons learned from various tropical cyclone incidents.

- Public warning and communications systems may be disrupted due to high winds and flooding.
- Pre-disaster warning time will vary; however, the National Weather Service will detect and track a tropical cyclone in time for effective action to be taken.
- The impact to VCU's campuses may be determined by evacuations from coastal Virginia.
- There may be conflicting reports from those on scene of the incident/incidents.
- There may be delays in collecting, assimilating, and disseminating information.
- Due to the geographic scale of tropical cyclones, assistance from surrounding jurisdictions may not be immediately available.
- Facilities may be inaccessible for days, weeks, or months while damage assessments are conducted and repairs are made.

### Concept of Operations

**Concept of Operations**

The University utilizes the Incident Command System and the National Incident Management System to manage active threat incidents.

The University's response to the event will be under the direction of the Incident Commander in collaboration with the Incident Coordination Team (ICT).

Non-tasked departments may be called upon to provide assistance where needed.

An effective response to a tropical cyclone is dependent on the development of plans, programs, and procedures, which will provide for the rapid mobilization and effective use of the resources, capabilities, and support from adjacent localities.

### University Responsibilities

The University is responsible for protecting life and property from the effects of a tropical cyclone on campus. The University has the primary responsibility for the management of a tropical cyclone that impacts the University community. The University is responsible for coordinating amongst external agencies that also respond to the effects of a tropical cyclone on campus.

The University's top priorities during a tropical cyclone response are to:

- Protect the lives, health, and safety of students, faculty, staff, visitors, and emergency responders.
- Ensure the security of the university.
- Account for known community members.
- Protect and restore critical infrastructure and key University resources.
- Facilitate the recovery of University Individuals.
- Protect University property and mitigate damage to the University.
- Restore University operations.
- Share actionable information with partner agencies.
- Conduct a damage assessment to begin the state and federal reimbursement processes.

### Key Areas of Emergency Planning and Incident Management

**Description**

The University's Crisis and Emergency Management Plan notes the various activities the University conducts before, during, and after an emergency. Examples of the specific activities that the University conducts regarding tropical cyclones are:

**Mitigation**

The University conducts mitigation activities to lessen the impact of a tropical cyclone. Some of those activities are listed below:

- Building and maintaining facilities that are disaster resilient.
- Conducting a public awareness campaign prior to hurricane season.
- Ensuring the readiness of alerting technologies should associated hazards develop.

**Preparedness**

The University conducts preparedness activities to develop the response capabilities needed in the event of a tropical cyclone. Some of those activities are listed below:

- Emergency planning, including maintaining this annex and associated procedures.
- VCU Emergency Preparedness and local/regional public safety partners conduct and participate in tests, training, and exercises related to tropical cyclone incidents.
- University departments and units maintain all-hazards continuity of operations plans.

**Response**

The University will respond to a tropical cyclone that affects its community. Response activities may include, but are not limited to:

- Activation of campus emergency notification systems as needed.
- Activation of the Incident Coordination Team (ICT).
- Activation of continuity of operations plans as needed.
- Facilities Management response to damaged buildings.
- VCU Police response to flooded roadways to divert traffic in a safe direction.
Recovery

The University will conduct recovery activities in the aftermath of a tropical cyclone. These activities will focus on returning the University to normal operations as well as developing Corrective Action Plans to improve preparedness and response capabilities.

- Conducting a damage assessment which will be sent to the City of Richmond Office of Emergency Management and Virginia Department of Emergency Management. This initiates the state/federal reimbursement process for damages and emergency expenditures.
- After action reporting.

## Levels of Readiness and Activation

<table>
<thead>
<tr>
<th>Level</th>
<th>Description</th>
<th>Typical activities</th>
</tr>
</thead>
</table>
| **Level I - Steady State Operations (Green)** | Tropical cyclones pose a moderate risk to students, faculty, and staff. The University continues to conduct normal business and VCU Emergency Preparedness, in coordination with external emergency management and weather partners, tracks cyclonic activity. | - Weather tracking.  
- Public awareness and information campaigns.  
- Planning, organizing, exercising, and training across University departments and units, including the Incident Coordination Team.  
- Applying for and using mitigating grant funds. |
| **Level II - Increased Readiness (Yellow)** | Tropical systems pose an increased risk to students, faculty, and staff. National Weather Service (NWS) Wakefield has disseminated guidance suggesting the University may be in the direct path of a tropical cyclone, or may be threatened by associated hazards. | - Actions may include more frequent coordination between emergency management and weather partners.  
- Typical activities: The Incident Coordination Team may meet to discuss the increased threat level. |
| **Level III - Partial Activation (Orange)** | Tropical systems pose a significant risk to students, faculty, and staff. National Weather Service Wakefield has disseminated guidance suggesting the University will most likely be directly impacted by a tropical cyclone. University operations will be impacted or cancelled due to the potential for an incident and classes, student activities, and some non-essential functions may be ceased for a period of time. | - More frequent coordination between emergency management and weather partners.  
- Facilities Management placing sandbags at flood prone facilities.  
- More frequent Incident Coordination Team meetings to discuss the evolving situation.  |
| **Level IV - Full Activation (Red)** | Tropical systems pose a major and/or confirmed risk to students, faculty, and staff. The University does not have most, if not all, of the resources required to respond to the incident. University operations and activities may be impacted or cancelled. | - Active and ongoing, on scene, coordination between public safety partners.  
- More frequent Incident Coordination Team meetings to discuss the evolving situation.  
- Coordination with state agency partners to determine the need for a Family Assistance Center. |

### Hazard Response Activation

The response activities detailed in this annex will be activated in accordance with needs, available resources, and the declared readiness level. The Associate Vice President for Public Safety and Vice President for Administration will determine if this annex needs to be activated. Activation will follow the guidelines set forth in the Crisis and Emergency Management Plan.

### Direction, Control, Organization, and Coordination

**Command and Control**
The same command and control structure detailed in the Crisis and Emergency Management Plan will be used during a tropical cyclone. The depiction below summarizes that command structure.

Communications
The University will employ the communications measures determined by University Relations and University leadership during a tropical cyclone. These communications measures include emergency notifications and interoperable radio communications for first responders. Per the incident command structure detailed above, University Relations will coordinate external communications.

Work Group Responsibilities

Public Safety
- Participate in National Weather Service and emergency management conference calls.
- Request resources from the City of Richmond and Virginia Department of Emergency Management.
- Provide real time updates to the ICT.
- Provide security and traffic control measures before, during, and after system impacts.
- Coordinate with external emergency management and public safety partners during the response and recovery phases.
- Activate campus emergency notification systems throughout the incident as necessary.
- Maintain situational awareness of evacuees in the City of Richmond, and Siegel Center operations should a State Coordinated Regional Shelter be activated.

Public Information
- Monitor social media for information regarding storm impacts and frequently asked questions.

Hospital
- Contact hospital emergency management partners for assistance.
- Prepare for patient surge as necessary.

Transportation
- Make buses and other forms of transportation available should they be needed.
- Select parking lots that are capable of holding equipment, vehicles, and resources that may be needed throughout the incident. The request for staging areas may come from the University, state agencies, or City partners.

Information Technology
- Should academic facilities and offices be damaged, develop guidance for the use of distance working and teleworking technologies.
- Coordinate the restoration of communications and information technology systems.

Facilities
- Implement protective measures for University facilities.
- Conduct an Initial Damage Assessment (IDA).
- Serve as a resource for state agency partners should a State Coordinated Regional Shelter be stood up in the Siegel Center.

**Academic Affairs and Student Group**
- Determine if the academic calendar should be modified.
- In coordination with the Public Safety Workgroup, begin accounting for known community members.

**Employee Group**
- In coordination with the Public Safety Workgroup, begin accounting for known community members.

**Research**
- Implement internal emergency plans as warranted.

**Business**
- Track all incident related expenditures in anticipation of a state and/or federal disaster declaration.
- Coordinate donations management.

## Hazard Specific Annex

### Hazard Specific Annex 5: Hazardous Materials Incidents

### Purpose, Scope, and Assumptions

<table>
<thead>
<tr>
<th>Purpose</th>
<th>Scope</th>
</tr>
</thead>
<tbody>
<tr>
<td>This document is an annex to Virginia Commonwealth University’s Crisis and Emergency Management Plan (CEMP). The Hazardous Materials Incident Annex provides a framework for preparedness and response activities and serves as a foundation for further planning, drills, and emergency preparedness activities. The information in this document serves as a supplement to, and not replacement for, the information in the Crisis and Emergency Management Plan. This document addresses information specific to hazardous materials related emergencies that are not covered in the Crisis and Emergency Management Plan. Additionally, this annex does not replace the responsibility for specific departments involved in responding to a hazardous materials incident to develop appropriate policies and procedures for that response.</td>
<td>This annex is limited to mitigation, preparedness, response, and recovery for the Monroe Park Campus (MPC), Medical College of Virginia (MCV), and satellite campuses and facilities as appropriate.</td>
</tr>
</tbody>
</table>

### Situation

<table>
<thead>
<tr>
<th>Threat and Vulnerability</th>
</tr>
</thead>
<tbody>
<tr>
<td>The VCU Police Department, Safety and Risk Management, City of Richmond Department of Fire and Emergency Services, and Virginia Department of Emergency Management routinely prepare for, and respond to, hazardous materials incidents. The most vulnerable segment of the University community are those who frequently use hazardous materials for research and testing, and those who study and work in those same facilities. However due to their proximity to railways and major highways, off-campus students and satellite offices are also vulnerable to hazardous materials incidents. The primary hazards associated with hazardous materials incidents are:</td>
</tr>
<tr>
<td>• Thermal harm - results from exposure to extreme temperatures. Thermal injuries can be external (from contacting, or being in close proximity to, a fire or other heat source) or internal (from inhaling fumes or heated air). Thermal injuries can also include frostbite from contact with low-temperature hazardous materials.</td>
</tr>
<tr>
<td>• Radiological harm - results from exposure to radioactive materials. The most harmful types of radiation cannot be seen, felt, or smelled. Special detection devices are required to monitor and measure levels of radiation. The radiation that poses a threat to humans in ionizing radiation, which can remove electrons from atoms and cause damage to living cells and DNA.</td>
</tr>
<tr>
<td>• Asphyxiation - results from exposure to materials that reduce oxygen to levels that may cause suffocation. This typically occurs in confined spaces or with extremely concentrated forms of simple asphyxiants.</td>
</tr>
<tr>
<td>• Chemical harm - results from exposure to chemicals, including poisons and corrosives. Injuries and illness vary by material. Chemical agents are classified according to the potential severity of their effects.</td>
</tr>
<tr>
<td>• Etiological (biological) harm - results from exposure to biochemical materials, which include bacteria, viruses, and biological toxins. Symptoms of etiological harm are often delayed, because the pathogens often require time to multiply sufficiently to cause illness in the person carrying the pathogen.</td>
</tr>
<tr>
<td>• Mechanical harm - results from exposure to, or contact with, fragmentation or debris scattered because of a pressure release, explosion, or boiling liquid expanding vapor explosion. The degree of harm is closely related to the size of the explosion and proximity to the device.</td>
</tr>
</tbody>
</table>

### Capability and Mitigation Overview

<table>
<thead>
<tr>
<th>Planning Assumptions</th>
</tr>
</thead>
<tbody>
<tr>
<td>A hazardous material is defined as matter or energy that when released is capable of creating harm to people, the environment, and property, including weapons of mass destruction as well as any other criminal use of hazardous materials, such as illicit labs, environmental crimes, or industrial sabotage. Hazardous materials are categorized in several ways. The Department of Transportation (DOT) organizes substances into nine classes. Another system, outlined in NFPA 704: Standard System for the Identification of the Hazards of Materials for Emergency Response identifies hazards by the severity of the hazard in three principal categories: health, flammability, and instability.</td>
</tr>
</tbody>
</table>
The University has certain capabilities and resources that are available for any emergency but are likely to be used during a hazardous materials incident, including:

- VCU Police Department
- Spacement Management/Facilities Management
- Research staff
- University Student Health Services
- Environmental Health and Safety staff and resources
- VCU Health System staff and resources

The University conducts a variety of mitigation activities including fire department and emergency medical services response training, outreach to building managers, and placing easily accessible hazard and exit signs in buildings.

The planning assumptions below are based on guidance from the Federal Emergency Management Agency and After Action Reports from various hazardous materials incidents.

- Facilities may be inaccessible for days, weeks, or months while decontamination and investigation occurs.
- The size and speed of the public safety response will depend on other active incidents.
- Key University decision makers may be incapacitated.
- There may be conflicting reports from those on scene, whether first responders, community members, or media.
- VCUHS may be overwhelmed due to the number of patients. As such, patients, including university community members, may be transported to other appropriate hospitals in the Richmond area and the Commonwealth.
- An incident may have an impact on the University community even if it occurs outside of the University’s footprint.

Concept of Operations

The University utilizes the Incident Command System and the National Incident Management System to manage hazardous materials incidents.

The University’s response to the event will be under the direction of the Incident Commander in collaboration with the Incident Coordination Team (ICT).

The Office of Environmental Health & Safety will provide subject matter expertise on the handling of hazardous materials incidents on campus.

Non-tasked departments may be called upon to provide assistance where needed.

The University is responsible for protecting life and property from the effects of a hazardous materials incident on campus. The University is responsible for coordinating amongst external agencies that also respond to hazardous materials incidents on campus.

The University’s top priorities during a hazardous materials incident are to:

- Protect the lives, health, and safety of students, faculty, staff, visitors, and emergency responders
- Ensure the security of the university
- Account for known community members
- Protect and restore critical infrastructure and key University resources
- Facilitate the recovery of University individuals
- Protect University property and mitigate damage to the University
- Restore University operations
- Share actionable information with partner agencies

Key Areas of Emergency Planning and Incident Management

Description

The University’s Crisis and Emergency Management Plan notes the various activities the University conducts before, during, and after an emergency. Examples of specific activities that the University conducts regarding a hazardous materials incident are:

Mitigation

The University conducts mitigation activities to lessen the impact of a hazardous materials incident. Some of those activities are listed below:

- Widespread availability of technologies such as the desktop red "emergency button" and the Emergency Reporting Telephone System (ERTS).
- Safety and Risk Management and VCU Police conduct building walkthroughs and offer suggestions to enhance physical and technological security.
- Regularly test and maintain ventilation systems in vulnerable University facilities.

Preparedness

The University conducts preparedness activities to develop the capabilities needed in the event of a hazardous materials emergency. Some of those activities are listed below:

- Emergency planning, including maintaining this annex and associated procedures.
- Train personnel to coordinate a hazardous materials incident response.

Response

The University will respond to an hazardous materials incident that affects its community. Response activities may include, but are not limited to:

- VCU Police and other law enforcement response to the scene(s) of the incident.
- Multijagancy Fire/EMS response to the incident. Activation of campus emergency notification systems.
- VCUHS mass casualty incident procedures are activated.
- Activation of the Incident Coordination Team (ICT).
- Notification to the City of Richmond Office of Emergency Management and Virginia Department of Emergency Management (VDEM).
- VDEM may activate a Family Assistance Center if warranted.
- Activation of continuity of operations plans as needed.

Recovery
The University will conduct recovery activities in the aftermath of a hazardous materials incident. These activities will focus on returning the University to normal operations as well as developing Corrective Action Plans to improve preparedness and response capabilities.

- A continuation of FAC services as needed.
- After action reporting.
- Determining the short and long term effects of the incident on the University.

### Levels of Readiness and Activation

<table>
<thead>
<tr>
<th>Level I - Steady State Operations (Green)</th>
<th>Level II - Increased Readiness (Yellow)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hazardous materials incidents pose a significant risk to students, faculty, and staff. The University continues to conduct normal business and the VCU Police Department, in coordination with outside law enforcement and emergency management partners, tracks threats.</td>
<td>Hazardous materials incidents pose an increased risk to the University community.</td>
</tr>
<tr>
<td>This is the default level of readiness and activation for the University. The University emphasizes prevention and preparedness activities.</td>
<td>Actions may include more frequent coordination between law enforcement and public safety partners, and increased police patrols.</td>
</tr>
<tr>
<td>Typical activities:</td>
<td>Typical activities: the potential for Incident Coordination Team meetings and conference calls to discuss the increased threat level</td>
</tr>
<tr>
<td>- Tracking threats</td>
<td></td>
</tr>
<tr>
<td>- Public awareness and information campaigns</td>
<td></td>
</tr>
<tr>
<td>- Planning, organizing, exercising, and training across University departments and units, including the Incident Coordination Team.</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Level III - Partial Activation (Orange)</th>
<th>Level IV - Full Activation (Red)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hazardous materials incidents pose a significant risk to the University community. Although an incident may not have occurred, University operations will be impacted or cancelled due to the potential for an incident. Classes, student activities, and some non-essential functions may cease for a period of time.</td>
<td>Hazardous materials incidents pose a major and/or confirmed risk to the University community. The University does not have most, if not all, of the resources required to respond to the incident. University operations and activities may be impacted or cancelled.</td>
</tr>
<tr>
<td>Typical activities:</td>
<td>Typical activities:</td>
</tr>
<tr>
<td>- More frequent coordination between law enforcement and public safety partners.</td>
<td>- Active and ongoing, on scene, coordination between public safety partners.</td>
</tr>
<tr>
<td>- Safety and Risk Management staff placed on standby status.</td>
<td>- Deployment of Safety and Risk Management staff and resources.</td>
</tr>
<tr>
<td>- More frequent Incident Coordination Team conference calls.</td>
<td>- More frequent Incident Coordination Team meetings to discuss the evolving situation.</td>
</tr>
</tbody>
</table>

### Hazard Response Activation

The response activities detailed in this annex will be activated in accordance with needs, available resources, and the declared readiness level. The Associate Vice President for Public Safety and Vice President for Administration will determine if this annex needs to be activated. Activation will follow the guidelines set forth in the Crisis and Emergency Management Plan.

### Direction, Control, Organization, and Coordination

**Command and Control**
The same command and control structure detailed in the Crisis and Emergency Management Plan will be used during a hazardous materials incident. The depiction below summarizes that command structure.

Communications

The University will employ the communications measures determined by University Relations and University leadership during a hazardous materials incident. These communications measures include emergency notifications and interoperable radio communications for first responders. Per the incident command structure detailed above, University Relations will coordinate external communications.

Work Group Responsibilities

Public Safety

- Respond to the threat
- Notify the appropriate local, state, and federal authorities of the incident.
- Provide real time updates to the ICT from the incident command post.
- Maintain situational awareness of incident if it occurs outside VCU core campuses but may have impacts on the University community.
- Provide security and traffic control measures at the scene of the incident and the Family Assistance Center is needed.
- Coordinate with external emergency management and public safety partners during the response and recovery phases.
- Determine if VCU community members have been transported to hospitals other than VCUHS. If this is the case, the Public Safety Workgroup will track these persons.
- Activate campus emergency notification systems throughout the incident as necessary.

Public Information

- If the situation warrants - in conjunction with Information Technology, develop a VCU incident website which will serve as a hub for all incident related information including class status, changes to work locations, and other University operations.
- Consider the need for emergency notifications.
- Monitor social media for information and frequently asked questions.
- In coordination with the Public Safety Workgroup, determine if Virginia 2-1-1 should be activated.

Hospital

- Provide real time updates to the ICT including triage counts.
- Contact hospital emergency management partners for assistance.

Transportation

- Make buses and other forms of transportation available should they be needed.
- In coordination with the Public Safety and Public Information Workgroups, select parking lots that are capable of holding media and friends/family of community members.
- Should road and walkway closures be implemented for a significant duration, provide signage to the Public Safety Workgroup.

Information Technology
- Ensure the VCU website is capable of handling higher demand.
- Develop guidance for the use of distance learning and teleworking technologies if needed.

**Facilities**
- Provide facility blueprints/maps to assist responding agencies.
- Assist the Public Safety Workgroup/VDEM in selecting a suitable Family Assistance Center location. As the Commonwealth's FAC lead agency, VDEM may choose a location that is not VCU property.

**Academic Affairs and Student Group**
- In coordination with the Public Safety Workgroup, begin accounting for known community members.
- In coordination with the Public Safety Workgroup, being contacting casualty family members/emergency contacts.
- Determine if the academic calendar should be modified.
- Provide mental health services to community members.

**Employee Group**
- Notify the Employee Assistance Program representative if necessary.
- In coordination with the Public Safety Workgroup, begin contact casualty family members/emergency contacts.
- In coordination with the Public Safety Workgroup, being accounting for known community members.

**Research**
- If the incident occurred at a Research facility, provide a point of contact to the Public Safety Workgroup.
- Provide subject matter expertise to the ICT.
- Activate internal emergency operations plans as needed.

**Business**
- Track all incident related expenditures.

### Hazard Subsets

#### Physical Effects of Hazardous Materials Incidents

<table>
<thead>
<tr>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Thermal Harm</td>
<td>Results from exposure to extreme temperatures. Thermal injuries can be external (from contacting, or being in close proximity to, a fire or other heat source) or internal (from inhaling fumes or heated air). Thermal injuries can also include frostbite from contact with low-temperature hazardous materials.</td>
</tr>
<tr>
<td>Radiological Harm</td>
<td>Results from exposure to radioactive materials. The most harmful types of radiation cannot be seen, felt, or smelled. Special detection devices are required to monitor and measure levels of radiation. The radiation that poses a threat to humans in ionizing radiation, which can remove electrons from atoms and cause damage to living cells and DNA.</td>
</tr>
<tr>
<td>Asphyxiation</td>
<td>Results from exposure to materials that reduce oxygen to levels that may cause suffocation. This typically occurs in confined spaces or with extremely concentrated forms of simple asphyxiants.</td>
</tr>
<tr>
<td>Chemical Harm</td>
<td>Results from exposure to chemicals, including poisons and corrosives. Injuries and illness vary by material. Chemical agents are classified according to the potential severity of their effects.</td>
</tr>
<tr>
<td>Etiological (Biological) Harm</td>
<td>Results from exposure to biochemical materials, which include bacteria, viruses, and biological toxins. Symptoms of etiological harm are often delayed, because the pathogens often require time to multiply sufficiently to cause illness in the person carrying the pathogen.</td>
</tr>
<tr>
<td>Mechanical Harm</td>
<td>Results from exposure to or contact with, fragmentation or debris scattered because of a pressure release, explosion, or boiling liquid expanding vapor explosion. The degree of harm is closely related to the size of the explosion and proximity to the device.</td>
</tr>
</tbody>
</table>

#### Phases of the Hazard

Hazardous materials incidents by nature span a wide gamut of possible materials, scenarios, and response strategies. As such, there are no predetermined phases other than preventing harm to persons, mitigating the threat, and assisting in environmental recovery.

**Annex Maintenance**

This annex will be developed and maintained in accordance with the procedures detailed in the Crisis and Emergency Management Plan.
WHEREAS, the Board of Visitors of Virginia Commonwealth University is concerned with the health and well-being of its students, faculty and staff, and desires that the best possible emergency services be available to them; and, the President of the University similarly is concerned with the health and well-being of its students, faculty and staff, and desires that the best possible emergency services be available to them; and

WHEREAS, the Code of Virginia, Chapter 8 of Title 23.1, Section 23.1-804, provides that the governing board of each public institution of higher education in Virginia shall develop, adopt, and keep current a written crisis and emergency management plan; that every four years, each public institution of higher education shall conduct a comprehensive review and revision of its crisis and emergency management plan to ensure that the plan remains current, and the revised plan shall be adopted formally by the governing board and that such review shall also be certified in writing to the Virginia Department of Emergency Management; and

WHEREAS, such a plan has been developed by Virginia Commonwealth University staff, in coordination with the Virginia Department of Emergency Management, and with input from, Virginia Commonwealth University Incident Coordination Team Departments and the City of Richmond Office of Emergency Management;

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF VISITORS OF VIRGINIA COMMONWEALTH UNIVERSITY

Section 1. The Board hereby officially adopts the Virginia Commonwealth University Crisis and Emergency Preparedness Plan, to include plans and procedures for both natural and man-made disasters.

Section 2. This resolution shall take effect immediately upon its adoption.

General Comments

- All foundations received unmodified opinions
- No material adjustments to financial statements
- No management letter comments
Cost Savings

Even prior to the pandemic, the university had taken action to reduce costs and enable unit savings:

- Savings and efficiencies from the new procure-to-pay system
  - The 5-year investment cost of $3.2M, which included licensing and implementation, was paid back in the first 6.3 months of operation.
  - Over the next 5 years, additional hard cost savings of $16.8M are expected through improved sourcing and contracting, as well as, early payment discounts and electronic payments.
- Bond refinancing savings of $10.8M in 2021 and $37M in the first 5 years
- Spending freeze continued (impact in FY2021 for travel = $5.4M)
Hiring freeze started March 31st, 2020, is forecast to save a minimum of $5M through December and will contribute to overall unit reduction plans to meet current 4% targets.

Reserve for the Monitoring Report as of 12/4/2020
Small, Women-Owned, Minority-Owned (SWaM) Results Q1 of FY21
VCU Accomplishments Q1

- **Build Capacity:** SWaM Spot Awards program issued $386K in SWaM awards during Q1 of FY21 compared to $176K in Q1 of FY20
- **Educate:** Hosted several virtual SWaM Connections to provide learning opportunities, develop relationships and connect SWaM’s with VCU
- **Leadership:** VCU partnered with SBSD and BBC on Public Virtual Meetings for the Commonwealth’s Disparity Study and SBSD’s New Virginia: Scaling4Growth event
- **Resources:** Implemented a web-based SWaM Search for sourcing from certified suppliers
SWaM spend in Q1 of FY20 and FY21 remained the same and discretionary spend decreased by $2.3M.
FY21 SWaM Goals

VCU anticipates lower SWaM spend in FY21 due to COVID-19 expenditure reductions and has established a goal aligned with the Commonwealth’s 42% SWaM goal.
Our students
Our faculty and staff
Our partnerships
Feedback

“I am personally impressed with the level of detail that VCU has provided to families and students...we are very proud to be part of the RAMily!”

“Thanks for pulling off a successful semester. I am sure it wasn’t easy.”
Looking ahead: spring semester

- Finalize the spring return to campus plan
- Entry testing for residential students
- Surveillance testing
- Monitor community health
- Communicate often
- Remain flexible
- Adjust to new information
