5. Alternative Construction Process

• VCU has been authorized and made use of alternative construction procurement methods for over ten years

• Alternate construction procurement methods are:

  1. construction management at risk (CMAR)
     CMAR is a delivery method which entails a commitment by the Construction Manager (CM) to deliver the project within a Guaranteed Maximum Price (GMP) which is based on the construction documents and specifications at the time of the GMP plus any reasonably inferred items or tasks.
     (typically limited to projects with a construction cost of $10M+)

  2. design-build (DB)
     Design-build is a method of project delivery in which one entity – the design-build team – works under a single contract with the project owner to provide design and construction services.
     (typically limited to projects with a project cost of $10M+ and a critical project timeline for completion)

5. Alternative Construction Process

- During the last legislative session, language in the Appropriation Act requires us to:
  1. develop a process for determining the selected procurement method - completed
  2. submit the process to the Department of General Services (DGS) for review and recommendation - completed
  3. submit the process with DGS recommendations for approval to the BOV. Now requesting your approval of the process presented.

11. Treasurer’s Report

- **Short-term Tier** in compliance with Investment Policy, save for a temporary over-weighting towards Money Market Funds (AAA-rated cash-equivalent). This was due to portfolio rebalancing, which is now complete and in full compliance.

- **Long-term Tier** in compliance with Investment Policy, save for a temporary over-weighting towards fixed income and cash and a temporary underweighting towards alternative assets. This is due to VCIMCO rebalancing the portfolio, and will be done once VCIMCO has completed selecting managers.
