He concluded that all of the priorities are guided by a commitment to community impact.

The authorizations given above as to the approval, execution, delivery and issuance of the Loan Agreement, the Note and any amendments thereto (in connection with any refunding of Pooled Bonds financing or refinancing the Project or otherwise) are subject to the following parameters: (a) the principal amount to be paid under the Note allocable to any component of the Project, together with the principal amount of any other indebtedness with respect to such component, shall not be greater than the amount authorized for such component by the General Assembly plus amounts needed to fund issuance costs, original issue discount, other financing (including without limitation refunding) expenses and any other increase permitted by law; (b) the aggregate principal amount of the Note shall in no event exceed $10,800,000 as the same may be so increased; (c) the aggregate interest rate payable under the Note shall not exceed a “true” or “Canadian” interest cost more than 50 basis points higher than the interest rate for “AA” rated securities with comparable maturities, as reported by Thomson Municipal Market Data (MMD) or another comparable service or index, as of the date that the interest rates are determined, taking into account any original issue discount or premium; (d) the weighted average maturity of the principal payments due under the Note shall not exceed 20 years after the original issue date of the Note; (e) the last principal payment date under the Note shall not extend beyond the
reasonably expected weighted economic life of the Project; and (f) subject to the foregoing, the actual amount, interest rates, principal maturities, and date of the Note shall be approved by an Authorized Officer, as evidenced by the execution thereof.

Section 4. The Board acknowledges that if there is a failure to make, as and when due, any payment of the principal of, premium, if any, and interest on any promissory note issued by the Institution as a Participating Institution to the Authority under the Program, including without limitation the Note and any amendments thereto, the State Comptroller is authorized under the Program and Section 23-30.29:3 of the Code of Virginia of 1950, as amended, to charge against appropriations available to the Institution all future payments of principal of, premium, if any, and interest on such promissory note when due and payable and to make such payments to the Authority or its designee, so as to ensure that no future default will occur on such promissory note.

Section 5. The Board agrees that if the Authority determines the Institution as a Participating Institution shall be subject to continuing disclosure obligations under Rule 15c2-12 of the federal Securities and Exchange Commission with respect to any Pooled Bonds, (a) an Authorized Officer shall, and is hereby authorized and directed to, enter into a continuing disclosure undertaking in form and substance reasonably satisfactory to the Authority, and (b) the Institution will comply with the provisions and disclosure obligations contained therein.

Section 6. The Board designates the University Treasurer to be responsible for implementing procedures to monitor post-issuance compliance with covenants in any loan agreement between the Institution as a Participating Institution and the Authority, including the Loan Agreement and any amendments thereto, related to maintaining tax-exempt status for federal income tax purposes of interest on any Pooled Bonds, including without limitation monitoring the use of any portion of all Capital Projects for the Institution financed or refinanced with such Pooled Bonds and compliance with any applicable federal income tax remedial action requirements in connection with certain changes in such use. Such officer shall review such post-issuance compliance at least annually for so long as such Pooled Bonds remain outstanding.

DESCRIPTION

This project is to upgrade the steam and condensate line along Duval Street. This line serves the northern area of the MCV Campus. The improvements will allow sufficient capacity to serve new facilities and expanded needs for steam service. The $4,000,000 cost will be paid from MCV steam plant auxiliary reserves.

BACKGROUND

The VCU University master plan and VCU Health System master plan identify potential long term capacity deficiencies in the steam infrastructure on the north branch steam line along Duval Street. The north branch serves the N Deck (including child care center), Larrick Student Center, Cabaniss Dormitory, Biotech 1, Biotech Center, and the School of Allied Health Professions. The expanded line will serve the VCU Health System’s proposed Adult Outpatient Clinic.

PURPOSE

The purpose of this project is to provide sufficient steam delivery capacity for proposed future construction of VCU Health System and University facilities.

OPERATING COST

Operating costs associated with the steam distribution are included in the rates charged to existing facilities served. As new facilities are constructed, those facilities will charged for steam consumption.

RECOMMENDATION

Approve amendment of the 2016-2022 Six-Year Capital Plan to include the MCV steam line installation project at a cost not to exceed $4,000,000.
DESCRIPTION

This is a request to increase the size and budget for the School of Engineering research expansion project approved for construction in the 2016 General Assembly session. The University is proposing to increase the size of the facility from 120,000 to 133,000 gross square feet and to increase the budget from $86,000,000 to $92,000,000. The additional $6,000,000 in cost will be financed by the School of Engineering.

BACKGROUND

In May 2015, the Board of Visitors approved the 2016-2022 Six-Year Capital Plan which included an $86,000,000 School of Engineering research expansion capital project. Funding was to be shared 50/50 between State- and University-supported debt. As planning progressed, the University determined that to meet program needs, the size of the project should increase from 120,000 to 133,000 gross square feet.

PURPOSE

The School of Engineering is poised for enrollment growth and anticipates reaching maximum capacity in its existing facilities in 2017. Additionally, the School has recruited top tier researchers consistent with the University’s Quest for Distinction strategic plan and expects to continue on this track. In order to provide adequate instructional facilities, the School needs to construct new robust research facilities for faculty who will then vacate sub-standard laboratory space which can be converted to instructional use. This project provides a new four-story research laboratory building with related support space adjacent to East Hall to enable the VCU School of Engineering to reach its strategic goals.

OPERATING COST

The annual operating cost for the building is estimated to be $1,672,169 which will be paid by the School of Engineering.

RECOMMENDATION

Approve amendment of the 2016-2022 Six-Year Capital Plan to include a $6,000,000 increase in the estimated cost of the School of Engineering research expansion project.
Purpose of the Project

The School of Engineering is poised for enrollment growth and anticipates reaching maximum capacity in its existing facilities in 2017. Additionally, the School has recruited top tier researchers consistent with the University’s Quest for Distinction strategic plan and expects to continue on this track. In order to provide adequate instructional facilities, the School needs to construct new robust research facilities for faculty who will then vacate sub-standard laboratory space which can be converted to instructional use. This project provides a new four story research laboratory building with related support space adjacent to East Hall to enable the VCU School of Engineering research its strategic goals.

Location

This project is located at the northeast corner of Cary and Belvidere Street

Project Alternatives

Three alternatives were evaluated.

1. Do Nothing - This alternative would prevent the School of Engineering from meeting their strategic goals.

2. Renovation - There is no space in existing engineering facilities available for renovation.

3. New Construction - The preferred alternative is to build a new facility to allow the expansion of research facilities to meet the School’s strategic goals.

Timetables

Complete Planning May 2018
Construction Starts August 2018
Construction Complete June 2020

Project Design

The project includes new construction of research laboratories and related support space, career services, a collaboration hub, maker space and a vivarium to support the School of Engineering’s strategic goals. The new wing will frame an enclosed courtyard with amenities to enhance student engagement and interaction.

Recommendation

Approve the project plan
REQUEST

This request is to amend the 6 year capital plan and approve an $18.9 million energy performance contract with Schneider Electric.

BACKGROUND

The State has pre-qualified Energy Service Companies (ESCO) for state agencies and higher education institutions to contract with for Energy Performance Contracts (EPC). Since 2001, public entities within the Commonwealth have executed over $761,500,000 of energy performance contracts.

Virginia Commonwealth University using the pre-qualified ESCO list, contracted with Schneider Electric, an international company with over 144,000 employees and annual revenues in excess of $31 Bn to perform an Investment Grade Audit (IGA) of fourteen of the University’s highest energy usage buildings. Schneider Electric has executed 33 ESCO projects in the Virginia higher education market segment since 2004. They have executed performance contracts at the College of William and Mary, VMI, and the Virginia Community College System. They have executed over 650 ESCO projects nationwide since 1993.

The purpose of the audit was to: 1) identify relevant Energy Conservations Measures (ECMs), 2) quantify the projected savings (approximately $1.3 million per year guaranteed by Schneider Electric), and 3) leverage the energy savings realized to replace or repair items that are on the deferred maintenance backlog.

The current estimate of deferred maintenance is approximately $330 million. This project will by itself reduce the backlog by $12.8 million within 2 years\(^1\).

The payback for this project is approximately 13.2 years. Payback is determined by taking the cost of the project and dividing it by the guaranteed annual savings. The payback period will be reduced to 8 years by augmenting the energy savings with University funds provided to reduce the deferred maintenance backlog.

A Measurement and Verification (M&V) protocol is included within the contract to monitor performance. The VCU Director of Energy and Utilities will monitor the results on a monthly Building Automation System.

DESCRIPTION

The General Assembly made significant changes to the Code of Virginia (CoV) related to Construction Management (CM) and Design-build (D-B) procurement and reporting effective July 1, 2017. See one page overview included for details on these changes.

Before VCU procedures can be implemented, they must be approved by the Board of Visitors.

Below are the Construction Management at Risk Procurement Procedures with proposed modifications (annotated in red) that meet the changes to the Code of Virginia (CoV).

RECOMMENDATION

Approve the modified Construction Management at Risk Procurement Procedures

Construction Management at Risk Procurement Procedures

Purpose:

Subject to the Management Agreement between the Commonwealth of Virginia and Virginia Commonwealth University, the university shall have and shall exercise all authority relating to the procurement of goods, services, insurance and construction. Procurement procedures for professional and construction services are identified in the Higher Education Capital Outlay (HECO) Manual adopted by Virginia Commonwealth University as approved by the Board of Visitors.

Responsible Staff:

*University Planning, Design and Construction* is the Facilities Management Division responsible for the procurement, administration, management and implementation of major Capital Outlay Projects.

*PD&C Project Manager* coordinates with PD&C management and project stakeholders to recommend an appropriate delivery method.

*Directors of Design and Construction Management* provide leadership, manage operations and recommend project delivery methods to meet university goals.
Associate Vice President for Facilities Management approves project delivery methods and recommends contracts for execution.

Procedures:

1. The use of the Construction Management (CM) delivery method is typically limited to complex projects where competitive sealed bidding is determined to be not practicable or advantageous to the university. The project complexity and timeline are critical components when selecting the CM delivery method.

2. If competitive sealed bidding is not selected, the PD&C Project Manager shall provide a written recommendation for the project delivery method through the Director of Construction Management to the AVPFM. The written recommendation shall state in sufficient detail why competitive sealed bidding was not practicable and/or financially advantageous to the university.

3. The PD&C Project Manager shall consider the following criteria, listed in no particular order or priority, in recommending the using the CM@Risk construction delivery method for each project:
   a. Construction Cost
   b. Project Complexity
   c. Project Timeline - Schedule, schedule challenges and critical completion dates
   d. Building Use
   e. Project Phasing - Coordination of phased or fast-track construction
   f. Value Engineering and/or Constructability Analysis
   g. Quality Control/Vendor Prequalification Needs
   h. Cost/Design Control Needs

4. Based on the written justification provided, the VCU Associate Vice President for Facilities Management (AVPFM) shall review and give the official written determination that Construction Management at Risk is the appropriate construction delivery method for the specific capital outlay project.

5. Once the AVPFM has approved the use of Construction Management at Risk, VCU shall provide to Department of General Services their written determination that competitive sealed bidding is neither practicable nor advantageous and a completed Construction Management at Risk Procurement Submittal form identifying the project characteristics relevant to CM@Risk procurement. DGS will review and make its recommendation to this submittal within five working days.

6. Construction Management at Risk Procurement procedures:
   a. The Director, Construction Management shall appoint an Evaluation Committee that consists of at least three members, including at least one licensed design professional as well as representatives from the client organization.
   b. A two-step Request for Qualifications/Request for Proposals (RFQ/RFP) process shall be utilized.
   c. The Director of Construction Management shall develop the Request for Qualifications which shall include:
i. The justification for the particular delivery method.
ii. Statement on why sealed bidding is not practicable and/or fiscally advantageous.
iii. Criteria for contractor selection

d. Procurement shall be initiated no later than the Schematic Design Phase unless prohibited by funding authorization restrictions.

e. The Director, Construction Management shall prepare a Request for Qualifications containing the University’s project requirements, building and site criteria, construction cost estimate and project schedule as well as the University’s justification for the use of CM@Risk.

f. The criteria for evaluation of contractor qualifications shall be included in the RFQ, including any unique capabilities and qualifications.

g. The RFQ shall be posted in accordance with the current requirements of the Code of Virginia for a minimum of 30 days.

h. The Evaluation Committee shall evaluate the firms’ RFQ responses and any other relevant information and determine those best qualified with respect to the criteria established for the project and included in the RFQ. Prior CM@Risk or BCOM experience shall not be a prerequisite for award.

i. The RFQ process shall result in a short list of two to five offerors to receive the Request for Proposals. An offeror may be denied prequalification only as specified under the Code of Virginia § 2.2-4317, but the short list shall be those deemed best qualified.

j. The Director, Construction Management shall develop the Request for Proposals. The criteria for evaluation shall be included in the RFP and the RFP shall be posted in accordance with the current requirements in the Code of Virginia for a minimum of 30 days.

k. In addition, at least 30 days prior to the date for RFP response submission, those RFQ offerors who were not selected for the short list shall be provided written notification and the reasons for such decision. In the event that an offeror is denied prequalification, the written notification shall state the reasons for such a denial of prequalification and the factual basis of such reasons.

l. The Evaluation Committee shall evaluate and rank the firms’ Proposals. Prior CM@Risk or BCOM experience shall not be a prerequisite for award.

m. After evaluation and ranking, the Committee shall invite the top two or three offerors for Oral Presentations/Interviews. Following the Oral Presentations, the Committee shall determine the top two firms and conduct negotiations with those offerors.

n. The Contract shall be awarded to the offeror who is determined fully qualified and has been determined to have provided the best value in response to the RFP. The University shall notify all offerors who submitted proposals, which offer was selected for the project. When so provided in the RFP, awards may be made to more than one offeror.
o. Upon request, documentation of the process used for the final selection shall be made available to the unsuccessful offerors.

7. Contracting Requirements for CM@Risk:
   a. Preconstruction Services shall be contracted as a non-professional service.
   b. The Guaranteed Maximum Price (GMP) shall be established at the completion of Working Drawings. If the University and CM@Risk cannot agree on a GMP, the University may competitively bid the project with the other prequalified CM@Risk offerors or enter into competitive negotiations with the other CM@Risk offerors in accordance with the requirements of the Code of Virginia.
   c. Interim GMPs for early release packages are permitted.
   d. 90% of the construction work under a CM@Risk contract must be subcontracted through publicly advertised sealed bidding to the maximum extent practicable.

8. Procurement Services shall identify the particular procurement method in eVA as the “category” for the solicitation, either “Construction, Construction Management” or “Construction, Design-Build”.

Reporting

After the Department of General Services has reviewed and made their recommendation regarding the procurement method for a particular project, Virginia Commonwealth University shall report to the Director of the Department of General Services the method utilized.

DESCRIPTION

The General Assembly made significant changes to the Code of Virginia (CoV) related to Construction Management (CM) and Design-build (D-B) procurement and reporting effective July 1, 2017. See one page overview included for details on these changes.

Before VCU procedures can be implemented, they must be approved by the Board of Visitors.

Below are the Design-Build Construction Procurement Procedures with proposed modifications (annotated in red) that meet the changes to the Code of Virginia (CoV).

RECOMMENDATION

Approve the modified Design-Build Construction Procurement Procedures

Design-Build Construction Procurement Procedures

Purpose:

Subject to the Management Agreement between the Commonwealth of Virginia and Virginia Commonwealth University, the university shall have and shall exercise all authority relating to the procurement of goods, services, insurance and construction. Procurement procedures for professional and construction services are identified in the Higher Education Capital Outlay (HECO) Manual adopted by Virginia Commonwealth University as approved by the Board of Visitors.

Responsible Staff:

*University Planning, Design and Construction* is the Facilities Management Division responsible for the procurement, administration, management and implementation of major Capital Outlay Projects.

*PD&C Project Manager* coordinates with PD&C management and project stakeholders to recommend an appropriate delivery method.

*Directors of Design and Construction Management* provide leadership, manage operations and recommend project delivery methods to meet university goals.

*Associate Vice President for Facilities Management* approves project delivery methods and recommends contracts for execution.
Procedures:

1. The use of the Design-Build (DB) delivery method is typically limited to projects where competitive sealed bidding is determined to be not practicable or advantageous to the university. The projects are typically relatively simple and straightforward and the timeline is a critical component when selecting the DB delivery method since the procedure generally reduces the design timeline and the construction timeline, minimizes change orders, and operates on a fast-track schedule. Use of Design-Build results in a single point of contact and responsibility for both the design and construction of the project.

2. If competitive sealed bidding is not selected, the Planning and Design Project Manager shall provide a written recommendation for the project delivery method through the Director of Construction Management to the AVPFM. The written recommendation shall state in sufficient detail why competitive sealed bidding was not practicable and/or financially advantageous to the university.

3. The PD&C Project Manager shall consider the following criteria, listed in no particular order or priority, in recommending use of the Design-Build construction delivery method for each project:
   
a. Construction Cost
b. Project Complexity
c. Project Timeline - Schedule, schedule challenges and critical completion dates
d. Building Use
e. One contract with a Design-Build contractor for both professional design services and building construction services

4. Based on the written justification provided, the VCU Associate Vice President for Facilities Management (AVPFM) shall review and give the official written determination that Design-Build is the appropriate construction delivery method for the specific capital outlay project.

5. Once the AVPFM has approved the use of Design-Build, VCU shall provide to Department of General Services their written determination that competitive sealed bidding is neither practicable nor advantageous and a completed Design-Build Procurement Submittal form identifying the project characteristics relevant to DB procurement. DGS will review and make its recommendation to this submittal within five working days.

6. Design-Build Procurement procedures:
   
a. The Director, Construction Management shall appoint an Evaluation Committee that consists of at least three members, including at least one licensed design professional as well as representatives from the client organization.

b. A two-step Request for Qualifications/Request for Proposals (RFQ/RFP) process shall be utilized.

c. The Director of Construction Management shall develop the Request for Qualifications which shall include:
   
i. The justification for the particular delivery method.
ii. Statement on why sealed bidding is not practicable and/or fiscally advantageous.
iii. Criteria for Design-Build Team selection

d. The Director, Construction Management shall prepare a Request for Qualifications containing the University’s facility requirements, building and site data (if available), as well as the University’s justification for the use of Design Build. All offerors shall be required to have a licensed Class “A” contractor and an Architect or Engineer registered in the Commonwealth of Virginia as part of the Project Team.

e. The criteria for evaluation of the Design-Build contractor qualifications shall be included in the RFQ, including any unique capabilities and qualifications.

f. The RFQ shall be posted in accordance with the current requirements of the Code of Virginia for a minimum of 30 days.

g. The Evaluation Committee shall evaluate the teams’ RFQ responses and any other relevant information and determine those best qualified with respect to the criteria established for the project and included in the RFQ. Prior DB or BCOM experience shall not be a prerequisite for award.

h. The RFQ process shall result in a short list of two to five offerors to receive the Request for Proposals and project Bridging Documents. An offeror may be denied prequalification only as specified under the Code of Virginia § 2.2-4317, but the short list shall be those deemed best qualified.

i. The criteria for evaluation shall be included in the RFP and the RFP shall be posted in accordance with the current requirements in the Code of Virginia for a minimum of 30 days.

j. In addition, at least 30 days prior to the date for RFP response submission, those RFQ offerors who were not selected for the short list shall be provided written notification and the reasons for such decision. In the event that an offeror is denied prequalification, the written notification shall state the reasons for such a denial of prequalification and the factual basis of such reasons.

k. Bridging Documents are prepared for the project by an A/E firm that will be precluded from submitting a Proposal, that detail the university’s requirements for the project. The Bridging Documents are included as part of the Request for Proposals.

l. Sealed Technical Proposals as described in the RFP shall be submitted to the Evaluation Committee. Separately, sealed Cost Proposals shall be submitted to the university’s Virginia Construction Contracting Officer (VCCO) and shall be secured and kept sealed until evaluation of the Technical Proposals and any design adjustments are completed.

m. The Evaluation Committee shall evaluate the teams’ Technical Proposals based on the criteria contained in the RFP. It shall inform each DB offeror of any adjustments necessary to make its Technical Proposal fully comply with the requirements of the RFP. In addition, the university may require that offerors make design adjustments necessary to incorporate project improvements and/or additional detailed information identified by the Evaluation Committee during design development.
n. Based on the adjustments requested by the Evaluation Committee, the offerors shall provide a revised Technical Proposal and cost Proposal as necessary. In addition, an offeror may submit cost modifications to its original sealed cost Proposal which are not based upon revisions to the Technical Proposals.

o. The Evaluation Committee shall evaluate (and rank, if technical rankings are to be considered as a criterion for award) the teams’ Technical Proposals and open the Cost Proposals and apply the criteria for award as specified in the RFP. Cost is a critical component of the selection and will be evaluated according to the criteria specified in the RFP.

p. After evaluation and ranking, the Committee shall invite the top two or more offerors for Oral Presentations/Interviews. Following the Oral Presentations, the Committee shall determine the top two or more firms and conduct negotiations with those offerors.

q. The Contract shall be awarded to the offeror who is determined fully qualified and has been determined to have provided the best value in response to the RFP. The University shall notify all offerors who submitted proposals, which offer was selected for the project. When so provided in the RFP, awards may be made to more than one offeror.

r. Upon request, documentation of the process used for the final selection shall be made available to the unsuccessful offerors.

7. Procurement Services shall identify the particular procurement method in eVA as the “category” for the solicitation, either “Construction, Construction Management” or “Construction, Design-Build”.

**Reporting**

After the Department of General Services has reviewed and made their recommendation regarding the procurement method for a particular project, Virginia Commonwealth University shall report to the Director of the Department of General Services the method utilized.

**Accountability**

The Executive Director of Audit and Compliance Services shall be accountable to the Board of Visitors, through the Audit, Integrity, and Compliance Committee, and the Board of Directors, through the Audit and Compliance Committee, to maintain comprehensive and professional internal audit and compliance programs. In fulfilling those responsibilities, the Executive Director will:

**Independence and Objectivity**

All work will be conducted in an objective and independent manner. Staff will maintain an impartial attitude in selecting and evaluating evidence and in reporting results. Independence in fact and appearance enables unbiased judgments that are essential to the proper conduct of the department’s scope of work.

To provide an appropriate reporting structure to support independence, the Executive Director shall report to the Audit, Integrity, and Compliance Committee of the Board of Visitors and to the Audit and Compliance Committee of the Board of Directors. The Executive Director shall report administratively to the university’s President.

- Developing and executing annual and long-range risk-based audit and compliance plans and initiatives. The plans and initiatives will be submitted to management for review and comment and to the respective board committee for approval. The department recognizes that one of
the primary benefits of these programs is the ability to respond to issues that arise during the
normal course of business. Accordingly, the annual plans shall include time for management
requests and special projects.

- Participating in an advisory capacity in the planning, development, implementation, or change
  of significant compliance and control processes or systems. The Executive Director shall

  of the results.

  the respective board committee.

Standards of Practice

The department will conduct its scope of work in accordance with requirements and best practices as established by relevant authoritative and objective sources from industry and government.

For internal audit functions, this includes both mandatory and recommended guidance from the Institute of Internal Auditors International Professional Practices Framework. The mandatory guidance requires our department to conform with the Core Principles for the Professional Practice of Internal Auditing, Definition of Internal Auditing, Code of Ethics, and International Standards for the Professional Practice of Internal Auditing (Standards). Internal auditing is an independent, objective assurance, and consulting activity designed to add value and improve an organization’s operations. Our department will help the university and health system accomplish its objectives by bringing a systematic, disciplined, and risk-based approach to evaluate and improve the effectiveness of risk management, control, and governance processes.

For maintaining effective compliance programs, standards of practice are driven by the guidance provided in Chapter 8 of the Federal Sentencing Guidelines as promulgated by the US Sentencing Commission. The main focus of an effective program is to prevent and detect misconduct, remedy harm when identified, self-report where applicable, and maintain due diligence in promoting an organizational culture that encourages ethical conduct and a commitment to compliance with the law.

For the health system compliance program, guidance by the Health Care Compliance Association is also included. This organization sets the standard for professional values and ethics in the health care compliance field.

Quality Assurance and Improvement Program

The department will maintain a quality assurance and improvement program that covers all aspects of the internal audit activity. This program will be designed to:

- evaluate internal audit’s conformance with the Standards and application of the Code of Ethics;
- assess the efficiency and effectiveness of the department; and
- identify opportunities for improvement.

The quality program includes both internal and external assessments. Internal assessments will include ongoing monitoring and periodic assessments of internal audit activity.
